

Note about Documents To Go

The [TIMEVALUE] function is described as being supported in the Help files of the Sheet To Go software. However, it is not supported by the version of Documents To Go supplied with your CLIE handheld.

If you open a spreadsheet file containing a function not supported by Sheet To Go software, you cannot edit the file, it may only be viewed.

For details, refer to “Functions Supported (Spreadsheet Functions and Formulas Supported)” in the Help files.

Note about PictureGear Pocket

Some JPEG format files that are non DCF-compliant file format are not supported on the PictureGear Pocket software.

If you use JPEG format files that are non DCF-compliant file format, convert the JPEG format file to a PGP format file, using PictureGear 4.6 Lite software.
