WARNING

To prevent fire or shock hazard, do not expose the projection TV to rain or moisture.
Dangerously high voltages are present inside the projection TV. Do not open the cabinet. Refer
servicing to qualified personnel only.

For general safety:
- Do not expose the projection TV to rain or moisture.
- Do not open the rear cover.

For safe installation:
- Do not block the ventilation openings.
- Do not install the projection TV in hot, humid or excessively dusty places.
- Do not install the projection TV where it may be exposed to mechanical vibrations.
- Avoid operating the projection TV at temperatures below 5°C (41°F).
- If the projection TV is transported directly from a cold to a warm location, or if the room
  temperature has changed suddenly, the picture may be blurred or show poor color. This is
  because moisture has condensed on the mirror or lenses inside. If this happens, let the
  moisture evaporate before using the projection TV.
- To obtain the best picture, do not expose the screen to direct illumination or direct sunlight. It
  is recommended to use spot lighting directed down from the ceiling or to cover the windows
  that face the screen with opaque drapery. It is desirable to install the projection TV in a room
  where the floor and walls are not of reflecting material. If necessary, cover them with dark
  carpeting or wall paper.
- Do not install the appliance in a confined space, such as a bookcase or built-in cabinet.

For safe operations:
- Do not operate the projection TV on anything but 110-240 V AC, 50/60 Hz.
- Do not operate the projection TV if any liquid or solid object falls in it—have it checked
  immediately.
- Do not keep the projection TV plugged in if you are not going to use it for several days. Even
  if your projection TV is turned off, it is still connected to the AC power source (mains) as long
  as the power cord is plugged in.
- Do not pull the power cord to disconnect the projection TV. Pull it out by the plug.
- Do not plug in too many appliances to the same power socket. Do not damage the power
  cord.
- Do not place any objects on the projection TV. The apparatus shall not be exposed to dripping
  or splashing and that no objects filled with liquids, such as vases, shall be placed on the
  apparatus.
- Install the projection TV on a stable projection TV stand and floor which can support the
  projection TV set weight. Ensure that the projection TV stand surface is flat and its area is
  larger than the bottom area of the projection TV.
- Do not carry the projection TV holding the screen edges.

Caution
- When using TV games, computers, and similar products with your projection TV, keep the
  brightness and contrast functions at low settings. If a fixed (non-moving) pattern is left on the
  screen for long periods of time at a high brightness or contrast setting, the image can be
  permanently imprinted onto the screen. These types of imprints are not covered by your
  warranty.

Cleaning the Screen
- To clean the screen with a cloth, please use a cleaning cloth lightly moistened with water. Do
  not use any type of abrasive pad, alkaline cleaner, scouring powder or solvent, such as alcohol
  or benzine. As a safety precaution, unplug the projection TV before cleaning it.
- Do not rub, touch, or tap the surface of the screen with sharp or abrasive items, like a ball
  point pen or a screw driver. Otherwise, this type of contact may result in a scratched screen.
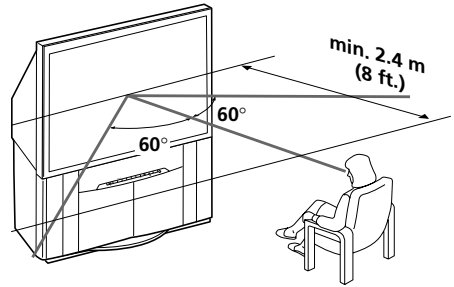

■ Install the projection TV

Additional Information

■ Getting Started

Step 1

Insert the batteries (supplied) into the remote.

Note
• Do not use old or different types of batteries together.
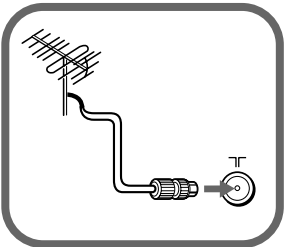

Step 2

Connect the antenna cable (not supplied) to ㅜ (antenna input) at the rear of the projection TV.

Tip
• You can also connect your projection TV to other optional components (see page 29).
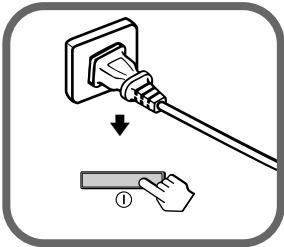

Step 3

Plug in the power cord, then press ① on the projection TV to turn it on.

Note
• The ⏻ (standby) indicator flashes green for a few seconds when turning on the projection TV. This does not indicate a malfunction.

Step 4

Set up the projection TV by following the instructions of the "Initial Setup" menu (see page 7).

Initial Setup

Language: English
中文
عربي
ไทย

Select: ⊕⊞   Confirm: ⊞   End: WEGA GATE

■ Setting up your projection TV ("Initial Setup")

When you turn on your projection TV for the first time, the "Initial Setup" menu will appear. You may change the menu language, preset the TV channels automatically, sort or edit the channels and adjust the convergence using the buttons on the remote control or projection TV front panel.

1 Press ♠ or ♦ to select the desired menu language, then press ⊕.

The selected menu language appears.

```
        Initial Setup

Language:      English
               中文
               عربي
               ไทย

Select:⊞⊞   Confirm:⊞  End: WEGA GATE
```

2 Press ♠ or ♦ to select "Yes", then press ⊕ to preset the channels automatically.

The screen will indicate automatic presetting is in progress.

After all available channels have been tuned and stored, the "Program Sorting/Edit" menu appears automatically on the screen.

To skip automatic channel presetting, select "No", then press ⊕.

If the message "No channel found. Please connect cable/antenna" appears, check your projection TV connections, then press ⊕.

```
        Initial Setup

First please connect
     cable/antenna

Start Auto Program now?
          Yes
          No
Select:⊞⊞   Confirm:⊞  End: WEGA GATE
```

```

Program:   01
TV System: Auto
VHF Low  |||||||||||||||||||ıııııııı

                        End: WEGA GATE
```

3 The "Program Sorting/Edit" menu enables you to sort and edit the channels.

a) If you wish to keep the channels in the current condition, press WEGA GATE to exit.

b) Press ♠ or ♦ to select the program number with the channel you wish to change. The selected channel will appear on the screen.

c) If you wish to store the channels in a different order:

   1) Press ➜ to enter sorting mode.

   2) Press ♠ or ♦ to select the new program number position for your selected channel, then press ◄.

```
      Program Sorting/Edit

Select: ▲▼◀▶ Confirm: ⊕ Exit: WEGA GATE

4 Make sure that "Yes" is selected, then press ⊕ to start digital quick focus.

The convergence adjustment screen appears, and the convergence is automatically adjusted.

After the adjustment, the last "Initial Setup" menu appears automatically on the screen.

Initial Setup
Start digital quick focus now?
Yes
No

Select: ▲▼ Confirm: ⊕ Exit: WEGA GATE

+
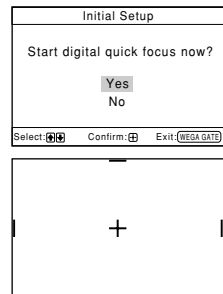

5 To prevent this "Initial Setup" menu from appearing again when you turn on the projection TV by pressing ①, press ▲ or ▼ to select "No", then press ⊕.

To allow this menu to appear again, select "Yes", then press ⊕.

Initial Setup
Display this menu next time?
Yes
No

Select: ▲▼ Confirm: ⊕
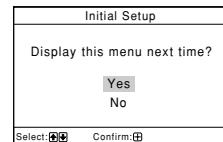

Tip
• You can immediately go to the end of the "Initial Setup" menu by pressing WEGA GATE.
Notes
• Convergence can also be adjusted manually using the menu (see page 27).
• You can also perform the Digital Quick Focus feature using ⊞ on the front panel.
• Sound will be muted while the Digital Quick Focus feature is running.

TruSurround technology is incorporated under license from SRS Labs, Inc.

■ Selecting the picture and sound modes

You can select picture and sound modes and adjust the setting to your preference in the "Custom" option.
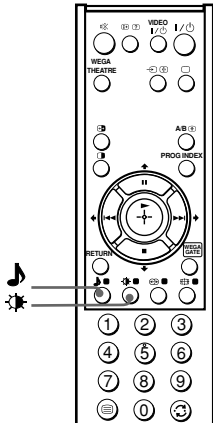

Selecting the picture mode

Press ☼ to select the desired picture mode.

Select	To view
"Vivid"	contrast and sharp pictures.
"Standard"	normal pictures.
"Custom"	the last adjusted picture setting from the "Picture Adjustment" option in the menu (see page 21).

Selecting the sound mode

Press ♪ to select the desired sound mode.

Select	To listen to
"Dynamic" ♪ **Dynamic**	dynamic and clear sound that emphasizes both the low and high tones.
"Standard" ♪ **Standard**	sound that emphasizes voice and high tones.
"Custom" ♪ **Custom**	the last adjusted sound setting from the "Sound Adjustment" option in the menu (see page 22).

■ Enjoying the WEGA Theatre Mode with center speaker

The WEGA Theatre Mode enables you to enjoy the best picture, sound and surround effect of a cinema from a DVD source. You can use your projection TV speaker as the center speaker of your audio system for optimum vocal enhancement and control its sound volume from the remote of the projection TV.

WEGA THEATRE

⊿ +/−
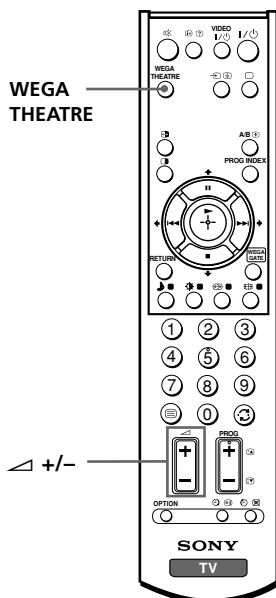

Setting up WEGA Theatre Mode

1. Connect the center speaker terminals of the amplifier to the center speaker input terminal on the projection TV (see page 31).
2. Select the proper video input and center speaker mode from "WEGA Theatre Setup" menu and turn on (main power) the connected equipment (see page 27).
3. See the table below. If the connected equipment is a Sony audio/video equipment, you can set up the remote to work with the connected equipment (see page 17).

| To	Press
switch to WEGA Theatre Mode	WEGA THEATRE.
	Be sure to aim the remote control at the projection TV set and connected equipment for about one second after the button is pressed. The connected equipment turns on automatically from standby mode and will start playing (only for Sony audio/video equipment).
	The "Picture Mode" and "Sound Mode" will switch automatically to "Custom" and you can adjust the setting to your personal preference (see pages 22 and 23).
adjust center speaker volume	⊿ +/−.

Notes

- Be sure to place your projection TV and connected Sony equipment adjacent to each other so that you can control both the projection TV and the connected equipment by using the projection TV's remote control at the same time (see page 17).
- The WEGA Theatre and center speaker modes are automatically cancelled when you change the program number, video input or turn the projection TV off and on again.
- When the projection TV is in the center speaker mode, you cannot use the Twin pictures feature, change the surround sound and the "Intelligent Volume" mode.
- Some Sony equipment might not respond properly when WEGA THEATRE button is pressed. In this case, use the equipment's own remote control.
- To use the projection TV's speakers as the center speaker, you can also display "Center Speaker" from "Sound" menu and select "On" (see page 22).

■ Viewing two programs at the same time

▶ KP-FR53M94 only

With the Twin pictures feature, you can display two different TV program or video input at the same time.

To	Press
display Twin pictures	◑. To cancel, press the button again.
select a program number in the right picture	♠ or ♦.
swap the left and right pictures	⬒.
swap sound between the left and right pictures	← or → once. A "♪" symbol will appear to indicate which screen you are hearing.
change the screen size of the Twin pictures	Hold ← to increase the left screen size. Hold → to increase the right screen size. Sound will swap automatically to the screen which is increasing in size.

Selecting TV program from "TV" in WEGA GATE menu (see page 18) using PAP (Picture And Picture)

You can select your desired TV program directly from the right picture by using ♠ or ♦ buttons.

1. Press ♠ or ♦ until the desired program appears on the right picture.
2. Press ⊕ (or →) to display the right picture in full screen.

Notes
- You cannot change the picture size or swap the two pictures in the PAP mode.
- Swapping the pictures is not available for HD (high-definition) and DVD input signals in Twin mode.
- HD and DVD input signals are not available in the right picture.
- The Twin pictures feature is not available when the projection TV is in the center speaker mode (see page 13) and you cannot set the projection TV to the center speaker mode while viewing the Twin pictures.
- You can only enjoy stereo sound from the left picture.
- You cannot change the picture to a video input in the right picture. You can only display a video input, except for HD and DVD input signals, in the right picture by swapping the pictures when a video input is displayed in the left picture.
- The picture and sound from the ⌐→ (monitor output) terminals will always be from the left picture, even when you select the sound from the right picture by swapping the sound.
- Due to different video processors used, it is normal that the picture quality of the right picture might be slightly different from the left picture.

■ Displaying multiple programs

▶ KP-FR53M94 only

The Program Index feature displays all tuned TV programs scrolling on the screen for direct selection.

PROG INDEX

▲/▼/⊕
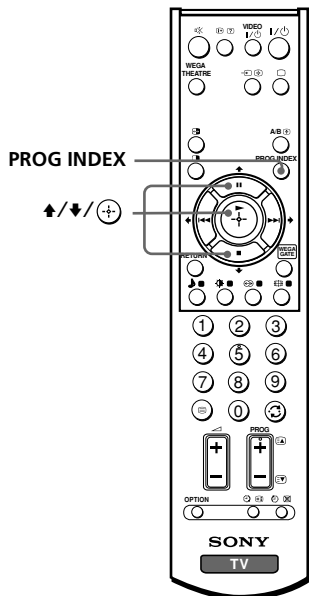

1 Press PROG INDEX.

The current program is displayed on the left. The first tuned program is displayed on the bottom right of the screen, then frozen.

It scrolls up and the next program appears on the bottom-right until all tuned programs appear one by one.

2 Press ▲ or ▼ until the program you want to view is displayed in the frame, then press ⊕.

To return to scrolling, press ▲ or ▼ again.

3 Press ⊕ again to enlarge the selected program into the left frame.

4 Press PROG INDEX.

The selected program is displayed in full screen.

1   2   3   4
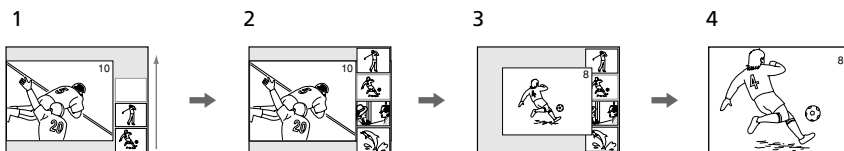

Note

• When displaying multiple programs, only the sound of the left picture is heard.

■ Enjoying stereo or bilingual programs

You can enjoy stereo sound or bilingual programs of NICAM and A2 stereo systems by using the A/B button.

A/B
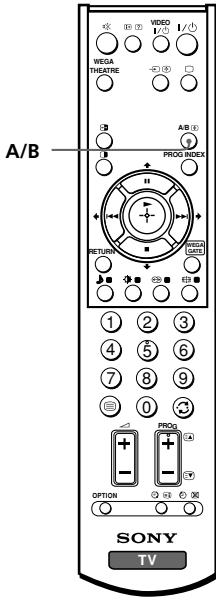

When receiving a NICAM program

Broadcasting	On-screen display (Selected sound)
NICAM stereo	NICAM (Stereo sound) → Mono (Regular sound)
NICAM bilingual	NICAM Main (Main sound) → NICAM Sub (Sub sound) → Mono (Regular sound)
NICAM monaural	NICAM Main (Main sound) → Mono (Regular sound)

When receiving an A2 program

Broadcasting	On-screen display (Selected sound)
A2 stereo	Stereo (Stereo sound) → Mono (Regular sound)
A2 bilingual	Main (Main sound) → Sub (Sub sound)

Note
• If the stereo sound is noisy when receiving a stereo program, select "Mono". The sound becomes monaural but the noise is reduced.

■ Operating optional components
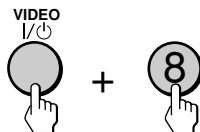

You can use the supplied remote to operate Sony audio/video equipment.

Setting up the remote to work with other connected equipment

While keeping VIDEO I/⏻ pressed, press the corresponding number button for the desired equipment (see the chart below).

For example, to operate a Sony 8 mm VCR:

VIDEO
I/⏻

◯ + ⑧

To control	Hold down VIDEO I/⏻ and press
Audio System 1, 1x, 2 or 3	0, 1, 2 or 3
DVD 1, 2 or 3	4, 5 or 6
VTR1 (Beta), VTR2 (8 mm) or VTR3 (VHS)	7, 8 or 9

Operating audio/video equipment

Press VIDEO I/⏻ or while keeping OPTION pressed, press ►, ■, I◄◄, ►►I, II, ⊠ or ⊿ +/− (see the chart below).

To	Press
turn on/off	VIDEO I/⏻
play	► while keeping OPTION pressed.
stop	■ while keeping OPTION pressed.
fast forward/ step forward or rewind/ step backward	►►I or I◄◄ while keeping OPTION pressed.
pause	II while keeping OPTION pressed. Press again to resume normal playback.
mute the sound (Audio System 1, 1x, 2 or 3 only)	⊠ while keeping OPTION pressed.
adjust volume (Audio System 1, 1x, 2 or 3 only)	⊿ +/− while keeping OPTION pressed.

Notes
- If the equipment does not have a certain function, the corresponding button on the remote will not operate.
- Some equipment might not respond properly to buttons on projection TV's remote. In this case, use the equipment's own remote control.

625p	576p	50
625i	576i	50
525p	480p	60
525i	480i	60

Connecting an amplifier to the center speaker input terminal (▷◄ᴄ⁻)

If you use an amplifier with a Dolby* surround decoder instead of the projection TV's audio system, you can use the projection TV's speakers as the center speaker for your audio system.
Using the speaker cords supplied with the amplifier, connect the center speaker terminals of the amplifier to the ▷◄ᴄ⁻ (center speaker input) terminals on the projection TV.
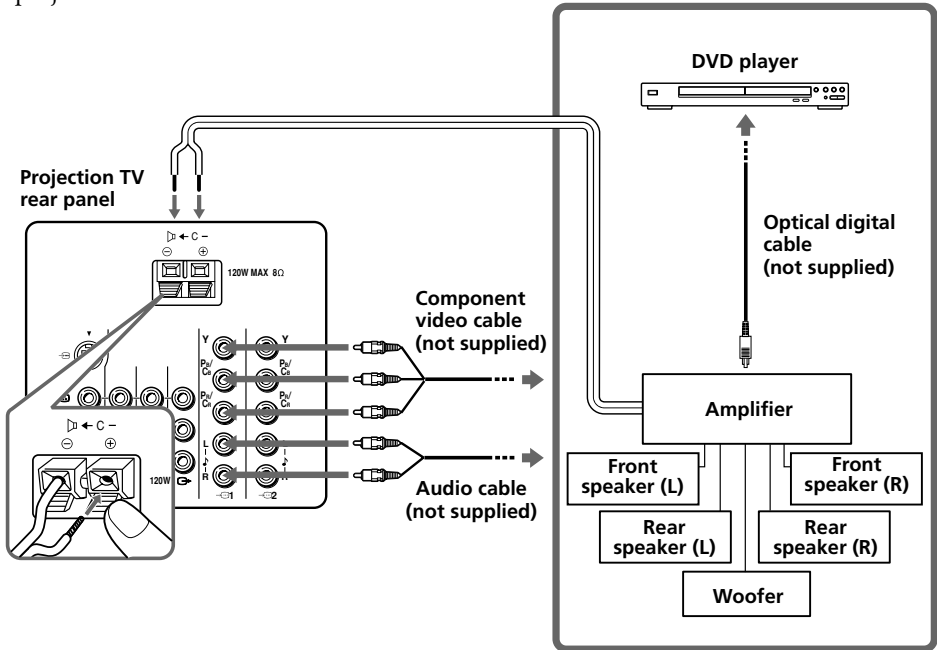

Note
- If you use the projection TV's speaker as the center speaker and nothing is connected to the center speaker input terminals on the rear of projection TV or the sound source emitted from the amplifier does not contain the center speaker channel, no sound will be heard from the projection TV's speaker.

* "Dolby" is a trademark of Dolby Laboratories.

■ Troubleshooting

If you find any problem while viewing your projection TV, you can either use the "Factory Settings" function or check the Troubleshooting guide below. If the problem persists, contact your Sony dealer.

"Factory Settings" function

Press the WEGA GATE button. Choose "Settings" and go to "Setup" (🔧) menu.
From "Setup" menu, select "Factory Settings". Then select "Yes" and press ⊕.
Your projection TV will go blank for a few seconds, then the "Initial Setup" menu will appear. Your projection TV will be set to factory settings, but certain problems may be solved.

Symptom	Solutions
Snowy picture, noisy sound	• Check the antenna cable and connection on the projection TV, VCR and at the wall (see page 29).
	• Check the antenna setup. Contact a Sony dealer for advice.
	• Display the "Channel Setup" menu and select "Manual Program" to preset the channel again (see page 26).
	• Display the "Channel Setup" menu and set the "Signal Booster" to "Auto" from "Manual Program" (see page 26).
	• Try using an external booster.
Distorted picture, noisy sound	• Turn off or disconnect the external booster if it is in use.
	• Display the "Channel Setup" menu and set the "➤ Sensitivity" to "Low" from "Manual Program"(see page 26).
Good picture, noisy sound	• Display the "Channel Setup" menu and select the appropriate "TV System" from "Manual Program" (see page 26).
	• The sound of the right picture is selected when twin pictures are displayed. Press 🔲 or ←, → once (KP-FR53M94 only) (see page 14).
No picture, no sound	• Check the power cord, antenna and VCR connections (see page 29).
	• Press I/⏻ (power) to turn on the projection TV (see page 10).
	• Press ⏻ (main power) on the projection TV to turn off the projection TV for about five seconds, then turn it on again (see page 9).
Good picture, no sound	• Press ⊿ + to increase the volume level (see page 9).
	• Press ⊠ to cancel the muting (see page 10).
	• The sound of the right picture is selected when twin pictures are displayed. Press 🔲 or ←, → once (KP-FR53M94 only) (see page 14).
	• Display the "Sound" menu and select the appropriate setting for "Center Speaker" (see page 22).
Dotted lines or stripes	• Do not use a hair dryer or other equipment near the projection TV.
	• Check the antenna setup. Contact a Sony dealer for advice.
Double images or "ghosts"	• Use the fine tuning ("Fine") function (see page 26).
	• Check the antenna setup. Contact a Sony dealer for advice.
	• Turn off or disconnect the external booster if it is in use.
No color	• Display the "Picture" menu and select "Custom" of "Picture Mode", then adjust the "Color" level in "Picture Adjustment" (see page 21).
	• Display the "Setup" menu and check the "Color System" setting (usually set this to "Auto") (see page 28).
	• Check the antenna setup. Contact a Sony dealer for advice.

Symptom	Solutions
Abnormal color patches	• Keep external speakers or other equipment away from the projection TV. Do not move the projection TV while the projection TV is turned on.
TV cannot receive stereo broadcast sound. **or** **Stereo broadcast sound switches on and off or is distorted.**	• Check the antenna cable and connection on the projection TV, VCR and at the wall (see page 29). • Check the antenna setup. Contact a Sony dealer for advice.
The ⏻ (standby) indicator on your projection TV flashes red several times after every three seconds.	• Count the number of times the ⏻ (standby) indicator flashes. Press ① (main power) to turn off your projection TV. Contact your nearest Sony service center.
The projection TV screen sometimes goes blank for slightly longer than usual during channel change.	• The "Signal Booster" is functioning to detect a weak signal. This does not indicate a malfunction.
Cannot play shooting games.	• Some shooting games which involve pointing a light beam at the projection TV screen with an electronic gun or rifle cannot be used with your projection TV. For details, see the instruction manual supplied with the video game software.
Projection TV cabinet creaks.	• Change in room temperature sometimes make the projection TV cabinet expand or contract, causing a noise. This does not indicate a malfunction.
Static discharge is felt when touching the projection TV cabinet.	• This is the same static discharge that is felt when touching metal door handles or car doors especially when the air is dry, for example in winter. This does not indicate a malfunction.
Lines moving across the projection TV screen.	• Use the fine tuning ("Fine") function (see page 26).

(Video)	Input: 4 Output: 1 Phono jacks; 1 Vp-p, 75 ohms	
(Audio)	Input: 6 Output: 1 Phono jacks; 500 mVrms	
(S Video)	Input: 2 Y: 1 Vp-p, 75 ohms, unbalanced, sync negative C: 0.286 Vp-p, 75 ohms	
(Component Video)	Input: 2 Phono jacks; Y: 1 Vp-p, 75 ohms, sync negative P_B/C_B: 0.7 Vp-p, 75 ohm P_R/C_R: 0.7 Vp-p, 75 ohms	
◁–c– (Center Speaker)	Input: 1 120 W max., 8 ohms	
(Headphone)	Output: 1 Stereo minijack	
Power requirements	110-240 V AC, 50/60 Hz	
Power consumption (W)	250 W	
Dimensions (w/h/d, mm)	1136 × 1435 × 666	926 × 1255 × 537
Mass (kg)	73	56
