**Troubleshooting**

General troubleshooting for issues like: black screen, no sound, frozen picture, TV does not respond, or network is lost, do the following steps.

- Restart your TV by pressing the power button on the remote control for about five seconds. The TV will restart. If the TV does not recover, try unplugging the AC power cord (mains lead) then press the power button on the TV and release it. Wait for two minutes, and plug in the AC power cord (mains lead). Or, press the power button on the TV for about 40 seconds until the TV turns off.
- Refer to the Help menu shown below.
- Connect your TV to the Internet and perform a software update. Sony recommends you to keep your TV software updated. Software updates provide new features and performance improvements.
- Visit Sony support website (information provided at the end of the supplied safety documentation).

**When you plug in the TV, the TV may not be able to turn on for a while even if you press the power button on the remote control or the TV.**  
It takes time to initialize the system. Wait for about one minute, then operate it again.

**The remote control does not function.**  
• Replace the batteries.

**The parental lock password has been forgotten.**  
• Enter 9999 for the PIN and enter the new PIN.

**The screen becomes darker while watching TV.**  
• If the whole image or part of the image remains still, the screen brightness will be gradually reduced to prevent image retention. This is not a malfunction of the TV.

**You are concerned about image retention.**  
If the same image is displayed repeatedly or for long periods of time, image retention may occur. To reduce image retention, we recommend that you turn off the TV normally by pressing the power button on the remote control or the TV.

**Note**  
• Perform Panel refresh only when image retention is particularly noticeable. Avoid performing Panel refresh more than once a year because it may affect the usable life of the panel.  
• Images that include logos and bright colours (including white) easily cause image retention. Avoid displaying these types of images for long periods of time, otherwise image retention may occur.

**A white line appears on the screen. (XR-83A80L only)**  
• The Panel refresh has been performed. A white line may be displayed on the screen during the Panel refresh. This is not a malfunction of the TV. Panel refresh starts after the TV is turned off and takes about one hour to complete.

**The message [Panel refresh did not finish...] is displayed.**  
When i) the TV is turned on, ii) the AC power cord (mains lead) is unplugged, or iii) the room temperature falls outside of the range between 10 °C and 40 °C during the Panel refresh, the Panel refresh is not completed. Please avoid the above three conditions during the Panel refresh. (XR-83A80L only)  
When i) the TV is turned on or ii) the AC power cord (mains lead) is unplugged during the Panel refresh, the Panel refresh is not completed. Please avoid the above two conditions during the Panel refresh. (Except XR-83A80L)
