

Notes on using a computer

■ Installing the supplied "Picture Motion Browser" software application

The supplied "Picture Motion Browser" software application contains DVD writing software and the Sonic UDF Reader* produced by SONIC SOLUTIONS. If you install "Picture Motion Browser" on a computer that uses certain writing software, such as Roxio Easy CD Creator 5, in its environment, the computer's performance may become unstable.

* Sonic UDF Reader will not be installed on Windows Vista™.

Before installing "Picture Motion Browser," download and implement the countermeasure offered at the following URL.

<http://www.sonicjapan.co.jp/oem/sony/camera/readme.html>

For other information, visit:

<http://support.sonic.com/>

Select "Drive Letter Access" as the product.

■ Playing HD (high definition) images recorded in the AVCHD format on a computer

The supplied software application, "Picture Motion Browser," may not always play HD (high definition) images recorded in the AVCHD format properly. Even in a computer environment which satisfies the system requirements, there may be noise on playback images, frames may be dropped, or sound may be lost intermittently. (Imported images and images on discs created subsequently will not be affected.)

■ The latest information on using a computer

You can access information on using a computer with your Handycam on the following support page.

Types of "Memory Stick" you can use with your camcorder

For recording movies, it is recommended that you use a "Memory Stick PRO Duo" or "Memory Stick PRO-HG Duo" of 512 MB or larger marked with:

MEMORY STICK PRO DUO
"Memory Stick PRO Duo"

MEMORY STICK PRO-HG DUO
"Memory Stick PRO-HG Duo"

- Both are called as "Memory Stick PRO Duo" here.

■ "Memory Stick PRO Duo" capacity and expected recording time

512MB	1GB	2GB	4GB	8GB
8	15	35	65	140

- Approximate recordable time in minutes with recording mode [HD SP] (the default setting).
- A "Memory Stick PRO Duo" of up to 8 GB has been confirmed to operate correctly with this camcorder.

Enjoy HD (high definition) images easily

You can play images with HD (high definition) image quality recorded on a "Memory Stick PRO Duo" inserted into the Memory Stick slot of AVCHD-compatible devices, such as a PLAYSTATION®3.*

* The PLAYSTATION®3 may not be available in some countries/regions.

- Always maintain your PLAYSTATION®3 to use the latest version of the PLAYSTATION®3 system software.

Saving/viewing/sharing images

Some ways of enjoying movies recorded on your camcorder are introduced briefly here.

Refer to the supplied "Operating Guide," and "Handycam Handbook" and "Picture Motion Browser Guide" on the CD-ROM for details on operations and connections.

HD	: HD (high definition) image quality
SD	: SD (standard definition) image quality

Enjoy images recorded with **HD** (high definition) image quality

- Install "Picture Motion Browser," provided on the supplied CD-ROM on a computer.
- You cannot convert the quality of images from SD (standard definition) to HD (high definition).

Save Saving, playing, and editing images on a computer

If there is no more free space on the "Memory Stick PRO Duo" ...

One Touch Disc Burn

You can save images on a disc with the same image quality as that of the original recording.

Easy PC Back-up

You can save images on a computer.

View Enjoying images with **HD** (high definition) image quality

Playing images from the Memory Stick slot of AVCHD-compatible devices

You can play images saved on a "Memory Stick PRO Duo" inserted into the Memory Stick slot of AVCHD-compatible devices, such as a PLAYSTATION®3*1 or VAIO*2.

*1 The PLAYSTATION®3 may not be available in some countries/regions.

*2 The operation has been confirmed on the VAIO put on the market after January, 2006 that satisfy the recommended operating requirements of the supplied software (Picture Motion Browser).

- Always maintain your PLAYSTATION®3 to use the latest version of the PLAYSTATION®3 system software.
- You may not be able to play images directly from the Memory Stick slot, depending on the AVCHD-compatible device.

- Even in a computer environment where the operations are guaranteed, frames may be dropped from movies with HD (high definition) image quality, resulting in uneven playback. However, imported images and images on discs created subsequently will not be affected.

Playing images by connecting your camcorder to a high definition TV

- If your TV is not a high definition TV, you can view images with SD (standard definition) image quality.

Share Dubbing images on a disc

Connect a recorder with the A/V connecting cable (supplied).
To create a disc that can be played on a DVD device, it is better to dub on a DVD/HDD recorder. The image is dubbed with SD (standard definition) image quality.
