Quick Setup Guide

Please follow the steps to setup your TV:

1. Checking the Supplied Accessories
   • Remote control (RM-YA001) (1) and size AA batteries (2)
   • 75-ohm coaxial cable (ferrite core attached) (1)
   • AC power cord (1)
   • AC power adapter (1) (KLV-S19A10 only)
   • HD15-HD15 cable (1)
   • Support belt (1), securing screw (1) and wood screw (1)
   • Operating Instructions (1)
   • Quick Setup Guide (1)
   • Leaflet (Installing the Wall-Mount Bracket, KLV-S19A10 only) (1)
   • Warranty Card (1)

2. Connecting Your TV
   (See reverse side)
   • Review the following chart to determine which diagram to use to connect the components in your system:
     For these components
     See reverse side
     A
     B
     C
     D
     E
     F
     • See the “Cables Required” chart that appears with the diagram to determine which cables you'll need. You may need to purchase extra accessories, such as cables and splitters, depending on the components you plan to connect.
     • Turn off and unplug all components before making connections.
     • If you are connecting a digital cable box, you'll need a special bi-directional splitter that's compatible with your cable box. Contact your cable provider for details.

3. Running Initial Setup
   • Press POWER to turn on the TV.
   • The Initial Setup screen appears.
   • Press or to select the on-screen display language. Then press .
   • The message “First please connect cable/antenna” appears.
   • By default, Auto Program is set to scan cable TV channels.
   • Press CH+ to start Auto Program.

   Auto Program automatically creates a list of receivable channels. When finished, the lowest numbered channel is displayed. When all the receivable channels are stored, the “Show/Hide Channels” settings appear.

   To scan available VHF/UHF antenna channels instead of the cable TV channels
   1. Select Settings in WEGA GATE, then go to Channels settings.
   2. Set Cable to Off.
   3. Start Auto Program by pressing CH+.

   To perform Auto Program again, follow the above instructions. Depending on your signal source, be sure to set Cable to On or Off accordingly (see Operating Instructions).

   Note
   The Initial Setup menu will appear each time the TV is turned on until you complete the scanning for the available channels.

4. Programming the Remote Control
   The remote control is preset to operate Sony brand video equipment.

   Using the code list below, find the three-digit code number for the manufacturer of your equipment. (If more than one code number is listed, use the number listed first.)

   Press and hold the or FUNCTION button you want to program on the remote control and press the button simultaneously. The selected FUNCTION button (DVD/VCR or SAT/CABLE) will flash.

   Enter the three-digit manufacturer’s code number using the or buttons while the button is lit, approximately 10 seconds.

   Press button.

   When the programming is correct, the selected FUNCTION button will flash twice slowly, and when not, flashes five times quickly.

   To check if the code works
   Aim your TV’s remote control at the equipment, and press the green POWER button. If the equipment responds, the programming is completed. If not, try the next code listed.

   Tips
   • If no code is input within the above specified time, or an invalid or incorrect code number is input, the remote control automatically goes back to the previous setting.
   • In some cases, you may not be able to program your remote control to operate other equipment. In such cases, use the equipment’s own remote control.
   • Dead batteries or removing the batteries may cause the programmable codes to be lost and revert back to factory settings. Reprogramming the codes may be necessary.

   Additional Connections
   For best audio performance, connect your digital audio components using either digital optical or coaxial audio connections. Depending on which components are in your system, you may need to complete additional connections. For example, if you have a satellite receiver, you'll need to connect the satellite antenna.

   If you have an A/V receiver, you'll need to connect speakers.

Use this diagram if you have:

**Cable/Satellite Receiver**

If your DVD player or satellite receiver has an HDMI jack, use that instead of the video connections shown here. If you are not using a cable box or satellite receiver, connect your cable or antenna to the VCR's RF IN jack.

If your DVD player or satellite receiver has an HDMI jack, use that instead of the video connections shown here. If you are not using a cable box or satellite receiver, connect your cable or antenna to the VCR's RF IN jack.

If you are not using a cable box or satellite receiver, connect your cable or antenna to the VCR's RF IN jack.

If your cable box or satellite receiver has an HDMI jack, use that instead of the video connections shown here. If you connect a PC to the TV's HDMI input, a PC must be connected to provide sound. If you do not connect a PC to the TV's HDMI input, the TV will not provide audio, so audio cables must be connected to provide sound when a DVI to HDMI adaptor is used.

If your DVD player or satellite receiver has an HDMI jack, use that instead of the video connections shown here. If you connect your cable or antenna to the VCR's RF IN jack, connect your cable or antenna to the VCR's RF IN jack.

If you are not using a cable box, connect your cable or antenna to the VCR's RF IN jack.
