SONY®

Enjoy Music with Xperia/iPhone via a Wireless Network

Quick Setup Guide

This leaflet is a setup guide for enjoying music from your Xperia (or Xperia Tablet)/iPhone (or iPad/iPod) with DLNA or AirPlay function via a wireless network.

A wireless LAN router (including an access point) is necessary in order to use the wireless network.

Personal Audio System

CMT-BT80W/BT80WB

Refer to the operating instructions of this system in the cases below.
• To play music with another smartphone or a personal computer
• When the "WALKMAN" application* is not installed on your Xperia
• To play music with BLUETOOTH

Is there a WPS button on your wireless LAN router?

Yes → **A** Making a wireless connection between this system and a wireless LAN router with WPS

No → **B** Making a wireless connection between this system and a wireless LAN router with Xperia/iPhone application "NS Setup"

* Your Xperia may not have the "WALKMAN" application. In that case, this function cannot be used. You can listen to music with some models of "WALKMAN" with this function, but they may require different operation. Refer to the operating instructions of your "WALKMAN" for details.

A Making a wireless connection between this system and a wireless LAN router with WPS

1 Check that the network (LAN) cable is disconnected from the system then connect the power cord.

2 Press the I/⏻ button to turn the system on.

3 Check that the STANDBY indicator lit in red turns off and that 📶 starts flashing in the display window.
It may take several minutes until 📶 starts flashing.

STANDBY indicator   I/⏻ button   Display window

4 Press the OPTIONS button on the remote to display "BTNW:STBY." Press the ♦/♦ button on the remote repeatedly to select "WPS" then press the ⊕ button.
If "WPS" does not appear, wait about 2 minutes.

5 When "OK" appears on the display, press the ⊕ button.
"WPS" flashes.

6 Hold the WPS button on the wireless LAN router pressed for more than 3 seconds.

7 "CONNECT" flashes after "WPS" flashes for several tens of seconds in the display window of the system, after which 📶 will light once connection is completed.
If 📶 does not appear within 5 minutes or so, the setup may not have been completed properly. In that case, proceed from step **4** again. If the setup does not become successful after that, try connection **B** on the reverse side of this leaflet.

8 Check that the connection between your smartphone and the wireless LAN router has been made properly.

When the connection is complete
→ Playing music stored in Xperia/iPhone

When the connection is not complete
→ Follow the steps below.

Make sure that your wireless LAN router is turned on then have your SSID and Security key on the space below.
For details, refer to the operating instructions of the wireless LAN router.

SSID

SSID: ▊▊▊▊▊▊▊▊
Security key: ▊▊▊▊▊▊▊▊

3 Press the I/⏻ button to turn the system on.

STANDBY indicator   I/⏻ button   Display window
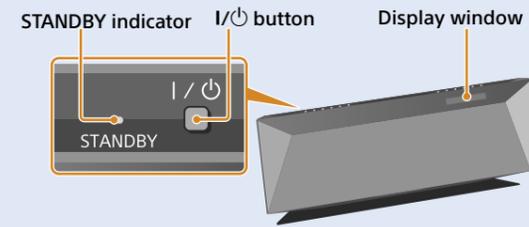

STANDBY

4 Check that the STANDBY indicator lit in red turns off and that 📶 starts flashing in the display window.

It may take several minutes until 📶 starts flashing.
Once you see the indicator start flashing, perform setup by using the smartphone application "NS Setup."

For a user of Xperia ➡ Setup in Xperia
For a user of iPhone ➡ Setup in iPhone

Setup in Xperia

① Download the free application "NS Setup" from "Google Play."

For downloading by 2D Code

② Perform setup by using the application "NS Setup."

Tap [NS Setup].

Tap [Let's get started].

The system is preparing for the wireless setting. Wait several minutes until the next display appears.

Select the SSID you had in step 2.

Enter the Security key you had in step 2.

The system is checking whether or not the setup has been performed properly. Wait several minutes until the next display appears.
If Ⓐ in "Troubleshooting" below appears, follow its instructions.

Tap [Play test sound] to confirm operation of the system by playing the test sound.

Playing music stored in Xperia

① Launch 🔵 ([WALKMAN] application).
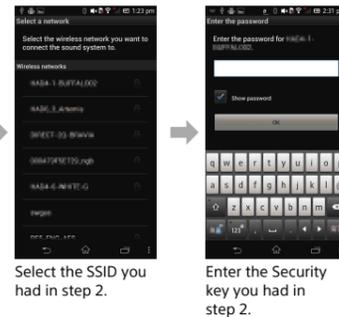

② Tap the 📱 icon and select [SONY:CMT-BT80W(B)XXXXXX] to play music.

"NETWORK" appears on the display window of the system during music play.

Setup in iPhone

① Download the free application "NS Setup" from "Apple Store."

For downloading by 2D Code

② Perform setup by using the application [NS Setup].

Tap [Settings].

Tap [Wi-Fi].

Tap [Sony_Wireless_...][1] to add a checkmark then return to the home display.

Tap [NS Setup].

Tap [Let's Get Started].

The system is preparing for the wireless setting. Wait several minutes until the next display appears.
If Ⓒ in "Troubleshooting" below appears, follow its instructions.

Select the SSID you had in step 2.[2]

Enter the Security key you had in step 2.

The system is checking whether or not the setup has been performed properly. Wait several minutes until the next display appears.
If Ⓑ or Ⓓ in "Troubleshooting" below appears, follow its instructions.

Tap [Play Test Sound] to confirm operation of the system by playing the test sound.

Playing music stored in iPhone

① Launch 🎵 ([Music] application).

② Tap the 📱 icon and select [SONY:CMT-BT80W(B)XXXXXX] to play music.
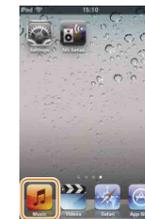

"AirPlay" appears on the display window of the system during music play.

*1 It may take several minutes until [Sony_Wireless Audio_Setup] appears. If it does not appear, reset the system by following "To reset the system" in "Troubleshooting."   *2 If the SSID does not appear, tap the icon at the upper right to update the display.

Troubleshooting

The displays below may appear during setup. In these cases, follow their instructions.

Ⓐ

Ⓑ
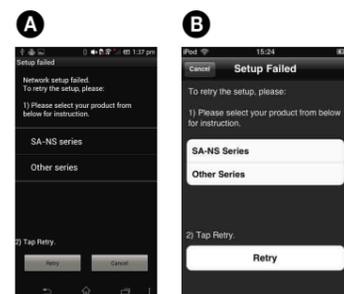

If Ⓐ or Ⓑ appears, reset the system by following the steps in "To reset the system." Then perform the setup operations again from the first step of ② in "Setup in Xperia" or "Setup in iPhone."

Ⓒ

If Ⓒ appears, perform the setup operations again from the first step of ② in "Setup in iPhone."

Ⓓ

If Ⓓ appears, operate by following the instructions on the display.

If the setup does not become successful after that or if "NO CONNECT" appears in the display window of the system, reset the system by following the steps in "To reset the system."

To reset the system

Reset the system as follows.
Also, If "Sony_Wireless_Audio_Setup" is not displayed during setup of iPhone, reset the system.

1 Disconnect the power cord from the wall outlet and make sure that the STANDBY indicator does not light. Then reconnect the power cord and turn the system on.

2 Hold the ■ (stop) and I/⏻ buttons of the system pressed until "ALLRESET" appears.
