Troubleshooting

If the approaches listed above fail to resolve the issue, look up information on the issue on one of the customer support Web sites. For the latest information about the customer support Web sites, see “For the latest information”.

For customers who purchased the overseas models:

For customers in Europe and countries/areas complying with European Directives:

Notes

- You can cancel the alarm and warning by pressing any button.
- An alarm (beep) and warning [Check the volume level] are meant to protect your areas complying with European Directives.
- You can turn up the volume beyond the specific level automatically.
- If you press and hold this button, the screen turns off and your Walkman enters the OFF state.
- Connect the USB cable (supplied), or peripheral devices (not supplied).
- Use to make voice recordings.
- There are tactile dots. Use them to help with button operations.

Note

- Use the supplied USB cable. Depending on the conditions under which the computer is used, the battery may have been discharged in an ambient temperature outside the range of 5 °C (41 °F) to 35 °C (95 °F). Charge the battery in an ambient temperature of 5 °C (41 °F) to 35 °C (95 °F).
- To charge the Walkman, connect the Walkman to a computer using the USB cable (supplied).
- Use the supplied USB cable. The USB connector on your computer may have a different shape.
- A USB hub is being used. The USB cable is not connected to a USB connector on your computer properly.
- The battery is charged in an ambient temperature outside the range of 5 °C (41 °F) to 35 °C (95 °F).
- You cannot charge the battery when the player cannot be connected to a computer.
- You cannot charge the battery when the software authentication may be performed and it cannot be operated.
- Use the supplied USB cable. Reinstall the software by using the installer. The software is not supported by the Walkman.
- Media Player, refer to the following web site: http://www.sony.com/walkmansupport
