This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications to the computer not expressly approved in this manual could void your authority to operate this equipment.

Only peripherals (computer input/output devices, terminals, printers, etc.) that comply with FCC Class B limits may be attached to this computer product.

Operation with non-compliant peripherals is likely to result in interference to radio and television reception.

All cables used to connect peripherals must be shielded and grounded. Operation with cables connected to peripherals that are not shielded and grounded may result in interference to radio and television reception.

FCC Part 68

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this information must be provided to the telephone company.

This modem uses the USOC RJ11C telephone jack.

The REN is used to determine the number of devices which may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company to determine the maximum REN for the calling area. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

If this equipment causes changes in its facilities, equipment, operations or procedures that could affect the operations of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary
modifications in order to maintain uninterrupted service.

If trouble is experienced with this equipment, you can reach the Sony Customer Information Service Center at 1-888-4-SONY-PC, or write to the Sony Customer Information Service Center at 12451 Gateway Blvd., Ft. Myers, FL 33913; or find Sony Customer Service on the Web at: http://www.sony.com/pcsupport. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Repair of this equipment should be made only by a Sony Service Center or Sony authorized agent. For the Sony Service Center nearest you, call 1-888-4-SONY-PC (1-888-476-6972).

This equipment cannot be used on public coin service provided by the telephone company. Connection to party line service is subject to state and possible provincial tariffs. Contact the state public or provincial utility service commission, public service commission, or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Use a surge arrestor to protect against electrical surges.

**FCC Radio Frequency Exposure (United States)**

(FOR MODELS WITH WIRELESS LAN) This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 8 inches (20 cm) between the radiator and body (excluding extremities: hands, wrists, and feet).

This device and its antenna(s) must not be co-located or operating with any other antenna or transmitter. Users are not permitted to modify this transmitter device. Any unauthorized change made to this device could void your authority to operate this device.

**IC RSS-210 (Canada)**

(FOR MODELS WITH WIRELESS LAN) Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

The term “IC:” before the certification/registration number only signifies that the Industry Canada technical specifications were met.

FOR MODÈLES AVEZ RESEAU DE CONNEXIONS LOCAL SANS FIL) L’utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l’utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.

Pour empêcher que cet appareil cause du brouillage au service faisant l’objet d’une licence, il doit être utilisé à l’intérieur et devrait être placé loin des fenêtres afin de fournir un écran de blindage maximal. Si le matériel (ou son antenne d’émission) est installé à l’extérieur, il doit faire l’objet d’une licence.

L’expression “IC:” avant le numéro d’homologation/enregistrement signifie seulement que les spécifications techniques d’Industrie Canada ont été respectées.

**Telephone Consumer Protection Act of 1991 (United States)**

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains, in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business, other entity, or individual sending the message, and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your facsimile machine, see your fax software documentation.
Telephone Consumer Guidelines (Canada)

Getting Started

This section helps you get your computer running and registered, so you can take advantage of Sony’s many support options. You’ll also learn how to locate your on-screen VAIO® Computer User Guide, which contains step-by-step instructions for operating your computer.

Turning On Your Computer

To use your computer immediately, use the supplied AC adapter as a power source. Your supplied battery is not charged when you unpack it, however, you can begin charging it when you use your AC adapter. See “Powering Your Computer” in your on-screen VAIO® Computer User Guide for more information about using batteries. See also “Locating Your VAIO Computer User Guide” on page 27.

To charge the battery

1 Switch the UNLOCK/LOCK latch on the bottom of the computer to the UNLOCK position.

UNLOCK/LOCK Latch
2 Align the grooves on the battery with the tabs on the back of the computer, and slide the battery toward the computer until it clicks into place.

**Inserting the Battery**

3 Slide the **UNLOCK/LOCK** latch into the **LOCK** position to secure the battery on the computer.

4 Connect the AC adapter to the computer. See “To connect the AC adapter.”

Once you connect the AC adapter to the computer, the battery begins to charge whether the computer is on or off. The battery indicator shows the battery status. The indicator blinks as the battery charges. See “Powering Your Computer” in your on-screen VAIO® Computer User Guide for more information.
To connect the AC adapter

1. Plug the AC adapter cable into the DC IN port.

Connecting the AC Adapter to the Computer

2. Plug the power cord into the AC adapter and an AC outlet.

Use only the supplied AC adapter with your computer.

To open and turn on the computer

1. Slide the release latch to the right and lift the cover while holding the bottom of the computer firmly.

Opening the Computer
2 Slide the power switch to the right until the green power indicator lights up.

**Turning on the Computer**

If you hold the power switch to the right, the computer turns off.

3 If necessary, adjust the brightness controls for the LCD display as follows:

- To increase brightness, press the **Fn+F5** keys, and then press the Up Arrow key or Right Arrow key.
- To decrease brightness, press the **Fn+F5** keys, and then press the Down Arrow key or Left Arrow key.

**Using the Touch Pad**

The computer contains a pointing device called a touch pad. You can point to, select, drag, and scroll objects on the screen using the built-in touch pad.

Registering Your Computer

You are prompted to register your computer the first time you turn on the unit. Follow the on-screen instructions to complete the registration process. If you are not able to register your computer during the first session, you are provided with additional registration opportunities later.

Take advantage of Sony’s commitment to quality customer support and receive these benefits by registering your computer:

❐ Sony Customer Support — Talk to a support representative to troubleshoot problems you may have with your computer.

❐ Limited Warranty Extension — Protect your investment. See the Warranty Card for more details.

❐ Product Information Notification — By giving Sony your contact information, you will enable Sony to reach you regarding performance updates and upgrades.
Locating Your VAIO Computer User Guide

The on-screen VAIO® Computer User Guide is a searchable help file that contains detailed information on how to use your new computer.

**To open the user guide (Windows XP)**

1. Click **Start** on the Windows® taskbar, and then click **Help and Support**. The **Help and Support Center** window appears, displaying information about your VAIO® computer and Microsoft® Windows® operating system.

2. Click **VAIO User Guide** in the Pick a Help topic column. A second **Help and Support Center** window appears, which offers information about your computer.

Locating the VAIO User Guide (Windows XP)
To open the user guide (Windows 2000)

- Click **Start** on the Windows® taskbar, point to **VAIO Help Center** and click **VAIO User Guide**. The **VAIO User Guide** appears.
Setting Up A Dial-Up Connection

This section describes the basic steps for setting up your dial-up connection. The Connection Wizard guides you through the process of choosing an Internet Service Provider (ISP) or setting up an existing account, and connecting to the Internet.

To connect a telephone cable

1. Locate the Modem jack on your computer.
2. Plug one end of the telephone cable into the Modem jack. Make sure it clicks into place.
3. Plug the other end into the wall jack.
Connecting a Telephone Cable

Your computer does not work with party lines, cannot be connected to a coin-operated telephone, and may not work with multiple telephone lines or a private branch exchange (PBX). Some of these connections may result in excess electrical current and could cause a malfunction in the internal modem.

If you connect a telephone cable coming through a splitter, the modem or connected device may not work properly.
To set up a dial-up connection (Windows XP)

1. Click Start, point to All Programs, Accessories, Communications, and then click New Connection Wizard. The New Connection Wizard appears.

New Connection Wizard

2. Click Next.

3. If it is not already selected, click Connect to the Internet.

4. Click Next.

5. Follow the on-screen instructions.
To set up a dial-up connection (Windows 2000)

1  Click Start, point to Programs, Accessories, Communications, and then click Internet Connection Wizard. The Internet Connection Wizard window appears.

Internet Connection Wizard

2  Follow the on-screen instructions to finish setting up your Internet connection.

Turning Off Your Computer

Using the power switch to turn off your computer may result in loss of data. Follow the steps below to properly turn off your computer and avoid losing data.

To turn off your computer

1  Close all operations.

2  Click Start on the Windows® taskbar.

3  (Windows XP) Click Turn Off Computer at the bottom of the Start menu to display the Turn off computer window, and select Turn Off.
   (Windows 2000) Click Shut Down at the bottom of the Start menu to display the Shut Down Windows window, and select Shut Down.
### Turning Off Your Computer

1. **Respond to any prompts warning you to save documents.**

2. **Wait for your computer to turn off automatically.** The computer is off when the power indicator turns off.

3. **During a period of inactivity, you can conserve battery life by using power saving modes. See the VAIO® Computer User Guide for more information.**

4. **If you are unable to turn off the computer, slide and hold the power switch until the computer turns off. This operation may result in data loss.**
VAIO Recovery Wizard Utility

(Windows® XP only) System and Application Recovery CDs are not supplied with your VAIO® computer. Your VAIO computer is equipped with the VAIO Recovery Wizard, a fast and easy-to-use system recovery utility. This system and application recovery utility enables you to recover preinstalled software programs, the operating system, and to create a VAIO Recovery Media Kit.

About the VAIO Recovery Wizard utility

❑ Use the several recovery options to restore your preinstalled software programs and specific partitions on your hard disk drive.
❑ Follow the instructions that guide you through several recovery options choosing the default selections or customizing your computer's recovery.
❑ Discover the advantages of recovering your computer without using CDs or other external media.
❑ Create your own Recovery Media Kit, using your purchased CD or DVD media.

Creating a Recovery Media Kit

You can create your Recovery Media Kit using CD or DVD media that can be used if your system does not start. The Recovery Media Kit enables you to reclaim the space reserved for the recovery partition (approximately 5 GB).

For more information about creating the Recovery Media Kit, see the VAIO Recovery Options online guide:

1. Click Start in the Windows® taskbar, and then click Help and Support.
2. From the VAIO Help and Support Center, click VAIO Recovery Options.

* The number of CDs and/or DVDs required to create a Recovery Media Kit may vary, depending on the computer model purchased.
Visit the Sony Computing Support Web site for the latest information about using the VAIO Recovery Wizard or Recovery Media Kit.

To purchase a VAIO Recovery Media kit

2. Enter your computer model number (for example, PCV-XXXX), and click List Parts and accessories.
3. Follow the online instructions to order the Recovery Media Kit.

If you are not able to access the Sony Direct Accessories and Parts Center Web site, contact a customer service representative at 1-800-488-7669.

Using the VAIO Recovery Wizard Help

For more information about recovery options or instructions on using the VAIO Recovery Wizard utility program, see the VAIO Recovery Wizard Help.

Access the Help by following these steps:

1. Turn on your computer.
2. Click Start in the Microsoft® Windows® taskbar and click All Programs.
4. Click Help. The VAIO Recovery Wizard Help appears in a separate window*.

* If you do not perform a recovery operation, your system prompts you to restart your computer when closing the VAIO Recovery Wizard utility.
Troubleshooting Your Computer

This section describes how to solve some basic problems you may encounter when using your computer. For more troubleshooting topics refer to the VAIO® Computer User Guide. Many problems have simple solutions, so refer to these sources before you contact Sony Computing Support (http://www.sony.com/pcsupport).

What do I do if my computer won’t start?

❑ Make sure the computer is securely plugged into a power source and turned on. Make sure the power indicator shows the power is on.
❑ Make sure the battery is inserted properly and charged.
❑ Make sure the floppy disk drive (if applicable) is empty.
❑ If the computer is plugged into a power strip or uninterruptible power supply (UPS), make sure the power strip or UPS is turned on and working.
❑ If you are using an external display, make sure it is plugged into a power source and turned on. Make sure the brightness and contrast controls are adjusted correctly. See the guide that came with your display for details.
❑ Disconnect the AC adapter and remove the battery. Wait one minute. Reattach the AC adapter and reinser the battery. Turn on the power.
❑ Condensation may cause the computer to malfunction. If this occurs, do not use the computer for at least one hour.
❑ If the computer still does not turn on, follow these steps:
  1 Unplug the power cord and remove the battery.
  2 Use a thin, straight object (such as a paper clip) to press the reset button on the bottom of the computer. For location information, see “Locating Controls and Ports.”
  3 Reinsert the power cord and the battery.
  4 Turn on the computer.
What do I do if a BIOS error appears when my computer starts?

What do I do if my computer stops responding?

It is best to turn off your computer using the Turn Off Computer or Shut Down option on the Microsoft® Windows® Start menu, located on the taskbar. Using other methods, including those listed below, may result in loss of unsaved data.

❑ (Windows® XP) Click Start on the Windows® taskbar, select Turn Off Computer, and then click Turn Off. (Windows® 2000) Click Start on the Windows® taskbar, and select Shut Down. When the Shut Down Windows window appears, make sure Shut down is selected, and click OK.

❑ If your computer does not turn off, press the Ctrl+Alt+Delete keys simultaneously. (Windows® XP) When the Windows Task Manager dialog box appears, click Turn Off from the Shut Down menu. (Windows® 2000) When the Windows Security dialog box appears, click Shut Down, and select Shut Down again from the Shut Down Windows window.

❑ If your computer still does not turn off, press and hold the power button or slide and hold the power switch until the computer turns off.

❑ If your computer stops responding while playing a CD or DVD, press the Ctrl+Alt+Delete keys simultaneously. (Windows® XP) You can turn off the computer from the Windows Task Manager. (Windows® 2000) You can turn off the computer from the Windows Security dialog box.

(For Windows® 2000 only) The System Recovery CD/DVD restores your computer to its original state, so user data and applications will be lost.
Remove the AC adapter and battery.

**Why won’t my computer enter Standby or Hibernate mode?**
