■ What is HDTV™

HDMI™ (High Definition Multimedia Interface) cables are the standard for connecting HDTV. They are built to properly handle high-bandwidth, uncompressed video and multi-channel audio—all in one cable.

■ Connecting a P.C. to Your BRAVIA™

- May require DVI-to-HDMI adapter and separate audio connector.
- Select TV’s audio source and TV’s input (e.g. HDMI 1) to display the DVI Monitor.
- Press TV’s Function (or Media) button to display the Input selection menu.
- Press the channel up/down on your remote control to select the correct input using your remote control.
- Contact your cable or satellite provider to upgrade your service to HD. Receive over-the-air HD broadcasts with an HD antenna (www.antennaweb.org) and discover the wealth of entertainment now available on super-high resolution Blu-ray Disc™.

■ Performance

Your BRAVIA™ TV must be properly connected to components such as sound system and cable or satellite box.

See reverse side of this guide for sample connection diagrams.

■ What is HDMI™

HDMI™ (High Definition Multimedia Interface) cables are the standard for connecting HDTV. They are built to properly handle high-bandwidth, uncompressed video and multi-channel audio—all in one cable.

■ Connecting a P.C. to Your BRAVIA™

- May require DVI-to-HDMI adapter and separate audio connector.
- Connect P.C.’s audio output when using a Digital Video Interface (DVI) or HDMI connection.
- Press PC’s FUNCTION Key + Select Output to transmit to TV.
- When using an HDMI connection, adjust TV’s Pitch and Phase to correct distortion.
- Refer to your BRAVIA™ Operating Instruction Manual for more information.
- Contact with an HDMI cable when using an HDMI compatible PC.

### Running Initial Setup

Initial Setup instructions are displayed on the screen when your BRAVIA™ is powered on for the first time.

1. Select the language for the OSD (on-screen display).
2. Select Auto Program to advance to the Auto Programming.
3. Select Initial Setup icon.
4. Follow on-screen instructions to complete setup and begin viewing your TV.

### To Access Initial Setup by Remote Control

If you did not follow the Initial Setup screen the first time, press HOME on your remote control to display TV Home Menu/XMB, and select the Initial Setup icon under the Settings category.

![Initial Setup Menu](Image)

### Adjust Screen Shape and Aspect Ratio

- High Definition and Standard Definition signals are transmitted with different aspect ratios (the width-to-height shape of the image). Most HD signals use a widescreen aspect ratio of 16:9. Most SD signals use a letterbox aspect ratio of 4:3.
- When you connect a PC, the type of signal being displayed on your BRAVIA™ can only be as high as the quality of the source it is displaying. This chart shows the different signal types and how to access them.
- Contact your cable or satellite provider to upgrade your service to HD. Receive over-the-air HD broadcasts with an HD antenna (www.antennaweb.org) and discover the wealth of entertainment now available on super-high resolution Blu-ray Disc™.

### Customize Sound and Picture Quality

You can choose optimal visual and picture settings to match the content you are displaying on your TV.

- Press HOME on your remote control and select Picture or Sound. Choose the appropriate setting for your content.
- Use the OPTIONS button on your remote control to quickly adjust sound and picture quality.
- Refer to your BRAVIA™ Operating Instruction Manual for more information.

**HD Basic Connection**

- **Cable/Antenna**
- **Splitter**
- **Blu-ray Disc™/DVD**
- **Rear of TV**
- **HD Cable Box or HD Satellite Receiver**

**Required Cable Types for Connection**

- HDMI
- DVI-to-HDMI
- Component
- Audio (L/R)
- Y/Pb/Pr with Mini-Pin
- Digital Optical Audio

**Notes on Connection:**

- Your TV is equipped with three HDMI inputs, connect your incoming signal source (HD Cable Box, HD Satellite Receiver, or DVD) with an HDMI or component video for the best possible picture quality.
- If your connecting equipment has DVI output instead of the HDMI output, you must use DVI-to-HDMI cable for the video and also connect an audio cable for the sound. If this is the case, connect the cable to HDMI IN 1 (input) of your TV.
- P&P/PIP functions require VHF/UHF/CABLE connection.
- When receiving High-Definition content signal by over-the-air antenna, it is best to use the HD antenna.
- To confirm the programming, press the green button one time. If not, try the next code listed.

**Programming the Remote Control**

*Your remote control can be programmed to use other equipment. The remote control is preset as below for Sony equipment.*

<table>
<thead>
<tr>
<th>Sony Equipment</th>
<th>Programmable Code Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>BD</td>
<td>101 (Sony Blu-ray Disc Player)</td>
</tr>
<tr>
<td>DVD</td>
<td>211 (Sony DVD Player)</td>
</tr>
<tr>
<td>TV</td>
<td>401 (Sony Satellite Receiver)</td>
</tr>
</tbody>
</table>

**Programming Non-Sony Video Equipment**

1. In the space provided below, write down the three-digit code of your equipment from the Manufacturer’s Code List (see Operating Instructions).
   - If more than one code is listed, try entering the code listed first.
   - If none of the codes listed work, try entering the code listed first.
2. Press and hold the POWER button simultaneously to light the FUNCTION button.
3. Enter the three-digit code using the buttons on the remote control. If the code is not entered within 10 seconds, you must repeat step 2.
4. Press the green button to confirm the programming.

**To Confirm the Programming**

1. In the space provided below, write down the three-digit code of your equipment from the Manufacturer’s Code List (see Operating Instructions).
2. Press and hold the POWER button simultaneously to light the FUNCTION button.
3. Enter the three-digit code using the buttons on the remote control. If the code is not entered within 10 seconds, you must repeat step 2.
4. Press the green button to confirm the programming.

Note:

- If you cannot get more than one code for your equipment, try entering the code listed first.
- If your equipment does not match the labeled buttons available, make note of your equipment's programmed button.
