

使用另售充電器的注意事項

在PD快充模式下使用XQZ-UC1充電時，本裝置會自動將輸入功率調整為5V/3A或9V/3A。

關於可程式化電源供應器

- 1) 5-11Vdc/3A max., 30W max for PPS mode.
- 2) PPS: Programmable Power Supply是一種充電協議，簡單來說就是階段式動態調整輸出電壓及電流的充電方式。

Note on use with the separately sold charger

This device will automatically adjust the input power to 5V/3A or 9V/3A when charging with the XQZ-UC1 in the PD quick-charging mode.

About Programmable Power Supply

- 1) 5-11Vdc/3A max., 30W max for PPS mode.
- 2) PPS: Programmable Power Supply is a kind of charging protocol. Simply said, it is a dynamic step tuning charging method performed by adjusting the output voltage and current.
