Setup Summary

STEP 1

Unpack and Install the Software (see below)

- Unpack.
- Connect to your TV signal, other AV devices, the Internet, and turn on the base station.
- Install LocationFree™ Player software on your computer.

STEP 2

Setup to Watch TV at Home (see other side)

- Put the base station into setup mode.
- Connect your computer to the base station.
- Connect your computer to the base station to watch TV.
- Make TV and video settings with LocationFree™ Player.

STEP 3

Setup to Watch TV On-the-Go (see other side)

- Make easy setup settings for the base station with your computer.

Setup Is Completed

Watch TV on your computer at home and on-the-go.

* Computer with LocationFree™ Player.

STEP 1: Unpack and Install the Software

Unpack

Check that your package includes the following:

- LocationFree™ Base Station (LF-B1)
- LocationFree™ Player software CD-ROM (includes LocationFree™ Player software* and Operating Instructions) (LFA-PC2)
- AC power adapter
- Power cord
- IR Blaster
- Base station stand
- Quick Start Guide (this document)
- Instructional DVD
- Dynamic DNS Terms-of-Use Agreement

* One serial key for LocationFree™ Player is supplied.

Install LocationFree™ Player Software on Your Computer.

- 1 Insert the LocationFree™ Player software CD-ROM into the CD-ROM drive of your computer.
- 2 Click [Next].
- 3 Read the license agreement, select [I accept the terms in the license agreement], and then click [Next].
- 4 Type the serial key printed on the backside of the CD-ROM case, and then click [Next].
- 5 Confirm the installation folder, and then click [Next]. If you want to modify the installation folder, click [Change] and select a folder.
- 6 Click [Install]. Installation starts.
- 7 Click [Finish] when the installation is completed. A shortcut for the LocationFree™ Player appears on your computer's desktop after installation.

The installation screen appears.

Connect to Your TV Signal, Other AV Devices and the Internet, and Turn On the Base Station.

- 1 Attach the base station stand.

- 2 Connect to a TV antenna, set top box (STB), or other devices.

- 2-a Connect to a TV antenna.

- 2-b Connect to a set top box (STB).

- 2-c Connect to other devices (such as DVD players, etc.).

- 3 Connect the IR Blaster so it faces the infrared receiver on the external device.

- 4 Connect to the Internet. For details, see the connection examples in STEP 2.

- 5 Connect the power cord to the base station.

- 6 Turn on the power.

Connect Your Computer to the Base Station

* To determine the type of your modem, check with your Internet service provider.

Check the base station NETWORK LED.

Check whether the base station NETWORK LED is turned on. When not turned on: Make sure the router power is turned on and the LAN cable is connected correctly.

Put the Base Station into Setup Mode (Registration Possible)

Press the SETUP MODE button on the rear panel of the base station. Keep the button held down until the SETUP MODE LED starts blinking.

Tip

Make all settings up to "STEP 2: Connecting Your Computer to the Base Station to Watch TV" while the SETUP MODE LED is blinking.

Note

The Setup Mode (registration possible) is available for 5 minutes. If the SETUP MODE LED stops blinking, keep pressing the SETUP MODE button again until the SETUP MODE LED starts blinking.

* In the Setup Mode, the wireless LAN operates on the 2.4 GHz channel.

Connect Your Computer to the Base Station to Watch TV

1 Double click the icon on the desktop to start LocationFree™ Player.

2 While the SETUP MODE LED is blinking, select a base station from the list, choosing one with a green icon, and then click [Connect].

Green icon

If the SETUP MODE LED is not blinking, press the SETUP MODE button again to switch to Setup Mode (registration possible).

3 When the message "Registration completed. Select [OK] to connect to the Base Station and start watching TV/video" appears, click [OK].

Make TV and Video Settings with the LocationFree™ Player

Configure the TV channels

1 Click anywhere inside the window, and then click [Settings] at the bottom right of the window.

Tip

[Settings] at the bottom right of the window appears only when you are connected to the base station. When you are not connected, click [Connect] at the bottom left, select the base station you want to set up from the list that appears, click [Properties], and then click [Channel Settings].

2 Select [Channel Settings] below [TV/Video Settings], and then configure all the settings.

1 Select [ON] or [OFF].

If you subscribe to cable TV, select the [ON] option.

2 Clear the check boxes for channels that you do not watch.

3 Click [OK] to close the [Settings] window.

Configure the TV on-screen remote (For the set top box (STB) connection in STEP 1)

* For the TV antenna connection in STEP 1, no need to configure the TV remote control.

1 Click anywhere inside the window, and then click [Settings] at the bottom right of the window.

2 Select [TV/Video Settings], [Remote Settings], and then [TV].

1 Select [External TV tuner], and then select an appropriate channel from the pull-down list.

2 Select the make and type of the connected device.

3 If the configuration above is correct, each time you click [Power], your TV should turn on or off.**

3 Click [OK] to close the [Settings] window.

Click anywhere inside the window, then click [TV]. Click [Remote], then the on-screen remote control appears.

Configure the on-screen remote for video (For the connection to other devices in STEP 1)

1 Click anywhere inside the window, and then click [Settings] at the bottom right of the window.

2 Select [TV/Video Settings], [Remote Settings], and then [Video 1] or [Video 2], then select the make and type of the connected device.

[Power] Select the make.

Select the type.

If the configuration above is correct, each time you click [Power], your device should turn on or off.**

** After clicking [Power], it takes five seconds or more for the device to respond. If it does not respond, make sure that the make and type are correct, and then try again.

3 Click [OK] to close the [Settings] window.

Click anywhere inside the window, then click the type of the connected device. Click [Remote], then the on-screen remote control appears.

Make Easy Setup Settings for the Base Station with Your Computer

If you are already connected via NetAV, disconnect before making the following settings.

1 To connect your computer to the base station with a router, put the base station into Setup Mode (See STEP 2).

2 Start LocationFree™ Player, and then click [Base Station Settings] in the [Base Station Selection] window.

Your web browser starts, and the [Base Station Settings] page opens.

3 Click [Enter].

4 Enter the user ID and password, and then click [OK].

User ID (User name) : lfx
Initial password: WebPassword printed on the label affixed to the side of the base station.

5 Click [Easy Setup] in the settings menu page.

* Follow the on-screen instructions to proceed to the NetAV check. In the [NetAV Setup] page, read the supplied Dynamic DNS Terms-of-Use Agreement and then click [Agree].

6 If [Success] appears in the [NetAV Check] page, click [Exit Setup]. The setup is complete.

Tip

If [Setup Incomplete] appears in the [NetAV Check] page, read the explanation on the NetAV check page, and then make the necessary settings.

Afterwards

Use the LocationFree™ Player to watch TV and videos.

For details on settings and operation of the LocationFree™ Player, refer to the supplied Operating Instructions (included on the supplied CD-ROM).

* You can view the Operating Instructions from the [Start] menu in Windows.
