

## ► Various Ways of Recording

### Adding a Recording to a Previously Recorded Message

You can add a recording to the message being played back.

#### Notes

- At a factory setting, you cannot add a recording not to erase the message by accidental operation. See "Using an Adding Recording" to change the setting.
- The added or overwritten portion of a message will be recorded in the same recording mode (ST, STLP, SP or LP) as the original message, regardless of the current recording mode setting.
- You cannot add or overwrite a recording if the remaining memory is insufficient. For more information, see "Troubleshooting".
- You cannot add or overwrite a recording onto an MP3 file.

### Adding a Recording to a Previously Recorded Message

When REC-OP in the menu is set to "ADD", you can add a recording to the message being played back (see "Using an Adding Recording"). The added recording will be placed after the current message and counted as a part of the message.

- During playback, press **REC/REC PAUSE** briefly. "REC" and "ADD" will flash and the unit stops in the recording pause mode.

- While "REC" and "ADD" are flashing, press **REC/REC PAUSE**. "REC" is displayed and "ADD" flashes for 3 seconds on the display window. The OPR indicator will light in red. Then the new recording will be added at the end of the current message.

- Press **STOP** to stop the recording.

**Adding an Overwrite Recording during Playback**  
When REC-OP in the menu is set to "OVER", you can add an overwrite recording after the selected point in a recorded message. The part of the message after the selected point is deleted.

- During playback, press **REC/REC PAUSE** briefly. "REC" is displayed. "OVER" flashes on the display window and the OPR indicator flashes in red.

- Press **REC/REC PAUSE** to start recording. The display returns to the display mode set in the menu and the OPR indicator lights in red.

- Press **STOP** to stop the recording.

### Recording with an External Microphone or Other Equipment

Connect an external microphone to the (microphone) jack. When you connect an external microphone, the built-in microphone is automatically cut off. When a plug in power type microphone is connected, power is automatically supplied to the microphone from the IC recorder.

☞ Recommended types of microphones  
You can use the ECM-CS10 Sony electret condenser microphone (not supplied).

### Recording from Other Equipment

To record sound of other equipment with the IC recorder, connect the (microphone) jack of the IC recorder to the earphone jack of other equipment (tape recorder etc.) by using a resistance audio connecting cable.

Before you start recording, set the microphone sensitivity by setting SENS in the menu to "H" (high).

#### Note

If you use an audio connecting cable without a resistor, sound may be recorded interrupted. Make sure to use a resistance audio connecting cable.

### Recording with Other Equipment

To record the sound of the IC recorder with other equipment, connect the (headphones) jack of the IC recorder to the audio input connector (minijack, stereo) of other equipment.

## ► Various Ways of Playback

### Locating quickly the point you wish to start playback (Easy Search)

When EASY.S is set to "on" in the menu, you can quickly locate the point you wish to start playback by pressing the jog lever up or down repeatedly during playback or playback pause.

You can go back approx. 3 seconds by pressing the jog lever down once, or advance approx. 10 seconds by pressing the jog lever up once. This function is useful when locating a desired point in a long recording.

### During playback or stop, slide the VOICE UP switch to "ON"

The message is played back with adjusted sound.

### To resume normal playback

Slide the VOICE UP switch to "OFF".

Note  
Depending on the area you purchased the unit, the Digital Voice Up switch name shown on the unit may differ.

- Select the message you want to back.

For more information about selecting the desired message, see step 1 and 2 of "Playing Back Messages".

- Enter the alarm setting mode.

Press the jog lever toward MENU. The menu mode will be displayed in the display window.
