Connecting the remote control to a camera

This manual describes how to connect the remote control to a single camera. For details about how to connect the remote control to multiple cameras, refer to the "Help Guide" [web manual]. For details about how to operate a camera, refer to the operating instructions of the camera. The following instructions of the camera are described in this manual.

Setting the date and time/area

1. Press the (on/standby) button to turn on the remote control.
2. Press the (on/standby) button. When the remote control is turned on for the first time, the date and time/area setting screen is displayed.
3. Select a camera you want to connect to the remote control, then press the REC/ENTER button.
4. Select the shooting mode.

Shooting

For details on the shooting modes and the camera operations, refer to the "Help Guide" [web manual] or the operating instructions of the camera. 

Still images

• Time-lapse shooting
• Time-lapse capture
• Self-timer
• HDR shooting

Movie

• Time-lapse shooting
• Time-lapse capture

Press the MENU button on the camera, then press the REC/ENTER button of a camera, select [OK], then press the REC/ENTER button of a camera.

The connection to the camera is complete when the LCD screen on the remote control switches to the Live-View screen.

Note

• If the connection to a camera is not completed, the signal lamp may be steady in this case, move to another location and try again.

Switching shooting modes

1. Press the MENU button to select (Shooting mode), then press the REC/ENTER button.
2. Press the UP button or DOWN button to select the shooting mode, then press the REC/ENTER button.

The shooting mode icon will be displayed on the bottom left of the display.

Shooting on shooting movies

For details on the shooting operations, refer to the "Help Guide" [web manual] or the operating instructions of the camera.

Time-lapse capture

When the remote control is turned on for the first time, the date and time/area setting screen will be displayed.

Press the REC/ENTER button in the date & time/area setting confirmation screen to confirm the desired item, then the Wi-Fi standby screen will be displayed.

Tips

• Regions are defined by the time difference between Greenwich Mean Time (GMT) and the standard time of your home (for details on the time difference, refer to "The list of time differences for world capitals" in the "Help Guide" [web manual]).

• When the Wi-Fi function automatically sets the date and time, the Wi-Fi standby screen will be displayed.

• The CHG (Charge) lamp turns off when charging is completed.

Warning of camera’s receiving status of a Wi-Fi signal

After pressing and holding down the Wi-Fi button for about 1 second, the Wi-Fi lamp turns off when charging is completed.

If the connection to a camera is not completed, the signal lamp may be steady in this case, move to another location and try again.

Automatically turning off the LCD screen display while shooting

To reduce the battery consumption, the LCD screen display automatically turns off while shooting.

To set this function to OFF, press the MENU button, then press the UP button or DOWN button to select (Remote control settings) ➔ (Wi-Fi settings) ➔ (Screen display) ➔ (Wi-Fi standby time) ➔ (15M:20M:25M:OFF)

Attaching the remote control to the Mount Adaptor

1. Make sure that the remote control is set into the belt, then remove your fingers from the release lever.

2. The release lever returns to the original position and the remote control is attached to the Mount Adaptor.

Attach the remote control to the belt

1. Align the protruding portion of the remote control with the concave portion of the belt, while pushing the release lever on the rear of the belt toward the opposite side with your fingers.
2. The release lever returns to the original position and the remote control is attached to the belt.

When the remote control is turned on/off along with the power of the remote control

When the remote control is turned on/off, the corresponding camera is also turned on/off.

To set this function to OFF, press the MENU button on the camera, then press the UP button or DOWN button to select (Remote control settings) ➔ (Remote control settings) ➔ (Wi-Fi settings) ➔ (Screen display) ➔ (Wi-Fi standby time) ➔ (15M:20M:25M:OFF)

Attaching the remote control

1. Align the protruding portion of the remote control with the concave portion of the Mount Adaptor while pushing the release lever toward the opposite side with your fingers.
2. The release lever returns to the original position and the remote control is attached to the Mount Adaptor.

Turning the camera on/off along with the power of the remote control

When the remote control is turned on/off, the corresponding camera is also turned on/off.

To set this function to OFF, press the MENU button on the camera, then press the UP button or DOWN button to select (Camera settings) ➔ (Wi-Fi) ➔ (Bluetooth remote controller power setting) ➔ (OFF)

Warning: Do not use the remote control near water or moisture, as it may cause the remote control to malfunction, and in some cases may be irrevocably damaged. The remote control is not completely waterproof. If the remote control is brought directly from a cold to a warm location, or if it is exposed to high humidity, moisture may condense inside or outside the remote control. This may cause the remote control to malfunction. If you have used the remote control near water or with wet or sandy hands, or if your remote control is wet, turn off the remote control and then leave it in a completely dry location for a few days to dry it completely. Do not use the remote control if it becomes wet. If any dirt or sand gets on the terminal section of the remote control, wipe it with a soft cloth. Do not use alcohol, thinner, or benzine for cleaning. Do not disassemble or modify the remote control. Do not leave the remote control in or near fire, or put the remote control in a water-bath. Do not place the product in or near fire, or put the product in a sauna bath. Do not place the product in a hot or humid place such as in a sauna. Do not humidify the product or the remote control. If dirt or sand gets on the terminal section of the remote control, wipe it with a soft cloth. If you have used the remote control near water or with wet or sandy hands, or if your remote control is wet, turn off the remote control and then leave it in a completely dry location for a few days to dry it completely. Do not use the remote control if it becomes wet. If the remote control sinks in water, use the belt supplied with the remote control to retrieve it from the water. You cannot use the Wi-Fi/Bluetooth function of the remote control. Do not place the product in or near fire, or put the product in a sauna bath. Do not place the product in a hot or humid place such as in a sauna. Do not humidify the product or the remote control. If dirt or sand gets on the terminal section of the remote control, wipe it with a soft cloth. If you have used the remote control near water or with wet or sandy hands, or if your remote control is wet, turn off the remote control and then leave it in a completely dry location for a few days to dry it completely. Do not use the remote control if it becomes wet. If the remote control sinks in water, use the belt supplied with the remote control to retrieve it from the water. You cannot use the Wi-Fi/Bluetooth function of the remote control.
