

Note on browsing PDF documents using the Reader™

Your Reader provides the ability to display most text based PDF documents in six text sizes: XS, S, M, L, XL and XXL. By default, documents are displayed in their original layout when viewed in S size.

By pressing ⊕ and tapping a text size icon, the text in the viewed document can be resized and reflowed to improve readability.

Due to the complex nature of PDF documents, in certain situations when viewing the resized text, only text will appear as some tables and graphics may be reformatted and altered during the reflow process.

Also, in cases where PDF documents are created using image data only, there is in fact, no text to reflow or resize.

In these cases, if retaining the original layout of your PDF document is required, it is recommended to view in S size.

While viewing in S size, one option to improve readability is to switch the screen orientation from vertical to horizontal. To switch the screen orientation, press the OPTIONS button, then tap [Orientation].

Another option is to view the page while zoomed in. To zoom in a page, Press ⊕ and tap [🔍 Zoom In].

Note on viewing PDF files in XS, M, L, XL or XXL size

When you view PDF files in XS, M, L, XL, or XXL size, some functions such as highlighting, searching, or a temporary word selection, may not work correctly.
