

DVD/CD Rewritable Drive
DRX-S70U-W

About Recommended Discs and Compatibility

2009/06/10

This page contains information about the types of writable disc that can be used with the DVD/CD rewritable drive DRX-S70U-W.

Recommended Discs and Compatibility

The DVD/CD rewritable drive DRX-S70U-W are designed for best performance with discs produced by major disc manufacturers. In most cases, there is no problem as long as you use discs conform to the industry standard for various CD and DVD formats. However, some of discs on the market do not meet the recognized quality and performance standards. With the DVD/CD rewritable drive DRX-S70U-W, we recommend the disc manufacturers and discs below. Furthermore, it is recommended to upgrade your drive with the latest firmware available at user support web site. The latest firmware can be downloaded at [Storage Support](#) web site.

* The writing performance and reading ability of all discs cannot be guaranteed.

Write Speed

You can achieve the optimum performance possible with the DVD/CD rewritable drive DRX-S70U-W at the write speed specified on the disc (or a slower speed than the specified). The DVD/CD rewritable drive DRX-S70U-W also enable the write speed setting that exceeds the specified speed at the disc with some of certified discs^{*}. The write speed is set by your software or the drive automatically determines a speed that matches each discs.

* Under these circumstances, the writing performance and reading ability of all discs cannot be guaranteed.
