Digital 4K Video Camera Recorder

Operating Guide

“Help Guide” (Web manual)
Refer to “Help Guide” for in-depth instructions on the many functions of the camera.

http://rd1.sony.net/help/cam/1630/h_zz/
Read this first

Before operating the unit, please read this manual thoroughly, and retain it for future reference.

Owner’s Record
The model and serial numbers are located on the bottom. Record the serial number in the space provided below. Refer to these numbers whenever you call your Sony dealer regarding this product.

Model No. FDR- ___________________
Serial No. _________________________

WARNING

To reduce the risk of fire or electric shock, 
1) do not expose the unit to rain or moisture. 
2) do not place objects filled with liquids, such as vases, on the apparatus.

Do not expose the batteries to excessive heat such as sunshine, fire or the like.

IMPORTANT SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS. 
DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.

• Read these instructions.
• Keep these instructions.
• Heed all warnings.
• Follow all instructions.
• Do not use this apparatus near water.
• Clean only with dry cloth.
• Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
• Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
• Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician.
for replacement of the obsolete outlet.

- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

Unplug this apparatus during lightning storms or when unused for long periods of time.

- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- If the shape of the plug does not fit the power outlet, use an attachment plug adaptor of the proper configuration for the power outlet.
Representative plug of power supply cord of countries/regions around the world.

A Type (American Type)  B Type (British Type)  BF Type (British Type)  B3 Type (British Type)  C Type (CEE Type)  SE Type (CEE Type)  O Type (Ocean Type)

The representative supply voltage and plug type are described in this chart. Depend on an area, Different type of plug and supply voltage are used. Attention: Power cord meeting demands from each country shall be used.

- For only the United States
  Use a supplied power cord.

For supplied accessories
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAN ICES-3 B/NMB-3 B

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption ratio (SAR).

For Customers in the U.S.A.
If you have any questions about this product, you may call:
Sony Customer Information Center
1-800-222-SONY (7669).
The number below is for the FCC related matters only.

Regulatory Information

Declaration of Conformity
Trade Name: SONY
Model No.: FDR-AX53
Responsible Party: Sony Electronics Inc.
Address: 16535 Via Esprillo, San Diego, CA 92127 U.S.A.
Telephone No.: 858-942-2230

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.

CAUTION
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

Note:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will
not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The supplied interface cable must be used with the equipment in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

For Customers in Canada

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Manufacturer: Sony Corporation, 1-7-1 Konan Minato-ku Tokyo, 108-0075 Japan
Disposal of waste batteries and electrical and electronic equipment (applicable in the European Union and other European countries with separate collection systems)

This symbol on the product, the battery or on the packaging indicates that the product and the battery shall not be treated as household waste. On certain batteries this symbol might be used in combination with a chemical symbol. The chemical symbols for mercury (Hg) or lead (Pb) are added if the battery contains more than 0.0005% mercury or 0.004% lead. By ensuring these products and batteries are disposed of correctly, you will help prevent potentially negative consequences for the environment and human health which could otherwise be caused by inappropriate waste handling. The recycling of the materials will help to conserve natural resources.

In case of products that for safety, performance or data integrity reasons require a permanent connection with an incorporated battery, this battery should be replaced by qualified service staff only. To ensure that the battery and the electrical and electronic equipment will be treated properly, hand over these products at end-of-life to the applicable collection point for the recycling of electrical and electronic equipment. For all other batteries, please view the section on how to remove the battery from the product safely. Hand the battery over to the applicable collection point for the recycling of waste batteries. For more detailed information about recycling of this product or battery, please contact your local Civic Office, your household waste disposal service or the shop where you purchased the product or battery.

Selecting the recording format for movies

The camcorder is compatible with the XAVC S format.

What is XAVC S?

XAVC S is a recording format that allows high-resolution images, such as 4K, to be highly compressed with MPEG-4 AVC/H.264 and recorded in the MP4 file format. High image quality will be obtained while keeping the data size within a certain level.

- See the following website for the latest storage environment. http://www.sony.net/
- You can store images by connecting to a recorder with an analog AV cable (sold separately). Movies are copied with standard definition image quality (page 36).
- You can directly copy images to an external media device with the VMC-UAM2 USB Adaptor Cable (sold separately).

#### To transfer images to a smartphone

You can transfer MP4 images to a smartphone connected to the camcorder via Wi-Fi (page 37). MP4 format is good for uploading to the Internet. When [Dual Video REC] is set to [On], the camcorder records movies in XAVC S 4K format, XAVC S HD format, or AVCHD format while recording movies in MP4 format at the same time.
Supplied items
The numbers in ( ) indicate the supplied quantity.

All models
• Camcorder (1)
• AC Adaptor (1)
• Power cord (mains lead) (1)
• Micro USB cable (1)
• HDMI cable (1)
• “Operating Guide” (This manual) (1)
• Rechargeable battery pack NP-FV70 (1)
Charging the battery pack

1 Turn off your camcorder by closing the LCD monitor, retract the viewfinder*, and attach the battery pack.

2 Connect the AC Adaptor and the power cord (mains lead) to your camcorder and the wall outlet (wall socket).

* Align the ▲ mark on the DC plug with that on the DC IN jack.
• The POWER/CHG (charge) lamp turns orange.
• The POWER/CHG (charge) lamp turns off when the battery pack is fully charged. Disconnect the AC Adaptor from the DC IN jack of the camcorder.
### Charging the battery using your computer

Turn off your camcorder and connect the Multi/Micro USB Terminal of the camcorder (page 52) to the USB jack of a computer using the micro USB cable.

- Change the setting of your computer so that it would not enter the sleep (hibernation) state before charging your camcorder.

### Estimated time of charging the supplied battery pack (minutes)

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>AC Adaptor (supplied)</th>
<th>Computer</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP-FV70</td>
<td>205</td>
<td>555</td>
</tr>
</tbody>
</table>

- The charging times are measured when charging an empty battery pack to its full capacity at a room temperature of 25 °C (77 °F).

### Estimated time of recording and playback using the supplied battery pack (minutes)

<table>
<thead>
<tr>
<th>Battery pack</th>
<th>Recording time</th>
<th>Playback time</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Continuous</td>
<td>Typical</td>
</tr>
<tr>
<td>NP-FV70</td>
<td>150</td>
<td>75</td>
</tr>
</tbody>
</table>

- The recording and playback times are measured when using the camcorder at 25 °C (77 °F).
- The recording times are measured when recording movies with the default settings ([File Format]: [4K] XAVC S 4K), [REC Mode]: [60Mbps 60], [Dual Video REC]: [Off]).
- Typical recording time shows the time when you repeat recording start/stop, switching the [Shooting Mode], and zooming.
- The recording time shows the time when recording with the LCD monitor open.

### To use your camcorder connected to the wall outlet (wall socket)

Connect the camcorder to the wall outlet (wall socket) in the same way as “Charging the battery pack.”
To remove the battery pack
Turn off your camcorder. Slide the BATT (battery) release lever (①) and remove the battery pack (②).

To charge the battery pack abroad
You can charge the battery pack in any countries/regions using the AC Adaptor supplied with your camcorder within the AC 100 V - 240 V, 50 Hz/60 Hz range.
- Do not use an electronic voltage transformer.
Turning the power on

1 Open the LCD monitor of your camcorder and turn the power on.

• You can also turn on the camcorder by pulling out the viewfinder (models with the viewfinder (FDR-AX53/AX55/AXP55) only).

2 Following the instructions on the LCD monitor, select the language, the geographical area, Daylight Savings or Summer Time, date format, and the date and time.

• To go to the next page, touch [Next].

• To turn off the power, close the LCD monitor. If the viewfinder is pulled out, retract it (models with the viewfinder (FDR-AX53/AX55/AXP55) only).

• To set the date and time again, select MENU → [Setup] → [ Clock Settings] → [Date & Time Setting]. (In case you haven’t used your camcorder for several months)

• To turn off the operating sound, select MENU → [Setup] → [ General Settings] → [Beep] → [Off].
Inserting a memory card

1 Open the cover, and insert the memory card until it clicks.

- The [Preparing image database file. Please wait.] screen appears if you insert a new memory card. Wait until the screen disappears.

- To select a memory card as the recording medium, select [Setup] → [Media Settings] → [Media Select] → [Memory Card] (FDR-AX40/AX55/AXP55).

- To eject the memory card, open the cover and lightly push the memory card in once.

Types of memory card you can use with your camcorder

Select the type of memory card to use with the camcorder referring to the following table.

*¹ SD speed class 4: **class**[4] or faster, or UHS speed class 1: [] or faster

*² Memory cards that meet the following conditions
- Capacity of 4 GB or more
- SD speed class 10: **class**[10], or UHS speed class 1: [] or faster
- When recording in 100 Mbps or faster, UHS speed class 3: [3] is required.

### Notes

- The movies recorded will be divided into files of 4GB when a SDHC memory card is used to record XAVC S movies over extended periods of time. The divided files will be played back continuously when played back on the camcorder. The divided files can be integrated into the single file by using PlayMemories Home.
- Proper operation with all memory cards is not guaranteed. Contact the manufacturer of each memory card for the compatibility of memory cards other than Sony.
- When using a Memory Stick Micro or microSD memory card with the camcorder, be sure to use it by inserting it into the dedicated adaptor.
- Movies saved on SDXC memory cards cannot be imported to or played back on computers or AV devices not supporting the exFAT(*) file system by connecting this product to these devices with the micro USB cable. Confirm in advance that the connecting equipment is supporting the exFAT system. If you connect equipment not supporting the exFAT system and a message that prompts you to perform formatting appears, do not perform the formatting. All the data saved will be lost.
- * The exFAT is a file system that is used for SDXC memory cards.
To format the recording media

- To ensure stable operation of the memory card, it is recommended to format the memory card with your camcorder before the first use.
- To format the memory card, select [MENU] → [Setup] → [Media Settings] → [Format] → desired recording medium → [OK].
- Formatting the memory card will erase all the data stored on it and the data will be irrecoverable. Save your important data on your PC, etc.
Recording

Recording movies

1. Open the LCD monitor, and press START/STOP to start recording.

- To stop recording, press START/STOP again.
- Items on the LCD monitor disappear if you do not operate the camcorder for a few seconds. To display items again, touch anywhere except the buttons on the LCD monitor.

Notes

- While recording movies in the XAVC S 4K 100Mbps or XAVC S 4K 60Mbps format, video signals (HDMI output signal/AV cable output signal) are not output to external media.

To record MP4 movies simultaneously (Dual Video REC)

When [Dual Video REC] is set to [On], the camcorder records movies in MP4 format while recording movies in XAVC S 4K format, XAVC S HD format, or AVCHD format at the same time.

Select [MENU] → [Image Quality/Size] → [Dual Video REC] → desired setting.

- MP4 format is easy for playing back your movies on a smartphone, for uploading to a network, or for uploading to the Web.
Recording photos during movie recording (Dual Capture)

You can record photos during movie recording by pressing PHOTO.

Notes

- You may not be able to shoot photos depending on the setting in [REC Mode] and [Frame Rate].
- You cannot specify the storage destination (internal memory/memory card) of photos and movies separately (FDR-AX40/AX55/AXP55).

To suppresses the voice of the person recording the movie (My Voice Canceling)

Press (My Voice Canceling) (page 53). The voice of the person recording the movie will be suppressed.

Approximate recording time available

<table>
<thead>
<tr>
<th>Movie format</th>
<th>Internal memory*1</th>
<th>Memory card*2</th>
</tr>
</thead>
<tbody>
<tr>
<td>XAVC S 4K</td>
<td>2 h. 10 min.</td>
<td>64 GB: 2 h. 05 min.*3</td>
</tr>
<tr>
<td>XAVC S HD</td>
<td>2 h. 35 min.</td>
<td>64 GB: 2 h. 35 min.*4</td>
</tr>
<tr>
<td>AVCHD</td>
<td>8 h. 15 min.</td>
<td>16 GB: 2 h. 00 min.*5</td>
</tr>
</tbody>
</table>

*1 If you want to record up to the maximum recording time, you need to delete the demonstration movie on this product (FDR-AX40/AX55/AXP55).

*2 When using a Sony memory card.

*3 When recording with using the default setting:
   - [File Format]: [4K XAVC S 4K], [REC Mode]: [60Mbps 60], [Dual Video REC]: [Off]

*4 Approximate recording time when recording with the following setting:
   - [File Format]: [HD XAVC S HD], [Frame Rate]: [60p]

*5 Approximate recording time when recording with the following setting:
   - [File format]: [HD AVCHD], [REC Mode]: [High Quality FH]

- The actual recording time or number of recordable photos is displayed on the LCD monitor during recording.
Shooting photos

1. Open the LCD monitor and select [MODE] → (Photo).

   • You can also switch between (Movie) and (Photo) by pressing the / (Shooting Mode) button (FDR-AX53/AX55/AXP55).

2. Press PHOTO lightly to adjust the focus, then press it fully.

   • When the focus is adjusted properly, AE/AF lock indicator appears on the LCD monitor.
Using the manual adjustment features

Assigning a menu item to the MANUAL ring (FDR-AX53/AX55/AXP55)

1 Press and hold MANUAL button (page 53) for a few seconds.
   • The menu items you can control with the MANUAL ring will appear on the [Manual Ring Setting] screen.

2 Rotate the MANUAL ring (page 53) to select the item to be assigned, and then press MANUAL button.

Making the manual adjustment using the MANUAL ring

1 Press the MANUAL button to switch to manual adjustment mode.
2 Rotate the MANUAL ring to make the adjustment.

• To return to automatic adjustment mode, press MANUAL button again.
• When Zoom function is assigned, make the adjustment by only rotating the MANUAL ring.
Playback

1. Open the LCD monitor and press the ▶️ (View Images) button on the camcorder to enter the playback mode.

- The Event View screen appears after some seconds.

2. Select ◀️/▶️ to move the desired event to the center, and then select the part circled (1) in the figure.

*1 The icon varies depending on the [File Format] setting (page 28).
*2 Highlight Movie Maker will be displayed when Movie format is set to AVCHD.

- Photos and movies are stored in the same recording medium (internal memory/memory card). (FDR-AX40/AX55/AXP55)
- To select the XAVC S movies or AVCHD movies you want to play, edit, or copy to other devices, select MENU → [Image Quality/Size] → [File Format].
- You can play movies of the selected frame rate only in the case of XAVC S 4K movies. Select the frame rate according to the movies you want to play.
3 Select the image.

To switch between movies and photos (Visual index)
Select the desired type of images.

Playback operations

- Volume
- Previous/Next
- Delete
- Fast-forward/Fast-reverse
- Context
- Play/Pause
- Stop
- Play/Stop slide show
- Motion Shot Video
- Motion Interval ADJ
To delete the images

1. Select [Menu] → [Image Quality/Size] → [File Format] → format of images to be deleted.
   - The available format varies depending on the [File Format] setting.
2. Select [Edit/Copy] → [Delete] → [Multiple Images] → image type to be deleted.
3. Touch and display the ✔ mark on the images to be deleted, then select [OK].

Switching to MP4

1. Select “Switch Movie Format button.”

   Switch Movie Format button

   - The Movie Format Select screen appears.
2. Select the format of the movie.

To copy the images from the internal memory to a memory card (FDR-AX40/AX55/AXP55)

1. Select [Menu] → [Edit/Copy] → [Copy] → [Int. Memory → Memory card] → [Multiple Images].
2. Select the image type to be copied.
3. Touch and display the ✔ mark on the images to be copied, then select [OK].
4. Select [OK].

Notes

- XAVC S movies saved on the internal memory cannot be copied to SDHC memory cards or external media devices with the FAT file system.
Viewing images on a TV

Playing back images

Playable images may be restricted depending on the combination of the movie format at the time of recording, the type of playback images selected on the Event View screen, and the HDMI output settings.

1 Connect the HDMI OUT jack of the camcorder to the HDMI IN jack of a TV using the HDMI cable supplied.

2 Set the input of TV to HDMI IN.

3 Play back images on the camcorder.
**How to set the playback images**

<table>
<thead>
<tr>
<th>Movie format</th>
<th>TV</th>
<th>[HDMI Resolution]</th>
<th>Visual index (page 27)</th>
<th>Playback image quality</th>
</tr>
</thead>
<tbody>
<tr>

<td>MOVIE PHOTO MOVIE/PHOTO</td>
<td>High definition image quality (HD)</td>
</tr>
</tbody>
</table>

* The resolution will be the HDMI Resolution set on your camcorder.
* Images will be played when [HDMI Resolution] is set to [Auto] (default setting).
* If images are not played properly with [Auto], change the [HDMI Resolution] setting. Select **MENU** → [Setup] → [Connection] → [HDMI Resolution] → desired setting.
* If your TV does not have an HDMI jack, connect the Multi/Micro USB Terminal of the camcorder to the video/audio input jacks of the TV using an AV cable (sold separately).
Connecting the camcorder to a network-compatible TV

Connect the camcorder to an access point with a security setting (page 41). Press (View Images) on the camcorder, and then select MENU → [Wireless] → [Function] → [View on TV] → image type to be played back.
• You can view AVCHD movies, MP4 movies, and photos only.

Playing back trimmed movies (Trimming Playback) recorded in XAVC S 4K format

You can play back the movies recorded in XAVC S 4K file format while magnifying and trimming the part you want to watch, and also while zooming the scene up to the full high definition image quality.

1 Change the HDMI output setting to output 4K movies.
   Select MENU → [Setup] → [Connection] → [HDMI Resolution] → desired setting.

2 Connect the HDMI OUT jack of the camcorder to the HDMI IN jack of a TV using the HDMI cable supplied.

Signal flow
Playback of trimmed movies is not available on the LCD monitor of the camcorder.

<table>
<thead>
<tr>
<th>TV</th>
<th>[HDMI Resolution]</th>
</tr>
</thead>
<tbody>
<tr>
<td>4K TV</td>
<td>[Auto]<em>, [2160p/1080p]</em>, [1080p], [1080i], [720p]</td>
</tr>
<tr>
<td>High definition TV</td>
<td>[Auto], [1080p], [1080i], [720p]</td>
</tr>
</tbody>
</table>

* The screen turns blank for a few seconds when you turn on or off the trimmed movie playback function.

3 Touch \( \boxed{\text{ON}} \) (trimming on) on the LCD monitor during playback, and then select the part to be trimmed by touching there.
   • The playback image is trimmed in high definition image quality (HD).

**Notes**

• Playback of trimmed movies is not available on the LCD monitor of the camcorder.
Viewing images using the built-in projector (FDR-AXP55)

1 Press the PROJECTOR button (page 53).

2 Select [Image Shot on This Device].

3 Follow the operating guide on the LCD monitor, and then select [Project].

*1 Adjust the focus of the projected image.

*2 Use the power zoom lever to move the selection frame that appears on the projected image, then press the PHOTO button.

Using the built-in projector with a computer/smartphone

① Connect the PROJECTOR IN jack (page 53) of this product and the HDMI output terminal of the device you wish to connect by using an HDMI cable (supplied).

- Use a commercially available plug adapter if the HDMI cable (supplied) does not fit with the terminal of the device you wish to connect to. For details, refer to the instruction manuals of the device you wish to connect to.

② Select [Image from External Device] in the Step 2 above.
Importing images to your computer

What you can do with PlayMemories Home™

PlayMemories Home allows you to import movies and photos to your computer to use them in a variety of ways.

- Update PlayMemories Home to the latest version before using.

Import images from the camcorder.

For Windows, the following functions are also available.

- Viewing images on Calendar
- Creating movie discs
- Uploading images to network services
- Sharing images on PlayMemories Online™
- Playing back imported images

To download PlayMemories Home

PlayMemories Home can be downloaded from the following URL.
http://www.sony.net/pm/

To check the computer system

You can check the computer requirements for the software at the following URL.
http://www.sony.net/pcenv/
Saving images on an external media device

How to store movies and photos to an external media device is explained here. Also refer to the instruction manual supplied with the external media device. Store movies to a computer using PlayMemories Home software (page 34).

How to store movies

<table>
<thead>
<tr>
<th>Device</th>
<th>Cable</th>
<th>Image quality/ Recording format</th>
<th>Media</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recorder without a USB jack</td>
<td>AV cable (sold separately)</td>

<td>External media</td>
</tr>
<tr>
<td>Computer</td>
<td>Micro USB cable</td>
<td>4K/High definition image quality (HD)</td>
<td>Computer and connected external media</td>
</tr>
</tbody>
</table>

- See the following website for the latest storage environment.
  http://www.sony.net/
- You can store images by connecting to a recorder with an analog AV cable (sold separately). Movies are copied with standard definition image quality (page 36).
- You can directly copy images to an external media device with the VMC-UAM2 USB Adaptor Cable (sold separately).
How to connect a device

Recorder without a USB jack
Connect a recorder to the Multi/Micro USB Terminal of your camcorder using an AV cable (sold separately).

 Signal flow
- For how to save images, also refer to the instruction manual of your recording device.
- Movies are copied with standard definition image quality.

USB external hard disk
Connect an external media device to the Multi/Micro USB Terminal of your camcorder using VMC-UAM2 USB Adaptor Cable (sold separately).

 Signal flow
- Movies are copied with 4K/high definition image quality (HD).
Using the Wi-Fi function

Installing PlayMemories Mobile™ on your smartphone

For the latest information and more detailed information on the functions of PlayMemories Mobile, visit the following URL.

http://www.sony.net/pmm/

Android OS
Install PlayMemories Mobile from Google Play.

- Android 4.0 or higher is required to use One-Touch functions (NFC).

iOS
Install PlayMemories Mobile from App Store.

- One-touch functions (NFC) are not available with iOS.

Notes
- You may not be able to download PlayMemories Mobile from Google Play or App Store depending on the country or the region. In that case, search for “PlayMemories Mobile”.
- If PlayMemories Mobile is already installed in your smartphone, update the software to the latest version.
- The Wi-Fi function described here is not guaranteed to work on all smartphones and tablets.
- The Wi-Fi function of the camcorder cannot be used connected to a public wireless LAN.
- To use the One-touch functions (NFC) of the camcorder, a smartphone or tablet supporting the NFC function is required.
- The operation methods and display screens for the application are subject to change without notice by future upgrades.
Transferring MP4 movies and photos to your smartphone

One-touch connection with an Android supporting NFC

1 On the smartphone, select [Settings], then, select [More...] to check that [NFC] is enabled.

2 On the camcorder, play back an image to be sent to the smartphone.
   - You can transfer MP4 movies and photos only.
   - To select MP4 movies when you play back movies, see “Switching to MP4” (page 28).

3 Touch the camcorder to the smartphone.

Notes

- Cancel the sleep mode or unlock the screen on the smartphone beforehand.
- Make sure that N is displayed on the LCD monitor of the camcorder and the smartphone.
- Continue touching the camcorder to the smartphone without moving until PlayMemories Mobile starts (1 to 2 seconds).
- If the camcorder cannot be connected with the smartphone by NFC, see “Connecting to a Wi-Fi network using the QR Code” (page 38).

Connecting to a Wi-Fi network using the QR Code

1 Press the (View Images) button, then select MENU → [Wireless] → [Function] → [Send to Smartphone] → [Select on This Device] → image type.
2 Select the image you want to transfer, and add ✔, and then select [OK] → [OK].
   • The QR Code, SSID, and password are displayed.

3 Start up PlayMemories Mobile.

4 Select [Scan QR Code of the Camera] from the screen of PlayMemories Mobile.

5 Select [OK]. (If a message appears, select [OK] again.)

6 With your smartphone, read the QR Code displayed on the LCD monitor of the camcorder.
   **Android**
   Perform the following operations.
   ⑤ When [Connect with the camera?] is displayed, select [Connect].

   **iPhone/iPad**
   Perform the following operations.
   ⑤ Follow the on-screen instruction and install the profile (setting information).
Once the QR Code has read and the connection has been successfully established, the SSID (DIRECT-xxxx) and the password of the camcorder will be registered onto your smartphone. The subsequent Wi-Fi connection between the camcorder and your smartphone will only require selecting the SSID of the camcorder registered on your smartphone.

If the camcorder cannot be connected with the smartphone by NFC and by reading the QR code, connect by using the SSID and the password. For more details, refer to “Help Guide”.

Using your smartphone as a wireless remote commander

You can record with the camcorder using your smartphone as a wireless remote commander.

1. On your camcorder, select [MENU] → [Wireless] → [Function] → [Ctrl with Smartphone].

2. On your smartphone, perform in the same way as in step 6 in “Connecting to a Wi-Fi network using the QR Code” (page 38). When you use NFC, display the recording screen on your camcorder, and touch on the camcorder to on the smartphone.

3. Operate the camcorder on your smartphone.

Notes

- Depending on local electrical interference or the smartphone’s capabilities, the live view images may not be displayed smoothly.
Saving movies and photos to your computer via Wi-Fi

Connect your computer to a wireless access point or wireless broadband router in advance.

1 Install the dedicated software in your computer (first time only).
   Windows: PlayMemories Home http://www.sony.net/pm/
   Mac: Wireless Auto Import http://www.sony.co.jp/imsoft/
   • If the software is already installed in your computer, update the software to the latest version.

2 Connect your camcorder to an access point as follows (first time only).
   If you cannot register, refer to the instruction of the access point, or contact the person who set up the access point.

   If the wireless access point has a WPS button
   ① On your camcorder, select [Wireless] → [Setting] → [WPS Push].
   ② Press the WPS button on the access point you want to register.

If you know the SSID and the password of your wireless access point

   ① On your camcorder, select [Wireless] → [Setting] → [Access point settings].
   ② Select the access point you want to register, enter the password, then select [Next].

3 If your computer is not started, turn on the computer.

4 Start sending images from the camcorder to the computer.
   ① Press the (View Images) button on your camcorder.
   ② Select [Wireless] → [Function] → [Send to Computer].
   • Images are automatically transferred to and saved on the computer.
   • Only newly recorded images are transferred. Importing movies and multiple photos may take time.
Using the menus

1 Select \textbf{MENU}.

2 Select a category.

3 Select a desired menu item.

- Select \textbf{X} to finish setting the menu or to return to the previous menu screen.

Menu lists

Precautions

AC Adaptor
Do not short-circuit the battery terminal with any metallic objects. This may cause a malfunction.

Playing back images with other devices
You may not be able to play back images that were recorded on your camcorder with other devices normally. Also, you may not be able to play back images recorded on other devices with your camcorder.

Recording and playback
• Avoid rough handling, disassembling, modifying, physical shock, or impact such as hammering, dropping or stepping on the product. Be particularly careful with the lens.
• To ensure stable operation of the memory card, it is recommended to format the memory card with your camcorder before the first use. Formatting the memory card will erase all the data stored on it and the data will be irrecoverable. Save your important data on your PC, etc.
• Confirm the direction of the memory card. If you forcibly insert the memory card in the wrong direction, the memory card, memory card slot, or image data may be damaged.
• Before starting to record, test the recording function to make sure the image and sound are recorded without any problems.

• Television programs, films, video tapes, and other materials may be copyrighted. Unauthorized recording of such materials may be a violation of the copyright laws.
• Compensation for the content of recordings cannot be provided, even if recording or playback is not possible due to a malfunction of the camcorder, recording media, etc.
• The camcorder is not dustproofed, dripproofed or waterproofed.
• Do not let your camcorder get wet, for example, from rain or sea water. If your camcorder gets wet, it may malfunction. Sometimes this malfunction cannot be repaired.
• Do not aim the camcorder at the sun or strong light. Doing so may cause your camcorder to malfunction.
• Do not use the camcorder near strong radio waves or radiation. The camcorder may not be able to record or play back images properly.
• Do not use the camcorder on a sandy beach or anywhere dusty. Doing so may cause your camcorder to malfunction.
• If moisture condensation occurs, stop using the camcorder until moisture evaporates.
• Do not subject the camcorder to mechanical shock or vibration. If you do so, the camcorder may operate incorrectly or may not record images. In addition, the recording medium or recorded data may be damaged.
LCD monitor
The LCD monitor is manufactured using extremely high-precision technology, so over 99.99% of the pixels are operational for effective use. However, there may be some tiny black points and/or bright points (white, red, blue, or green in color) that appear constantly on the LCD monitor. These points are normal results of the manufacturing process and do not affect the recording in any way.

Camcorder temperature
The camcorder and battery pack become warm during operation. This is not a malfunction.

Overheat protection
Depending on the camcorder and battery temperature, you may be unable to record movies or the power may turn off automatically to protect the camcorder. A message will be displayed on the LCD monitor before the power turns off or you can no longer record movies. In this case, leave the power off and wait until the camcorder and battery temperature goes down. If you turn on the power without letting the camcorder and battery cool enough, the power may turn off again or you may be unable to record movies.

Deactivating wireless LAN (Wi-Fi, NFC, etc.) temporarily
When you board an airplane, you can deactivate the Wi-Fi function temporarily. Select [Wireless] → [Setting] → [Airplane Mode] → [On].

Wireless LAN
We assume no responsibility whatsoever for any damage caused by unauthorized access to, or unauthorized use of, destinations loaded on the camcorder, resulting from loss or theft.

About the security on using Wireless LAN products
- Please ensure that you always use a secured wireless network with your devices to avoid hacking, unapproved third party access and other vulnerabilities.
- It is important to set security when using the wireless network function.
- Sony makes no guarantees and is not responsible for any damage resulting from having inadequate security or using the wireless network function.

Troubleshooting
If you run into any problems using your camcorder:
- Check your camcorder referring to Help Guide (page 11).
- Disconnect the power source, attach the power source again after about 1 minute, and turn the camcorder on.
- Initialize your camcorder (page 44). All settings, including the clock setting, are reset.
- Contact your Sony dealer or local authorized Sony service facility.
Specifications

System
Signal format:
- UHDTV
- HDTV
  NTSC color, EIA standards (1080 60i-compatible models)
  PAL color, CCIR standards (1080 50i-compatible models)
Movie recording format:
- XAVC S (XAVC S format)
  Video: MPEG-4 AVC/H.264
  Audio: MPEG-4 Linear PCM 2ch (48 kHz/16 bit)
  AVCHD (AVCHD format Ver.2.0 compatible)
  Video: MPEG-4 AVC/H.264
  Audio: Dolby Digital 2ch/5.1ch
  Dolby Digital 5.1 Creator*1
  MP4
- AVCHD (AVCHD format Ver.2.0)
  Video: MPEG-4 AVC/H.264
  Audio: Dolby Digital 2ch/5.1ch
  Dolby Digital 5.1 Creator*1
  MP4
- MP4

Photo file format:
- DCF Ver.2.0 Compatible
- Exif Ver.2.3 Compatible
- MPF Baseline Compatible

Viewfinder (FDR-AX53/AX55/AXP55):
- 0.6 cm (0.24 type) Color
- 1 555 200 dots equivalent

Recording media (Movie/Photo):
- Internal memory (FDR-AX40/AX55/AXP55): 64 GB*2
- XAVC S 4K (100Mbps), XAVC S HD High Speed REC (100Mbps)
- Movie:
  SDHC memory card (UHS speed class 3 or faster)*3
  SDXC memory card (UHS speed class 3 or faster)*3
- XAVC S HD, XAVC S 4K (60Mbps), Movie:
  SDHC memory card (Class 10, or UHS speed class 1 or faster)*3
  SDXC memory card (Class 10, or UHS speed class 1 or faster)*3
  microSDHC memory card (Class 10, or UHS speed class 1 or faster)*3
  microSDXC memory card (Class 10, or UHS speed class 1 or faster)*3
  AVCHD, Photo:
  Memory Stick Micro (Mark2)
  Memory Stick PRO-HD Duo
  SD card (Class 4 or faster, or UHS speed class 1 or faster)
  microSD memory card (Class 4 or faster, or UHS speed class 1 or faster)
- *1 Manufactured under license from Dolby Laboratories.
- *2 The capacity that a user can use (Approx.): 62.4 GB
  1 GB equals 1 billion bytes, a portion of which is used for system management and/or application files. Only pre-installed demonstration movie may be deleted.
- *3 Capacity of 4 GB or more is required.
- Image device:
  1/2.5-type (7.20 mm)
  back-illuminated Exmor R™ CMOS sensor
  Recording pixels (photo, 16:9):
  Max. 16.6 mega pixels (5 440 × 3 056)*4
  Gross: Approx. 8.57 mega pixels
  Effective (movie, 16:9)*5:
Approx. 8.29 mega pixels
Effective (photo, 16:9):
Approx. 8.29 mega pixels
Effective (photo, 4:3):
Approx. 6.22 mega pixels

Lens:
ZEISS Vario-Sonnar T* Lens
20× (Optical)*5, 4K: 30× (Clear Image Zoom, while recording movies)*6 HD: 40× (Clear Image Zoom, while recording movies)*6, 250× (Digital)
Filter diameter:
55 mm (2 1/4 in.)
F2.0 - F3.8
Focal length:
f= 4.4 mm - 88 mm (3/16 in. - 3 1/2 in.)
When converted to a 35 mm still camera
For movies*5:
f=26.8 mm - 536 mm
(11/16 in. - 21 1/8 in.) (16:9)
For photos:
f=26.8 mm - 536 mm
(11/16 in. - 21 1/8 in.) (16:9)
Color temperature: [Auto], [One Push], [Indoor], [Outdoor]
Minimum illumination:
4K: 9 lx (lux), HD: 6 lx (lux) (in default setting, shutter speed 1/60 second)
4K: 1.8 lx (lux), HD: 1.2 lx (lux) ([Low Lux] is set to [On], shutter speed 1/30 second)
NightShot (FDR-AX53/AX55/AXP55): 0 lx (lux) (shutter speed 1/60 second)

*4 The unique image processing system of Sony’s BIONZ-X allows still image resolution equivalent to the sizes described.

*5 [SteadyShot] is set to [Standard] or [Off].
*6 [SteadyShot] is set to [Active].

Input/Output connectors
HDMI OUT jack: HDMI micro connector
PROJECTOR IN jack (FDR-AXP55): HDMI micro connector
MIC input jack: Stereo minijack (φ3.5 mm)
Headphone jack: Stereo minijack (φ3.5 mm)
USB jack: Multi/Micro USB Terminal*
* Supports Micro USB compatible devices.
USB connection is only for output (For customers in Europe).

LCD monitor
Picture: 7.5 cm (3.0 type, aspect ratio 16:9)
Total number of pixels:
FDR-AX40:
460 800 (960 × 480)
FDR-AX53/AX55/AXP55:
921 600 (1 440 × 640)

Projector (FDR-AXP55)
Projection type: DLP
Light source: LED (R/G/B)
Focus: Manual
Throw Distance: 0.5 m (1.6 feet) or over
Resolution (output): 854 × 480
Continuous projection time (when using the supplied battery pack): Approx. 2 h. 25 min.

Wireless LAN
Supported standard:
IEEE 802.11 b/g/n
Frequency: 2.4 GHz
Supported security protocols: WEP/WPA-PSK/WPA2-PSK
Configuration method: WPS (Wi-Fi Protected Setup)/manual
Access method: Infrastructure Mode
NFC: NFC Forum Type 3 Tag compliant

**General**

Power requirements:
- DC 6.8 V/7.4V (battery pack),
- DC 8.4 V (AC Adaptor)

USB Charging: DC 5 V 1 500 mA

Average power consumption:
- During camera recording using the viewfinder (FDR-AX53/AX55/AXP55): 4K: 4.9 W, HD: 3.6 W*
- During camera recording using LCD monitor at normal brightness: 4K: 4.9 W, HD: 3.6 W*

* in AVCHD FH mode

Operating temperature: 0 °C to 40 °C (32 °F to 104 °F)
Storage temperature: −20 °C to +60 °C (−4 °F to +140 °F)

Dimensions (approx.):
- FDR-AX40:
  - 73 mm × 80.5 mm × 142.5 mm (2 7/8 in. × 3 1/4 in. × 5 5/8 in.)
  - (w/h/d) including the projecting parts
  - 73 mm × 80.5 mm × 166.5 mm (2 7/8 in. × 3 1/4 in. × 6 5/8 in.)
  - (w/h/d) including the projecting parts, and the supplied rechargeable battery pack
- FDR-AX53/AX55:
  - 73 mm × 80.5 mm × 161.0 mm (2 7/8 in. × 3 1/4 in. × 6 3/8 in.)
  - (w/h/d) including the projecting parts
- FDR-AXP55:
  - 77 mm × 80.5 mm × 161.0 mm (3 1/8 in. × 3 1/4 in. × 6 3/8 in.)
  - (w/h/d) including the projecting parts, and the supplied rechargeable battery pack

Mass (approx.):
- FDR-AX40:
  - 510 g (1 lb 2.0 oz) main unit only
  - 610 g (1 lb 5.5 oz) including the supplied rechargeable battery pack NP-FV70
- FDR-AX53/AX55:
  - 535 g (1 lb 2.9 oz) main unit only
  - 635 g (1 lb 6.4 oz) including the supplied rechargeable battery pack NP-FV70
- FDR-AXP55:
  - 565 g (1 lb 3.9 oz) main unit only
  - 660 g (1 lb 7.3 oz) including the supplied rechargeable battery pack NP-FV70

---

**AC Adaptor AC-L200D**

Power requirements: AC 100 V - 240 V, 50 Hz/60 Hz

Power consumption: 18 W

Output voltage: DC 8.4 V*
* See the label on the AC Adaptor for other specifications.

### Rechargeable battery pack NP-FV70

- Maximum output voltage: DC 8.4 V
- Output voltage: DC 6.8 V
- Maximum charge voltage: DC 8.4 V
- Maximum charge current: 3.0 A
- Capacity
  - Typical: 14.0 Wh (2 060 mAh)
  - Minimum: 13.3 Wh (1 960 mAh)
- Type: Li-ion

We would prefer you do not contact us about the contents of source code.

Copies of the licenses (in English) are stored in the internal memory of this product. Establish a Mass Storage connection between this product and a computer, and read the files in the “LICENSE” folder in “PMHOME.”
Parts and controls

Figures in ( ) are reference pages.

1 PHOTO button (22, 24)
2 Power zoom lever (24)
3 Multi/Micro USB Terminal
   Supports Micro USB compatible devices. This terminal does not support VMC-AVM1 Adaptor Cable (sold separately). You cannot use accessories via an A/V remote connector.
4 (microphone) jack (PLUG IN POWER)
5 Loop for a shoulder belt
6 Grip belt
7 (headphones) jack
8 Multi interface shoe

For details on compatible accessories of the Multi interface shoe, visit the Sony web site in your area, or consult your Sony dealer or local authorized Sony service facility.

Operations with other manufacturer’s accessories are not guaranteed.
If you use a shoe adaptor (sold separately), you can also use accessories compatible with an Active Interface Shoe.
To prevent failure, do not use a commercially available flash with high-voltage synchro terminals or with reverse polarity.

9 N mark (38)
   NFC: Near Field Communication
10 Camera recording lamp
11 Remote sensor
12 NIGHTSHOT light (FDR-AX53/AX55/AXP55)

2 LCD monitor/Touch panel
3 Projector lens (FDR-AXP55)
Built-in microphone
MANUAL ring (FDR-AX53/AX55/AXP55) (25)
Manual functions can be assigned to the button and the dial.
Lens (ZEISS lens)
MANUAL button (FDR-AX53/AX55/AXP55)
Memory card access lamp (19)
Memory card slot (19)
HDMI OUT jack
PROJECTOR IN jack (33) (FDR-AXP55)
Speaker
(Shooting Mode) button (24) (FDR-AX53/AX55/AXP55)
(My Voice Canceling) button
Suppresses the voice of the person recording the movie.
PROJECTOR button (33) (FDR-AXP55)
(View Images) button (26)
NIGHTSHOT button (FDR-AX53/AX55/AXP55)
(ON/STANDBY) button
1 Viewfinder (FDR-AX53/AX55/AXP55)
   The camcorder is turned on when the viewfinder is pulled out.
2 Viewfinder lens adjustment dial (FDR-AX53/AX55/AXP55)
   If the indications in the viewfinder appear blurred, turn the viewfinder lens adjustment dial.
3 START/STOP button (22)
4 POWER/CHG (charge) lamp (15)
5 DC IN jack
6 Tripod receptacle
   Attach a tripod (sold separately: the length of the screw must be less than 5.5 mm (7/32 in.)). Depending on the specifications of the tripod, this product may not attach in the proper direction.
7 BATT (battery) release lever
8 Battery pack (15)
