What’s in the box

- Bar Speaker (1)
- Subwoofer (1)
- Remote control (1)
- Guide frame (1)
- HDMI cable (supplied)
- Wall mounting bracket (2), screw (2)
- WALL MOUNT TEMPLATE (1)
- Operating Instructions
- R03 (size AAA) battery (2)
- Grille frame (1)

Installation position

**Subwoofer**

- *Note*: Do not place magnetic cards on the system or near the system.
- *Note*: Do not place metal objects such as TV frame, etc. around the system.
- *Note*: Wireless functions may become unavailable.

**Bar Speaker**

- *Note*: Do not place metal objects around the system. Wireless functions may become unavailable.

To mount the Bar Speaker on a wall:

Refer to “Mounting the Bar Speaker or Rear Speaker (not supplied) on a Wall” in the Operating Instructions (separate document).

---

1 Connecting with a TV and other devices

**Are there any HDMI IN jacks labeled “eARC” or “ARC” on your TV?**

**YES**

1. Use the HDMI cable (supplied) to connect an HDMI IN jack on your TV and the HDMI OUT (TV eARC/ARC) jack on the Bar Speaker.

2. *Note*: Make sure that the cable is firmly inserted.

3. *Note*: When your TV does not have an HDMI IN jack labeled “eARC” or “ARC,” you will also need to connect the TV and the Bar Speaker via an optical digital cable (not supplied) as instructed in step 3. There will be no sound output from the TV if the TV and the Bar Speaker are connected only via the HDMI cable.

4. *Note*: To watch 4K video content, refer to “Connecting a 4K TV and 4K Devices” in the Operating Instructions (separate document).

**NO**

1. Use the HDMI cable (not supplied) to connect an HDMI OUT jack on a device and either the HDMI IN 1 jack or HDMI IN 2 jack on the Bar Speaker.

2. *Note*: Make sure that the cable is firmly inserted.

3. *Note*: To watch 4K video content, refer to “Connecting a 4K TV and 4K Devices” in the Operating Instructions (separate document).

**Tip**

- When devices such as a Blu-ray Disc player, cable box, or satellite box are currently connected to a TV, disconnect them from the TV and then connect them to the Bar Speaker to reproduce the high quality surround sound.

**TV IN (OPT)**

When your TV does not have an HDMI IN jack labeled “eARC” or “ARC,” use an optical digital cable (not supplied) to connect an optical out jack (not supplied) on your TV and the TV IN (OPT) jack on the Bar Speaker.

**Note**

- Check the shape of the optical digital cable connectors and the jacks on the TV and the Bar Speaker. Insert the connectors into the jacks in the right directions. If you forcibly insert the connectors in the wrong directions, the connectors and the jacks may be damaged.

Refer to the Operating Instructions (separate document) for the TV connection methods below.

- Connecting Sony TV with the BLUETOOTH Function Wirelessly
- Connecting a 4K TV and 4K Devices
- Connecting a TV with an Analog Audio Cable
- Startup Guide (this document) explains how to connect the Bar Speaker and a TV via an HDMI cable.
Setting up the remote control

1. Connect the AC power cords (mains leads) of the Bar Speaker and subwoofer to the AC outlet (mains).
   - Power ON

2. Press the POWER button on the remote control of the system.
   - “HELLO” appears in the front panel display on the Bar Speaker.

3. Confirm that the power indicator of the subwoofer is lit in green.
   - If not, refer to “Subwoofer” of “Troubleshooting” in the Operating Instructions (separate document).

4. Press SW on the remote control of the system.
   - Adjust the volume of the subwoofer by pressing +/− on the remote control of the system.

5. Press TV on the remote control of the system.
   - Adjust the volume of the TV by pressing +/− on the remote control of the system.

Note
- If the problem is not solved even though you have tried the measures above, refer to “Troubleshooting” in the Operating Instructions (separate document).

Listening to sound

To listen to the audio of the TV

1. Select the desired input using the TV remote control.
   - The Screen switches to the television broadcast screen and the TV audio is output from the system.

2. Press TV on the remote control of the TV.
   - Select the language that you want for the system on-screen display.

3. Press HOME on the remote control of the system.
   - Perform settings by following the on-screen instructions.

Note
- Depending on the order in which you connect the TV and the system, the system may be muted and “MUTING” may appear on the front panel display on the Bar Speaker. If this happens, turn on the TV first, then the system.

Turning on the TV

1. Connect the AC power cords (mains leads) of the Bar Speaker and subwoofer to the AC outlet (mains).

2. Turn on the TV first, then the system.
   - Depending on the order in which you connect the TV and the system, the system may be muted and “MUTING” may appear on the front panel display on the Bar Speaker. If this happens, turn on the TV first, then the system.

3. Confirm that the power indicator of the subwoofer is lit in green.
   - If the power indicator of the subwoofer is lit in green, the connection with the Bar Speaker is complete.

4. Press TV on the remote control of the system.
   - If “TV” does not appear in the front panel display of the Bar Speaker, press TV on the remote control of the system.

5. Press HOME on the remote control of the system.
   - Perform settings by following the on-screen instructions.

6. Enjoying immersive surround experience

- Enjoy movies, music, and more with sound that flows all around the room, surrounding you from all directions.

- Turn on the connected device. Then use the TV remote control to switch the TV input to that for the HDMI IN jack to which the system is connected.

- Adjust the volume using the TV remote control.

How to display the operation screen of the system on the TV

Perform Easy Setup to display the system’s menu on the TV.

1. Press HOME on the remote control of the system.
   - The Easy Setup screen is displayed on the TV screen.

2. Press TV on the remote control of the system.
   - “TV” appears in the front panel display on the Bar Speaker.

3. Press HDMI1 or HDMI2 on the remote control of the system.
   - The Easy Setup screen is displayed on the TV screen.

Troubleshooting

No sound or only a very low-level sound is heard from the subwoofer.

- Press SW on the remote control of the system.

No picture or sound from the device connected to the system is output.

- Press TV on the remote control of the system.

No TV sound is output from the system, or no picture is displayed on the TV.

- Press TV on the remote control of the system.

Make sure that the input and output of the HDMI jacks on the system are correct.

- Press TV on the remote control of the system.

Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Disconnect the AC power cords of the TV and the system from the AC outlets (mains), then connect them firmly again.

- Press TV on the remote control of the system.

Check the sound setting of the TV. When the TV is set to output the sound from the TV speakers, change the setting to output the sound from the external speakers.

- Press TV on the remote control of the system.

The TV remote control does not work.

- Press TV on the remote control of the system.

Make sure that the input and output of the HDMI jacks on the system are correct.

- Press TV on the remote control of the system.

Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Make sure that the cables are firmly inserted.

- Press TV on the remote control of the system.

Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Disconnect the AC power cords of the TV and the system from the AC outlets (mains), then connect them firmly again.

- Press TV on the remote control of the system.

Check the sound setting of the TV. When the TV is set to output the sound from the TV speakers, change the setting to output the sound from the external speakers.

- Press TV on the remote control of the system.

When the TV and the system are connected via an HDMI cable, enable the Control for HDMI function or the eARC/ARC function on the TV. For details on the TV’s settings, refer to the operating instructions supplied with the TV.

- Press TV on the remote control of the system.

For more information about the Control for HDMI function, refer to the Operating Instructions (separate document).

- Press TV on the remote control of the system.

When the TV and the system are connected via an HDMI cable, enable the Control for HDMI function or the eARC/ARC function on the TV. For details on the TV’s settings, refer to the operating instructions supplied with the TV.

- Press TV on the remote control of the system.

Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Disconnect the AC power cords of the TV and the system from the AC outlets (mains), then connect them firmly again.

- Press TV on the remote control of the system.

Make sure that the input and output of the HDMI jacks on the system are correct.

- Press TV on the remote control of the system.

Disconnect the cables that are connected between the TV and the system, then connect them firmly again. Disconnect the AC power cords of the TV and the system from the AC outlets (mains), then connect them firmly again.

- Press TV on the remote control of the system.

Check the sound setting of the TV. When the TV is set to output the sound from the TV speakers, change the setting to output the sound from the external speakers.

- Press TV on the remote control of the system.

When the Bar Speaker obstructs the remote control sensor of the TV, the TV remote control may not work. In that case, set [IR-Repeater] to [On]. You can control the TV with the TV remote control. For details, refer to “When the TV Remote Control does not Work” in the Operating Instructions (separate document).

- Press TV on the remote control of the system.

The TV remote control does not work.

- Press TV on the remote control of the system.
