---

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

Only peripherals (computer input/output devices, terminals, printers, etc.) that comply with FCC Class B limits may be attached to this computer product. Operation with noncompliant peripherals is likely to result in interference to radio and television reception.

All cables used to connect peripherals must be shielded and grounded. Operation with cables, connected to peripherals, that are not shielded and grounded, may result in interference to radio and television reception.

## **FCC Part 68**

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the rear of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

This modem uses the USOC RJ-11 telephone jack.

A telephone plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. The REN is used to determine the quantity of devices which may be connected to the telephone line.

Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g. 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operations of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications in order to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact the Sony Customer Information Service Center at 1-888-4-SONY-PC (1-888-476-6972), or write to the Sony Customer Information Center, 12451 Gateway Blvd., Fort Myers, FL 33913, USA, or find Sony Customer Service on the Web at <http://www.sony.com/pcsupport>. If this equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment from the network until the problem is resolved. Repair of this equipment should be made only by a Sony Service Center or Sony authorized agent. For the Sony Service Center nearest you, call 1-888-4-SONY-PC (1-888-476-6972), or visit the Sony Online Support Web site at <http://www.sony.com/pcsupport>.

Connection to Party Line Service is subject to state tariffs. Contact the state public utility commission, public service commission, or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

Please use a surge arrester against electrical surges.

### **To set up the remote control**

Insert two AA batteries (supplied) into the remote control, as shown.

#### ***Inserting batteries into the remote control***

 If your remote control does not operate properly, the batteries may need to be replaced. When your remote control is not being used for extended periods of time, remove the batteries to avoid possible damage from battery leakage.

# Setting Up Your Computer

*You can set up your system quickly and easily with the instructions provided in this section. See the specifications sheet for your computer, on the Sony Online Support Web site at <http://www.sony.com/pcsupport>, for details about your computer's hardware configuration.*

## Connecting the Power Cord

The computer's power cord must be plugged into an AC power source, such as an AC wall outlet, surge protector, or Uninterruptible Power Supply (UPS), before you can establish communication with your wireless keyboard and wireless mouse.

**Your computer has the ability to be turned on its base and the power cord may become unplugged. You may lose data if your system loses power while software programs are running. Use the attached power cord clamp to avoid accidentally unplugging your computer.**

- 1 Plug the power cord into the AC input port on the back panel of the computer.
- 2 Use a coin to open the power cord clamp, and then insert the power cord.

### *Inserting the power cord into the power cord clamp*

- 3 Plug the power cord into a grounded AC wall outlet, surge protector, or Universal Power Supply (UPS).

*Connecting the power cord*

 Install your computer so you can easily reach the power outlet in the event of an emergency.

## ***Connecting the Wireless Keyboard***

Your VAIO® computer is supplied with a wireless keyboard. Before attempting to use the wireless keyboard, you must enable communication between the computer and the keyboard.

 When attempting to connect the wireless keyboard, confirm that the AA batteries (supplied) are properly inserted into the keyboard before your computer is turned on.

### ***To connect the wireless keyboard***

- 1 Turn on your computer.
- 2 Press the **CONNECT** button on the left panel of the computer.
- 3 Turn the wireless keyboard over.
- 4 Press the **CONNECT** button to activate communication between the wireless keyboard and the computer

### ***Connecting the keyboard***

***Additional information about the wireless keyboard***

The wireless keyboard requires unobstructed communication with the system unit for proper operation.

- ❑ Do not exceed a maximum distance of 2 feet between your VAIO® computer and your wireless keyboard.
- ❑ Confirm that the supplied AA batteries are properly installed.
- ❑ Press the **CONNECT** buttons located on the left panel of the computer and on the bottom of the keyboard, to establish communication between the equipment.
- ❑ Avoid using radio-controlled toys or equipment, CB radios, and other wireless devices in the area near your wireless keyboard. These devices may cause interference, causing your keyboard to stop working properly.
- ❑ Do not place metal furniture near your computer or wireless keyboard, as this may create interference, causing your keyboard to stop working properly.

## Connecting the Wireless Mouse

Your VAIO® computer is supplied with a wireless mouse. Before attempting to use the wireless mouse, you must enable communication between the computer and the mouse.

 When attempting to connect the wireless mouse, confirm that the AA batteries (supplied) are properly inserted into the mouse before your computer is turned on.

### ***To connect the wireless optical mouse***

- 1 Turn on your computer.
- 2 Press the **CONNECT** button on the left panel of the computer.
- 3 Turn the wireless mouse over.
- 4 Slide the power button to the **ON** position and press the **CONNECT** button.

### ***Connecting the mouse***

- 5 Place the optical mouse on an appropriate surface to enable tracking.

### ***Additional information about the wireless optical mouse***

The wireless optical mouse requires an ideal surface texture in order to provide precision pointing and tracking.

- ❑ Use surfaces such as plain paper, card stock, or fabric that have minimal repetitive patterns.
- ❑ Avoid surfaces such as mirrors, smooth glass, or magazines that have half-tone printing.

The wireless optical mouse requires unobstructed communication with the system unit for proper operation.

- ❑ Do not exceed a maximum distance of 2 feet between your VAIO® computer and your wireless mouse.
- ❑ Confirm that the supplied AA batteries are properly installed.
- ❑ Press the **Connect** buttons located on the left panel of the computer and on the bottom of the mouse, to establish the communication between the equipment.
- ❑ Verify the infrared receiver on the computer's front panel is free of obstructions that may prevent proper operation.
- ❑ Avoid using radio-controlled toys or equipment, CB radios, and other wireless devices in the area near your wireless mouse. These devices may cause interference, causing your mouse to stop working properly.
- ❑ Do not place metal furniture near your computer or wireless mouse, as this may create interference, causing your mouse to stop working properly.

## Connecting the Modem Cable

Your computer is equipped with a single modem line jack to connect the supplied modem cable to your telephone wall jack. To use your wall jack for your telephone and modem lines, purchase a “1-to-2” jack adapter device (splitter).

### To connect the telephone and modem cables

- 1 Unplug your telephone cable from the wall jack.
- 2 Insert the telephone cable into one of the RJ-11 jacks on a splitter device (optional).
- 3 Insert one end of the modem cable (supplied) into the other RJ-11 jack on the splitter device.
- 4 Insert the plug end of the splitter device into the wall jack.
- 5 Plug the modem cable into the modem line jack on the computer.

### Connecting the modem cable

Your computer has a protective sticker  covering the Ethernet port. Connect only 10BASE-T and 100BASE-TX cables to the Ethernet port. Using other cables or a telephone cable may result in an electric current overload that can cause a malfunction, excessive heat, or fire in the port. For help on connecting to a network, see your network administrator.

## Turning On Your Computer

Press the power button in from the right side, to turn the computer on. When you start your computer, it may detect new hardware and prompt you to restart your computer. Respond to this prompt immediately.

**Press the power button correctly to avoid damage to the computer.**

### *To turn on your computer*

Press the power button in this direction

## Registering Your Computer

Take advantage of Sony's commitment to quality customer support and receive these benefits by registering your computer:

- ❑ **Sony Customer Support** — Communicate with a Support Representative to troubleshoot problems you may be having with your computer.
- ❑ **Limited warranty** — Protect your investment. See the Limited Warranty Card for more details.

You are prompted to register your computer the first time you turn on the unit. Follow the on-screen instructions to complete the registration process. If you are not able to register your computer during the first session, you are provided with additional registration opportunities later.

## Turning Off Your Computer

Follow these steps when you are ready to turn off your computer for an extended period of time.

**To avoid loss of data, do not use the Power button to turn off the computer.**

### To turn off your computer

- 1 Click **Start** in the Windows® taskbar, then select **Turn Off Computer**.  
The **Turn Off Computer** dialog box appears.
- 2 Select the **Turn Off** option.

 Respond to any prompts about saving your documents.

- 3 Wait for your computer to turn off automatically—the power indicator light turns off.
- 4 Turn off any peripheral devices connected to your computer.

 If you plan to stop using your computer for a short period of time, use Stand by mode.

### About the power button

If your system stops responding, press and hold the Power button for more than six seconds to force your system to shut down. You may need to repeat this procedure if your system does not shut down on the first attempt.

# Troubleshooting

*This section describes how to troubleshoot common problems. Your computer may not be equipped with all of the features or software discussed in this section, depending on the computer configuration purchased.*

## **About VAIO Computer Functions**

### ***My computer does not start.***

- ❑ Verify that the computer is plugged into a power source and that it is turned on. Check that the power indicator is lit on the front panel of the computer.
- ❑ Confirm that a disk is not in the floppy disk drive\* (unless you are using a bootable floppy disk).
- ❑ Confirm that a CD is not in an optical drive (unless you are using a bootable CD).
- ❑ Confirm that the power cord and all cables are connected firmly.
- ❑ If you plugged the computer into a power strip or Uninterruptible Power Supply (UPS), make sure the power strip or UPS is turned on and working.
- ❑ Verify that the monitor is plugged into a power source and turned on.  
If your system has a built-in monitor, confirm that it is plugged into an appropriate power source and that the system is turned on.
- ❑ Verify that the brightness or contrast control dials are adjusted correctly. (See the manual supplied with your display for details.)
- ❑ Confirm that the computer is not in Stand by mode by pressing any key on the keyboard.

---

\* Certain VAIO computers are not equipped with a floppy disk drive. You can purchase this equipment separately.

## **What can I do if my computer or software stop responding?**

You can try to locate and close the software program that has stopped responding.

- 1 Press the **Ctrl+Alt+Delete** keys. The **Windows Task Manager** window appears.
- 2 From the Applications tab, locate the software program that has the status message, “**Not responding.**”
- 3 Select the software program that has a **Not Responding** status and click **End Task**. Windows attempts to close the program.

If your computer does not respond or the software program does not close:

- 1 Save and close any open files, if possible.
- 2 Press the **Alt+F4** keys. The **Shut Down Windows**\* window appears.
- 3 Click the drop-down list box and select **Restart**.
- 4 Click **OK**. The computer turns off and restarts.

If the **Shut Down Windows** window does not appear:

- 1 Press **Ctrl+Alt+Delete**. The **Windows Task Manager** window appears.
- 2 Click **Shut Down**.
- 3 Restart your computer.

If your computer still does not respond and you cannot restart, shut down your computer by pressing and holding the power button for more than six seconds.

If the software program continues to stop responding or causes your computer to stop responding, contact the software publisher or designated technical support provider.

**Pressing and holding the power button for more than six seconds may result in the loss of data from files that are currently open.**

---

\* The window text displayed may vary, depending on the Microsoft Windows XP operating system installed on your computer.

### ***Why doesn't my mouse work properly?***

- ❑ Confirm that the mouse is plugged securely into the mouse port. If you are using a USB mouse, verify that the mouse is plugged securely into the appropriate USB port.
- ❑ Save and close all open software programs. Turn off your computer, wait approximately 10 seconds, and then restart your computer.
- ❑ The mouse driver(s) may not be working properly.

### ***Using a wireless optical mouse***

If you are using a wireless optical mouse:

- ❑ Confirm that the supplied AA batteries are properly installed.
- ❑ Press the **CONNECT** button on the mouse and the computer to reestablish the connection between the two devices.
- ❑ Verify the infrared receiver on the computer's front panel is free of obstructions that may prevent proper operation.
- ❑ Avoid using radio-controlled toys or equipment, CB radios, and other wireless devices in the area near your wireless mouse. These devices may cause interference, causing your mouse to stop working properly.
- ❑ Do not place metal furniture near your computer or wireless mouse, as this may create interference, causing your mouse to stop working properly.

### ***Why doesn't my keyboard work properly?***

- ❑ Check that the keyboard\* is securely plugged into the keyboard port.
- ❑ Save and close all open software programs. Turn off your computer, wait approximately 10 seconds, and then restart your computer.

### ***Using a wireless keyboard***

- ❑ If you are using a wireless keyboard:
  - ❑ Confirm that the supplied AA batteries are properly installed. For proper installation of the AA batteries, see the documentation supplied with your equipment.
  - ❑ Press the **CONNECT** button on the keyboard to reestablish the connection between the two devices.
  - ❑ Verify the infrared receiver on the computer's front panel is free of obstructions that may prevent proper operation.
  - ❑ Avoid using radio-controlled toys or equipment, CB radios, and other wireless devices in the area near your wireless keyboard. These devices may cause interference, causing your keyboard to stop working properly.
  - ❑ Do not place metal furniture near your computer or wireless keyboard, as this may create interference, causing your keyboard to stop working properly.
