1 Preparing the remote control.

   The supplied lithium battery (CR2025) has already been inserted into the remote control. Pull out the protective sheet before use as shown in the figure.

2 Preparing the photo frame.

   Screw the stand supplied with the photo frame into the screw hole firmly until the stand stops turning (when you use the photo frame as a photo stand).

3 Connecting to the AC power source.

   1 Insert the plug of the AC adaptor into the DC IN 5 V jack on the rear of the photo frame.
   2 Connect the AC adaptor to the wall outlet.
      The photo frame is automatically turned on.

4 Turn the photo frame on.

   The photo frame is automatically turned on when it is connected to the AC power source. Only when the power is off with the AC adaptor connected to the wall outlet, the step 4 is necessary.

   Tips
   - When using the DPF-E72N, the Sony logo does not light up.
   - When you use the auto power on/off function, keep the photo frame connected to the AC power source.
   - If you keep the photo frame disconnected to the AC power source for an extended period of time, the following setting is returned to its factory setting: the setting value of [Date/time settings].

5 Set the current time.

   1 Press MENU.
   2 Press \( \text{Menu} \) to select the (Settings) tab.
   3 Press \( \text{Menu} \) to select [Date/time settings] and then press \( \text{Select} \).
   4 Set the current time following the guidance on the screen.

6 Insert a memory card into the slot.

   1 Insert a memory card firmly into the corresponding slot.
      The access lamp flashes when the memory card is inserted correctly. Reinsert the memory card after checking the label side of the memory card if the access lamp does not flash.
      The status of each memory card is as follows.

   Tips
   - All memory cards have a back-side and front-side, and an insertion direction. Refer to the illustration and insert the memory card while you take note of its shape and the appropriate slot.
   - It may cause malfunction if you insert the card in the wrong direction.
   - When you use miniSD, microSD or Memory Stick Micro, please make sure a card is attached to an adaptor firmly.
   - Do not insert multiple memory cards into A, B, or CompactFlash card/Microdrive (DPF-D72N only) slots simultaneously. If multiple memory cards are inserted, the photo frame will not work properly.

   Notes
   - All memory cards have a back-side and front-side, and an insertion direction. Refer to the illustration and insert the memory card while you take note of its shape and the appropriate slot.
   - It may cause malfunction if you insert the card in the wrong direction.
   - When you use miniSD, microSD or Memory Stick Micro, please make sure a card is attached to an adaptor firmly.
   - Do not insert multiple memory cards into A, B, or CompactFlash card/Microdrive (DPF-D72N only) slots simultaneously. If multiple memory cards are inserted, the photo frame will not work properly.

2 The slideshow of the memory card you inserted starts automatically.
   You can enjoy a variety of slideshow styles.
Let's use various functions

1 Press VIEW MODE.
The view mode screen is displayed.

2 Select the group you want.
Press (Clock and calendar), (Slideshow), (Index), or (Single) on the remote. Or press →/←/↑/↓ to move the cursor to group area and then press → on the photo frame to select the group you want.

3 Select the style you want.
Press →/←/↑/↓ to select the style you want, then press EXEC.

The displaying screen
Refer to “Changing the display” on the operating instruction.

Clock and Calendar display

1 Note
You cannot perform the setting operations of the menu when you display the clock and calendar display.

Index image display

1 Tips
The image illustration is the view mode screen of the clock and calendar, slideshow, index, and single. Each view mode screen.

Slideshow

1 Tips
The playback order of the images is same as the one you selected in [Listing Order] on [General Settings]. Refer to the “Changing the settings” in the operating instructions.

When you select [Time Machine] in a slideshow mode (DPF-D72N only), the day when the image is shot or the day the file was updated is displayed.

Single view mode

1 Tips
The image illustration is the view mode screen of the clock and calendar, slideshow, index, and single. Each view mode screen.

About the display orientation
You can set the photo frame to portrait or landscape orientation by rotating it without moving the stand. You can also use this function when you display the photo frame on the wall.

Setting the Auto display orientation
1 Press MENU.
2 Press →/← to select the (Settings) tab.
3 Press →/← to select [General Settings] and press EXEC. Then press →/← to select [OFF] in [Auto display orientation] and press EXEC.

1 Notes
- Check whether the stand is stable. If the stand is not set properly, the photo frame may fall over.
- When the stand is set properly, you can display the photo frame on the wall.
- When the photo frame is rotated to the portrait orientation, the Sony logo doesn’t light up (DPF-A72N/D72N only).
- The photo frame does not detect and rotate the orientation of images when [General Settings] (Auto display orientation) in the (Settings) tab is set to [OFF].

Connecting to a computer
You can connect to a computer to view and copy images from the internal memory of the photo frame to the computer, and copy images from the computer to the photo frame.

1 Refer to “Connecting to a computer” in the operating instructions.

Various function (Setting using the MENU button)

Adding image to the internal memory
1 Refer to “Adding image to the internal memory” in the operating instructions.

Auto power on/off
1 Refer to “Changing the settings of the auto power on/off function” in the operating instructions. (This window is displayed only when you are using DPF-D72N.)

Changing the settings
1 Refer to “Changing the settings” in the operating instructions.
