Congratulations! Your new BRAVIA™ TV opens the door to the "Full HD Experience".
This guide will explain how to get the most from your new High Definition TV.

Learn more: Visit the Sony HDTV Learning Center www.sony.com/HDTV
Please take these steps before you power up your BRAVIA™:
- Register online at: www.sony.com/registration (from U.S.A.)
- www.sony.ca/registration (from Canada)
- Make sure you've removed all酿装 contents from packaging.
- Install 2 AA batteries (supplied separately) in your remote control.
- Determine whether you will hang your TV on a wall or place it on a floor stand. Sony wall mounting brackets are designed to provide the best fit.
- Give your TV 2½ inches (6 cm) of space behind it to properly ventilate.

The Four Steps to a Full HD Experience: Set, Sound, Source, and Setup
Along with your BRAVIA™ TV set, a complete HD system requires an HD sound system, a source of HD content, and proper setup with components such as your HD cable or satellite box.
You must get HD programming to experience the full detail of HDTV.

The quality of the image you see on your BRAVIA™ can only be as high as the quality of the signal it is displaying. This chart shows the different signal types and how to access them.

Best Signal Performance

High Definition Content
Best picture quality 15:9 aspect ratio
HD Over-The-Air Antenna
HD Cable Subscription
Programming
HD Satellite Subscription
Digital Content
Good picture quality aspect ratio based on HDVHS/HDUHF/HD Satellite
Over-The-Air Antenna
Digital Cable Subscription
Digital Satellite Subscription
Analog Content
Original TV Format 4:3 aspect ratio
Over-The-Air Antenna
Digital Cable Subscription

Contact your cable or satellite provider to upgrade your service to HD. Receive over-the-air HD broadcasts with an HD-quality antenna (www.antennaweb.org) and discover the wealth of entertainment now available on super-high-resolution Blu-ray Disc™.

Along with your BRAVIA™ TV and HD content, a complete HD system requires an HD sound system, a source of HD content, and proper setup with components such as your HD cable or satellite box.

To Access Initial Setup by Remote Control
If you did not follow the Initial Setup screen the first time, press HOME on your remote control to display the TV Home Menu/XMB, and select the Initial Setup icon under the Settings category.

1 XMB appears.
2 Select Initial Setup icon.
3 Your TV will detect the type of signal connected and will start scanning for the channels.
4 Follow on-screen instructions to complete setup and begin viewing your TV.

Quick Setup Guide
For further information, see the Operating Instruction Manual supplied with the TV. Please retain this guide for your future reference.

Your BRAVIA™ TV must be properly connected to components such as sound system and cable or satellite box.

See reverse side of this guide for sample connection diagrams.

What is HDMI™?

HDMI (High Definition Multimedia Interface) cables are the standard for connecting HDTV. They are built to properly handle high bandwidth, uncompressed video and multi-channel audio— all in one cable.

Connecting a PC to Your BRAVIA™
- May require DVI-to-HDMI adapter and separate audio connector.
- Connect PC's audio output when using a Digital Video Interface (DVI) or HDMI connection.
- Press PC's FUNCTION Key + Select Output to transmit to TV.
- When using an HD15 connection, adjust TV's Pitch and Phase to correct distortions.
- Refer to your BRAVIA™ Operating Instruction Manual for more information.
- Contact your HDMI cable when using an HDMI compatible PC.

Running Initial Setup

Initial Setup instructions are displayed on the screen when your BRAVIA™ is powered on for the first time.

1 Select the language for the OSD (on-screen display).

2 Contact either Antenna or Cable to your TV.

3 Your TV will detect the type of signal connected and will start scanning for the channels.

4 Follow on-screen instructions to complete setup and begin viewing your TV.
Notes on Connection:

- Your TV is equipped with two HDMI inputs, connect your incoming signal source (HD Cable Box, HD Satellite Receiver, or DVD) with an HDMI or component video for the best possible picture quality.
- If your connecting equipment has DVI output instead of the HDMI output, you must use DVI-to-HDMI cable for the video and also connect an audio cable for the sound. If this is the case, connect the cable to HDMI IN 1 (input) of your TV.
- When receiving High-Definition content signal by over-the-air antenna, it is best to use the HD antenna.
- When using a DVI-to-HDMI cable, make sure to connect the DVI side first.
- Your TV is equipped with two HDMI inputs, connect your incoming signal source (HD Cable Box, HD Satellite Receiver, or DVD) with an HDMI or component video for the best possible picture quality.
- P&P function requires VHF/UHF/CABLE connection.
- When receiving High-Definition content signal by over-the-air antenna, it is best to use the HD antenna.
- When using a DVI-to-HDMI cable, make sure to connect the DVI side first.

**Required Cable Types for Connection**

- Mini-Pin Audio
- Composite Audio (L/R)
- DVI-to-HDMI
- Component Audio (L/R)
- Digital Optical Audio
- HDMI
- HD15
- Audio (L/R) with Mini-Pin
- Coaxial

**Notes on Connection:**

- Your TV is equipped with two HDMI inputs, connect your incoming signal source (HD Cable Box, HD Satellite Receiver, or DVD) with an HDMI or component video for the best possible picture quality.
- If your connecting equipment has DVI output instead of the HDMI output, you must use DVI-to-HDMI cable for the video and also connect an audio cable for the sound. If this is the case, connect the cable to HDMI IN 1 (input) of your TV.
- P&P function requires VHF/UHF/CABLE connection.
- When receiving High-Definition content signal by over-the-air antenna, it is best to use the HD antenna.
- When using a DVI-to-HDMI cable, make sure to connect the DVI side first.
