Connecting with a TV and other devices

Is the HDMI IN jack on your TV labeled "ARC"?

1. Connect devices such as a Blu-ray Disc player, cable box, or satellite box to any of the HDMI IN jacks (HDMI1/2/3) on the Bar Speaker. When devices such as a Blu-ray Disc player, cable box, or satellite box are currently connected to a TV, disconnect them from the TV and then connect them to the Bar Speaker to reproduce the high quality surround sound of Dolby TrueHD, DTS-HD, DTS.

To enjoy images in 4K/60p, usage of the Premium High Speed HDMI cable(s) with Ethernet is recommended. For details, refer to “Supported Input Video Formats” in the Operating Instructions (separate document).

2. Connect a TV to the HDMI OUT jack on the Bar Speaker. If the TV is not compatible with ARC, also connect the TV to the TV IN OPTICAL jack on the Bar Speaker.

Tip
- The Standby Through function allows you to output HDMI signals to the TV even when the system is in standby mode.

Set the settings as follows; Press HOME - [Setup] - [System Settings] - [HDMI Settings] - [Standby Through], then select [Auto] or [On].

- To enjoy copyright-protected 4K content, refer to “Connection for Viewing Copyright-protected 4K Content” in the Operating Instructions (separate document).

Note
- Make sure that the cables are firmly inserted.

Setting up the remote control

1. Locating the installation position

2. To mount the Bar Speaker on a wall

Refer to “Mounting the Unit on a Wall” in the Operating Instructions (separate document).

3. To attach the grille frame

Refer to “Attaching the Grille Frame” in the Operating Instructions (separate document).

About the operation method of the system

Connect the system to the TV with the HDMI cable (supplied) to display the operation screen of the system on the TV.
Performing Easy Setup

1. Press HOME on the remote control of this system. The Easy Setup screen is displayed on the TV screen. If the Easy Setup screen does not appear, use the remote control of the TV to switch the TV input settings to the HDMI input jack that connects the TV to the system.
2. Press \[\text{HOME}\] to select an item as instructed on the TV screen, and then press \[\text{HOME}\] to perform Easy Setup.
3. Once Easy Initial Settings are complete, select [Finish].

Tips
- Instructions (separate document).
- For details on the network connection, refer to “Enjoying with the Network Function” in the Operating Instructions (separate document).
- Connect the AC power cords (mains leads) of the TV, Bar Speaker, and subwoofer.
- Turn on the TV. If the Easy Setup screen does not appear, use \[\text{INPUT} +/–\] on the remote control to switch the TV input from the television broadcast channel to the input connected to the system.
- Turn on the system. If the Easy Setup screen does not appear, press \([\text{INPUT} +/–]\) on the supplied remote control until “TV” appears in the front panel display.
- Adjust the volume. Adjust the volume of the subwoofer by pressing \([\text{SW} +/–]\) on the remote control of the system.
- Confirm that the power indicator of the subwoofer is lit in green. If not, refer to “Subwoofer” of “Troubleshooting” in the Operating Instructions (separate document).
- Connect the AC power cords (mains leads) of the Bar Speaker and subwoofer.
- Turn on the connected device.

Listening to the sound

To enjoy an input device other than the TV
1. Press \[\text{HOME}\] to select the desired input on the home menu. For details, refer to “About the Home Menu” in the Operating Instructions (separate document).

Listening to the audio of the TV
1. Select the desired program using the remote control of the TV. The menus change to the television broadcast screen and the TV audio is output from the system.
2. If the TV audio is not output from the system, press \([\text{INPUT} +/–]\) of the supplied remote control until “TV” appears in the front panel display.
3. Adjust the volume. Adjust the volume of the subwoofer by pressing \([\text{SW} +/–]\) on the remote control of the system.
4. For details on the sound quality adjustment, refer to “Selecting the Sound Effect” in the Operating Instructions (separate document).

Troubleshooting

No TV sound is output from the system, or no picture is displayed on the TV
- Press \([\text{INPUT} +/–]\) on the remote control of the system repeatedly until the input connecting the desired device appears on the front panel display of the system.
- When the Bar Speaker is connected to an HDMI cable, enable the control for HDMI function on the TV. For details, refer to the operating instructions supplied with the TV. For more information about the control for HDMI function, refer to the Operating Instructions (separate document).
- Check the sound setting of the TV. When the TV is set to output the sound from the TV speakers, the system will not output the sound from the external speakers.

If the TV remote control does not work
- When the Bar Speaker or subwoofer is not set to work with the TV remote control, the system will not output the sound from the TV speakers. In this case, connect the Bar Speaker or subwoofer to the system, then turn on the system.
- If the TV and the system are connected via an HDMI cable, enable the control for HDMI function on the TV. For details, refer to the operating instructions supplied with the TV. For more information about the control for HDMI function, refer to the Operating Instructions (separate document).
- Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Disconnect the AC power cords of the TV and the system from the AC outlets (mains), then connect them again.
- Make sure that the input and output of the HDMI jack of the system are correct. Make sure that the input and output of the HDMI jack of the TV are correct.
- When the Bar Speaker or subwoofer is connected to an HDMI cable, enable the control for HDMI function on the TV. For details, refer to the operating instructions supplied with the TV. For more information about the control for HDMI function, refer to the Operating Instructions (separate document).

No picture or sound of the device connected to the system is output
- If the sound of the TV does not output from the system, press \([\text{INPUT} +/–]\) of the supplied remote control until “TV” appears in the front panel display of the system.
- When the TV sound is not output from the system, press \([\text{SW} +/–]\) on the remote control of the system.
- If the TV sound is not output from the system, check the volume setting of the system. If the volume is set too low, the sound may not be output.

The TV remote control does not work
- When the Bar Speaker or subwoofer is not set to work with the TV remote control, the system will not output the sound from the TV speakers. In this case, connect the Bar Speaker or subwoofer to the system, then turn on the system.
- If the TV and the system are connected via an HDMI cable, enable the control for HDMI function on the TV. For details, refer to the operating instructions supplied with the TV. For more information about the control for HDMI function, refer to the Operating Instructions (separate document).

No sound or only a very low-level sound is heard from the subwoofer
- Press \([\text{SW} +/–]\) on the remote control of the system repeatedly until the input connecting the desired device appears on the front panel display of the system.
- Check the volume setting of the system. If the volume is set too low, the sound may not be output.

Refer to “Troubleshooting” in the Operating Instructions (separate document).

SongPalLink

Have more fun with additional Sony wireless speakers (not supplied). Please refer to the Operating Instructions (separate document) for SongPalLink features.
