- Searching by using your voice [9]

Basic Operations [10]

- Using the remote control [11]
- Home menu [12]
- Using the DISCOVER button [13]
- Using the Action Menu [14]
- Selecting devices that are connected to the TV [15]
- Identifying the status of the TV through illumination [16]
  - Illumination LED [17]
  - Illumination at the bottom of the screen [18]

Support Site [19]

Watching TV [20]

- Watching TV programs [21]
- Using the program guide [22]
- Using interactive broadcast TV services [23]
- Watching in 3D (3D models only) [24]
- Understanding the basics of 3D TV (3D models only) [25]
- Preparing your 3D glasses (3D models only) [26]
- Watching TV in 3D (3D models only) [27]
- Enjoying social networking services while watching TV [28]

Using the TV with Other Devices [29]
USB devices [30]
- Playing content stored on a USB device [31]
- Information about USB devices used for storing photos and music [32]
- Supported files and formats [33]
  - Photos [34]
  - Music [35]
  - Videos [36]
  - Audio sampling rates (for videos) [37]
  - External subtitles [38]
- Blu-ray and DVD players [39]
  - Connecting a Blu-ray or DVD player [40]
  - Watching Blu-ray and DVD discs [41]
- Smartphones and tablets [42]
  - Displaying the screen of a smartphone/tablet on the TV using the Screen mirroring function [43]
  - Sharing photos/music/videos [44]
  - Using the “Video & TV SideView” app with your smartphone/tablet [45]
- Computers, cameras, and camcorders [46]
  - Connecting a computer and viewing stored content [47]
  - Connecting a camera or camcorder and viewing stored content [48]
  - Computer video signal specifications [49]
- Audio system [50]
  - Connecting an audio system [51]
  - Adjusting audio system-related settings [52]
- Bluetooth devices [53]
  - Connecting a Bluetooth device [54]
  - Supported Bluetooth profiles [55]
- Sony wireless subwoofer (optional) (Sony wireless subwoofer supported models only) [56]
  - Connecting a wireless subwoofer (optional) [57]
  - Adjusting wireless subwoofer-related settings (optional) [58]
- BRAVIA Sync-compatible devices [59]
  - BRAVIA Sync overview [60]
  - Using features available for BRAVIA Sync-compatible devices [61]
  - Adjusting BRAVIA Sync settings [62]
Connecting to a Network [67]
- Connecting to a network using a LAN cable [68]
- Connecting to a network using a wireless connection [69]
- Using Wi-Fi to connect the TV to your network [70]
- Using Wi-Fi Direct to connect to the TV (no wireless router required) [71]
- Home network features [72]
- Adjusting home network settings [73]
- Playing content from a computer [74]
- Playing content from a media server [75]
- RVU statement (RVU compliant models only) [76]

Settings [77]
- Configuring the TV [78]
  - [TV] [79]
  - [Network & Accessories] [80]
  - [System Preferences] [81]
  - [Personal] [82]
  - [Expert panel settings](only models equipped with an OLED panel) [83]
- Setting a timer [84]

Troubleshooting [85]
- Start here [86]
- Self diagnostics [87]
- Software updates [88]
- If a full reset (restart) of the TV is required [89]
- Picture (quality)/screen [90]
- Picture quality is not as good as viewed at the store. [91]
- Distorted picture. [92]
- The screen flickers. [93]
- No color/Dark picture/Color is not correct/Picture is too bright. [94]
- Dark screen. How to brighten the screen. [95]
- Color is not correct. How to adjust the color tone. [96]
- Screen format/wide mode changes automatically. [97]
- Suddenly the picture becomes small. [98]
- Black bands appear at the edges of the screen. [99]
- A black box appears on the screen. [100]
- There are banners/tickers at the top or bottom of the screen. [101]
- 3D pictures are not displayed. The 3D effect is weak. (3D models only) [102]
- Black bars appear on both sides of the screen when watching 3D pictures. (3D models only) [103]
- You cannot turn off 3D display while watching 3D content. (3D models only) [104]
- The message [3D signal has been detected.] automatically appears when 3D signal is detected. (3D models only) [105]
- A message about an app asking for permission to access a TV function is displayed. [106]
- The screen becomes darker after a certain period of time. (only models equipped with an OLED panel) [107]
- The message [Panel refresh did not finish] is displayed. (only models equipped with an OLED panel) [108]
- You are concerned about an image retention. (only models equipped with an OLED panel) [109]
- A white line appears on the screen. (only models equipped with an OLED panel) [110]
- Panel refresh does not complete. (only models equipped with an OLED panel) [111]
- Keyboard [112]
- Broadcast reception [113]
- Check these things first to troubleshoot your TV reception. [114]
- Block noise or an error message appears and you cannot watch broadcasts. [115]
- Ghosting or double images appear. [116]
- Only snow noise or a black picture appears on the screen. [117]
- There is picture or sound noise when viewing an analog TV channel. [118]
- Some channels are blank. [119]
- Poor reception or poor picture quality with digital broadcasts. [120]
- You cannot view digital channels. [121]
- You cannot receive or select channels. [122]
- Some digital cable channels are not displayed. [123]
- Broadcast HD formats have poor quality. [124]
- Sound [125]
- No sound but good picture. [126]
- **Audio noise.** [127]
- **No audio or low audio with a home theater system.** [128]
- **Distorted sound.** [129]
- **Headphone volume cannot be adjusted.** [130]
- **Network (Internet/home)/apps** [131]
  - The network name (SSID) of the wireless router (access point) to which you want to connect is not displayed. [132]
  - Sometimes video streaming quality is poor. [133]
  - Wi-Fi connection is lost or intermittent. [134]
  - Certain Internet video content displays a loss of detail. [135]
  - Good picture quality but no sound on Internet video content. [136]
  - Apps are inaccessible. [137]
- **The TV cannot access the Internet when IPv6 is set.** [138]
- **Your TV cannot connect to the server.** [139]
- **A message appears stating that the TV cannot connect to your network.** [140]
- **You can connect to the Internet, but not to Google services.** [141]
- **You cannot add a Google account.** [142]
- **Remote control/accessories** [143]
  - The remote control does not operate. [144]
- **You cannot turn the Active 3D Glasses on.** (3D models only) [145]
- **The LED indicator on the Active 3D Glasses blinks.** (3D models only) [146]
- **Power** [147]
  - The TV turns off automatically. [148]
  - The TV turns on automatically. [149]
  - After unplugging the TV and plugging it in again, the TV does not turn on even if you press the power button on the remote control or the TV. [150]
- **Connected devices** [151]
  - No picture from a connected device. [152]
  - You cannot select a connected device in the Home Menu. [153]
- **Certain programs on digital sources display a loss of detail.** [154]
- **Photo images or folders take time to display.** [155]
- **You cannot find a connected BRAVIA Sync HDMI device.** [156]
- **You cannot control a second AV receiver.** [157]
- **An external device (such as a set-top box or AV receiver) cannot be controlled via the IR Blaster.** (IR Blaster compatible models only) [158]
- Some media files in the USB device or server are not displayed..[159]
- The TV cannot be found by a Wi-Fi Direct device..[160]
- Operation cuts out, or a device does not work..[161]
- What kind of devices can be connected using the Screen mirroring function?..[162]
- The TV cannot connect to a Miracast device or Screen mirroring compatible device..[163]
- Video or sound sometimes cuts out..[164]
- Some paid content cannot be played..[165]
- The TV cannot be turned on and controlled by using the “Video & TV SideView” app when [Remote start] is enabled..[166]
- The TV does not appear on or cannot be registered with the “Video & TV SideView” app..[167]
- Illumination LED..[168]
- The illumination LED or bottom of the screen sometimes lights up..[169]
- You want to disable the illumination LED so that it does not light up or blink..[170]

Help Guide versions

There are two versions of the Help Guide for your TV: the Built-in Help Guide and the Online Help Guide. To view the Online Help Guide, your TV must be connected to the Internet. To switch between the Built-in and Online versions, use the switch button (A) at the top of the screen. You can check which Help Guide is currently displayed by looking at the title at the top of the screen.

1. Connect the TV to the Internet.
2. Select (A) to switch the Help Guide version.

Note

- To use the latest features described in the Help Guide, you may need to update the TV's software. For details about software updates, see the Software updates page.
- The images and illustrations used in the Help Guide may differ depending on your TV model.
- Design and specifications are subject to change without notice.

Hint

- You can also use the “Video & TV SideView” app to view the Online Help Guide.
- To see if your TV is equipped with one of the functions described in the Help Guide, refer to the paper manual or a Sony product catalog.
- This Help Guide is written for all regions/countries. Some descriptions contained in this Help Guide do not apply to some regions and countries.

Related topics

---

Downloading apps from the Google Play

You can download apps from the Google Play to the TV, just like you do with smartphones and tablets.

**Note**

- You can only download apps that are compatible with TVs. They may differ from apps for smartphones/tablets.
- An Internet connection and Google account are required to download apps from the Google Play.

**Hint**

- If you do not have a Google account or want to create a shared account, create a new account by accessing the following website.
  https://accounts.google.com/signup
  The website above may vary depending on your region/country. It is also subject to change without notice. For details, refer to the Google homepage.
- We recommend that you create a Google account on a computer or mobile device.

1. **Press the HOME button, then select [Google Play Store] under [Apps].**

2. **To install an app, select an app you want to download. The app will start downloading.**

After downloading, the app is automatically installed and added. Its icon appears in the Home Menu, allowing you to launch it.
About paid apps

There are free apps and paid apps in the Google Play. To purchase a paid app, a prepaid Google Play gift card code or credit card information is required. You can purchase a Google Play gift card from various retailers.

To delete an app

1. Press the HOME button, select [Google Play Store] under [Apps], and then select [My Apps].

2. Select an app to be deleted, and then uninstall the app.

Related topics

- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network
- Moving apps to a USB memory device

Moving apps to a USB memory device

You can move downloaded apps to a USB memory device to increase the space available in the TV.

Note

- When you format a USB memory device, all data saved in the USB memory device will be deleted. Back up your important data before formatting.
- Performing this procedure formats the USB memory device for exclusive use with the TV. Therefore, you may be unable to use the USB memory device with a computer, etc.
- Some apps cannot be moved to a USB memory device.

1. Connect a USB memory device to the TV.

2. Press the HOME button, select [Settings] — [Storage & reset] — the desired USB memory device.
Format it as an internal storage device.

When formatting is finished, press the HOME button, then select [Settings] — [Apps].

Select the app that you want to move to the USB memory device.

Select the USB memory device from the used storage. The app is moved to the USB memory device.

**Hint**

- Repeat steps 4 to 6 to move additional apps to the USB memory device.

**To remove a USB memory device**

Press the HOME button, select [Settings] — [Storage & reset] — the desired USB memory device, and then select the option to remove it.

**Note**

- The USB memory device is used only for saving apps. To use the USB memory device for other purposes, you must format it again.
- If you delete an app in the USB memory device using a computer, you will be unable to launch it from the TV.
- If you remove a USB memory device from the TV, you will be unable to use the apps that were moved to the USB memory device.
- You cannot specify a USB memory device as the installation location of an app. First install the app on the TV as normal, and then move it to the USB memory device.

---

**Viewing Internet media**

You can use video streaming services such as YouTube and Netflix to watch Internet content. The available services vary depending on your country and region. You can launch these services by selecting their tiles in the Home Menu.

**Note**
An Internet connection is required to watch Internet content.

**Related topics**

- Enjoying safe apps and video streaming services (Security & restrictions)
- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network

**Enjoying content from your mobile device on the TV with Google Cast**

Google Cast allows you to wirelessly cast content from your favorite websites and apps to your TV, directly from your computer or mobile device.

1. Connect a mobile device such as a smartphone or tablet to the same home network that the TV is connected to.

2. Launch a Google Cast supported app on the mobile device.

3. Select the (cast) icon in the app.
   The screen of the mobile device is displayed on the TV.

**Note**

- An Internet connection is required to use Google Cast.

**Related topics**

- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network

[8] Getting Started | Introducing Android TV

**Enjoying safe apps and video streaming services**
(Security & restrictions)

You can ensure safe use of the TV by setting installation restrictions on apps that are downloaded from unknown sources, or age restrictions on programs and videos.

1. Press the HOME button, then select [Settings] — then options such as [Security & restrictions] or [Parental lock (Broadcast)].

**Note**

- If you change the [Security & restrictions] settings, your device and personal data are more vulnerable to attack by unknown apps from sources other than Play Store. You agree that you are solely responsible for any damage to your device or loss of data that may result from using these apps.

**Hint**

- Other separate restrictions may be available depending on the app. For details, refer to the app's help guide.

---

**Searching by using your voice**

The TV includes a Voice search feature that enables you to search the Internet for content you're looking for with your voice. Voice search allows you to quickly input search queries without the use of the on-screen keyboard.

To search, simply press the button and speak into the microphone built into your remote control.

For details, please refer to Using the remote control.

---

[10] Getting Started

**Basic Operations**

Using the remote control

Home menu
Using the DISCOVER button

Using the Action Menu

Selecting devices that are connected to the TV

Identifying the status of the TV through illumination

Using the remote control

You can operate many of the TV's features by using the \( \uparrow / \downarrow / \leftarrow / \rightarrow \) and \( \odot \) buttons.

For descriptions of the remote control buttons, refer to the Reference Guide.

1. Use the \( \uparrow, \downarrow, \leftarrow \) and \( \rightarrow \) buttons to “focus” on the desired item.

2. Press the center of the \( \odot \) button to select the item currently in focus.

To return to the previous screen

Press the BACK button.

Using Voice search (Voice search supported models only)

For Voice search supported models, the remote control has a built-in microphone. By speaking into the microphone, you can search for content on the Internet.
1 Press the button. You will then be taken directly to the Voice search screen.

2 The LED on the remote control will light up indicating that the Voice search function has been activated; then speak into the built-in microphone.

When your voice is not being recognized

When your voice is not being recognized, make sure to activate the button on the remote control with the button, or register the remote control with the button to your TV.

To confirm these settings, press the HOME button, then select [Settings] — [Voice Remote Control].

Note

- An Internet connection is required to use Voice search.
- The type of remote control supplied with the TV, and the availability of a remote control with a built-in microphone varies depending on your model/region/country. An optional remote control is available in some models/regions/countries.

Related topics

- The remote control does not operate.
- Connecting to a Network

[12] Getting Started | Basic Operations

Home menu

The Home Menu allows you to search for content, provides content recommendations, and provides access to apps and settings. Available items vary depending on your region/country and the current screen.
Search for various content by entering a search keyword using the on-screen keyboard or by voice. The availability of the remote control with a built-in microphone depends on your model/region/country.

1. Press the HOME button.
2. Select the microphone icon at the top of the screen.
3. Enter a search keyword by speaking into the microphone on the remote control, or by pressing the button and then using the on-screen keyboard.

Browsing for content, apps, or other items

1. Press the HOME button.
2. Select the desired item from the desired category.

Category list

Recommendations
This category shows content based on your history.

[Featured apps], [Apps] and [Games]
These categories provide access to apps (such as Video, Album, Music, Photo Sharing Plus, and Screen mirroring) and games.

[Inputs]
You can select the input source from the list of connected devices and jacks (sockets), such as HDMI.

[Settings]
This category includes [Settings], [Network Settings], [Timers], and [Help].

Hint
- By connecting the TV to the Internet, you can access various network services and features.

Related topics
- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network
Using the DISCOVER button

You can use the DISCOVER button to search for content (such as TV programs and Internet content). The content that displays when pressing the DISCOVER button varies depending on your model/region/country.

1. Press the DISCOVER button.
2. Move the focus up or down to select the desired category.
3. Move the focus left or right to select the desired item.
4. Press the button to launch the selected item.

To change the settings of this function

1. Press the DISCOVER button.
2. Move the focus down to the [Settings] category.
3. Select the desired item to change the settings.

Available options

[Show/Hide categories]
Select content categories to be shown in DISCOVER. You cannot hide [Settings].
You can hide [Top Picks] depending on your TV model.

[Reorder categories]
Select a content category to reorder.
[Add channels to Favorites]
Add your favorite channels to DISCOVER.

[Add keyword categories]
Add keywords to create your own custom content category.

[Display size]
Select the display size of the menu.

[Sort TV channels]
Select the type of TV program sorting.

Note
- Some options may not be available depending on your model/region/country.

Using the Action Menu

By pressing the ACTION MENU button, a menu appears and provides quick access to the functions that are available for the currently displayed screen, such as picture adjustments, sound adjustments, volume adjustment for a connected device (such as headphones), and display/audio settings. The items in the menu differ depending on the selected screen.

1. Press the ACTION MENU button.
2. Move the focus left or right to select the desired category.
3. Move the focus up or down to select the desired item.
4. Press the button to launch the selected item.
Selecting devices that are connected to the TV

To use devices that are connected to the TV such as a Blu-ray/DVD player, or to watch TV programs after using such devices, you must switch the input.

1 Press the INPUT button repeatedly to select the connected device.

Hint

- You can switch to TV broadcasting by simply pressing the TV button on the remote control.

Switching from the Home Menu

1 Press the HOME button, then select the input source from [Inputs].

Identifying the status of the TV through illumination

**Illumination LED**

**Illumination at the bottom of the screen**

You can identify the status of the TV by looking at how the illumination LED lights up.

| White “on” or “blinking” | • When the screen is off  
| | • When the TV is turning on  
| | • When receiving signals from the remote control

Watching TV

Watching TV programs
Watching in 3D (3D models only)
Enjoying social networking services while watching TV
Watching TV programs

Using the program guide

Using interactive broadcast TV services

Using the program guide

You can quickly find your preferred programs.

(This function is available only for digital broadcasts and depends on your region/country/settings.)

1. Press the GUIDE button to display the digital program guide.

2. Select a program to watch.
   The details of the program are displayed.

3. Select [View] to watch the program.

To use optional functions

1. While the program guide is displayed, press the ACTION MENU button and then select the desired item.

Using interactive broadcast TV services

To use Ginga service (Ginga models only)

Ginga models have [Channel setup & Ginga] in [Settings] — [Channels].

Ginga (also known as DTVi) Interactivity provides extended programming content information such as sports statistics, soap opera chapters and characters, publicity, merchandising, weather information.
and news, through high-quality digital text and graphics, along with advanced options.

If available in your home, Ginga Interactivity also allows you to communicate with the broadcaster through the return channel, in scenarios such as polls, quizzes and games. These services are provided by broadcasters.

(This function is only available for digital broadcasts and may not be available in your region/country.)

1. Select a digital channel that provides Ginga features.

Java is a trademark of Oracle and/or its affiliates.

Note

- Java technology is supported by Ginga models only.

Watching in 3D (3D models only)

Understanding the basics of 3D TV (3D models only)
Preparing your 3D glasses (3D models only)
Watching TV in 3D (3D models only)

[25] Watching TV | Watching in 3D (3D models only)

Understanding the basics of 3D TV (3D models only)

3D models have [3D settings] in [Settings] — [Picture & Display].
Recommended viewing distance for a 3D image

If the viewing distance is not appropriate, a double image may appear. Sit at a distance of at least 3 times the height of the screen away from the TV. For the best viewing experience, we recommend that you sit directly in front of the TV.

Hint

- There are two types of 3D Glasses: Passive and Active. Refer to the specifications in the Reference Guide to see which type of 3D Glasses the TV supports.

TV and Active 3D Glasses communication range

Active 3D glasses communicate with the TV to show you images in 3D.

Your viewing position needs to be within the proper range. See the following diagrams. The working distance depends on obstacles (people, metal, walls, etc.) and/or electromagnetic interference.

- Overhead view

  (A) 120°
  (B) 1-6 m (3-20 ft.)

- Side view
(A) 45°
(B) 1-6 m (3-20 ft.)
(C) 30°

Note
- Recommended viewing angle and distance may vary depending on the TV’s location and room conditions.

Caring for your glasses
- Wipe the glasses gently with a soft cloth.
- Stubborn stains may be removed with a cloth slightly moistened with a solution of mild soap and warm water.
- If using a chemically pretreated cloth, be sure to follow the instructions provided on the package.
- Never use strong solvents such as a thinner, alcohol, or benzene for cleaning.

[26] Watching TV | Watching in 3D (3D models only)

Preparing your 3D glasses (3D models only)

3D models have [3D settings] in [Settings] — [Picture & Display].

There are two types of 3D Glasses: Passive and Active. Refer to the specifications in the Reference Guide to see which type of 3D Glasses the TV supports.
For Passive 3D Glasses
If Passive 3D Glasses are supplied with your TV, use them. If no glasses are supplied, purchase a pair of Passive 3D Glasses, model TDG-500P. You can watch in 3D by just putting the Passive 3D Glasses on.

For Active 3D Glasses
If Active 3D Glasses are supplied with your TV, use them. If no glasses are supplied, purchase a pair of Active 3D Glasses, model TDG-BT500A. Before using the Active 3D Glasses for the first time, you need to register them to your TV. Follow the steps below.

1. Remove the battery’s insulation sheet.

2. Turn the TV on, then hold the glasses within 50 cm (1.6 ft.) of the TV.

3. Press and hold the (Power) button/indicator on the glasses for 2 seconds.

The Active 3D Glasses turn on and registration starts (the (Power) button/indicator blinks green and yellow). When registration is finished, a message appears in the TV screen for 5 seconds, and the indicator lights up in green for 3 seconds.

If registration fails, the Active 3D Glasses will turn off automatically. In this case, repeat the procedure above.

4. Put the Active 3D Glasses on.
From the next time, you can use the Active 3D Glasses by just turning them on. To turn them off, press and hold the (Power) button/indicator on the glasses for 2 seconds. To turn them on again, press the (Power) button/indicator.

**Hint**

- To use the Active 3D Glasses with another TV, you need to register the glasses to that TV.
  Perform the procedure above from Step 2.

**Related topics**

- Understanding the basics of 3D TV (3D models only)
- Watching TV in 3D (3D models only)

---

**Watching TV in 3D (3D models only)**

3D models have [3D settings] in [Settings] — [Picture & Display].

You can experience powerful 3D entertainment, such as stereoscopic 3D games and 3D Blu-ray Discs.

To watch in 3D, connect a 3D-compatible device directly to the TV via an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

1. Prepare the 3D Glasses.
2. Display the 3D content on the TV screen.
3. Put the 3D Glasses on.
   You should now be able to watch 3D images. If no 3D effect is achieved, perform the following steps.
4 Press the ACTION MENU button, then select [3D].

5 Select the [3D display] mode to suit the displayed content. Depending on the input signal or format, [3D (Side by Side)]/[3D (Over-Under)] may not be selectable.

Hint

- In addition to the [3D display] mode, you can use various 3D options in [3D settings]. Press the HOME button, then select [Settings] — [Picture & Display] — [3D settings].

Note

- The 3D effect may be less pronounced if the ambient temperature is low.
- If [Motionflow] in [Picture adjustments] is set to something other than [Off], the process to minimize screen flicker may affect the smooth movement of the picture. In this case, press the ACTION MENU button, then select [Picture adjustments] — [Advanced settings] — [Motionflow] — [Off]. (For [Motionflow] compatible models only.)

[28] Watching TV

Enjoying social networking services while watching TV

You can view tweets that mention the programs you are watching.

1 Connect to a broadband Internet connection.

2 While watching a program, press the ACTION MENU button, then select a tweet.
   The Social Viewing screen appears.
To change the scroll direction between horizontal and vertical

While displaying the Social Viewing screen, press the ACTION MENU button, select [Preferences] — [Change view], then select the desired setting.

Playing content stored on a USB device

Connecting a USB device

Connect a USB storage device to the USB port of the TV to enjoy photo, music, and video files stored on the device.

(A) USB storage device

Enjoy photos/music/movies stored on a USB device

You can enjoy photos/music/movies stored on a USB device on the TV screen.

1. If the USB device connected to the TV has a power switch, turn it on.

2. Press the HOME button, then select the desired item.
   Select [Album] to view photos, [Music] to play music, and [Video] to play movies.

3. Press the button and select [Folders] from the menu that is displayed.

4. Browse the list of folders and files and select the desired file.
   Playback starts.

To check the supported file formats

- Supported files and formats

Note

- All USB ports on the TV support Hi-Speed USB. The blue USB port supports SuperSpeed (USB 3.0). USB hubs are not supported.

- While accessing the USB device, do not turn off the TV or USB device, do not disconnect the USB cable, and do not remove or insert recording media. Otherwise, data stored on the USB device may be corrupted.

- Depending on the file, playback may not be possible, even when using the supported formats.
Information about USB devices used for storing photos and music

- The USB ports on the TV support FAT16, FAT32, exFAT, and NTFS file systems.
- When connecting a Sony digital still camera to the TV with a USB cable, USB connection settings on your camera need to be set to “Auto” or “Mass Storage” mode.
- If your digital still camera does not work with your TV, try the following:
  - Set the USB connection settings on your camera to “Mass Storage”.
  - Copy the files from the camera to a USB flash drive, then connect the drive to the TV.
- Some photos and movies may be magnified, resulting in low picture quality. Depending on the size and aspect ratio, images may not be displayed in full screen.
- It may take a long time to display a photo, depending on the file or settings.
- In no event shall Sony be liable for recording failure or any damage or loss of recorded contents caused or associated with the TV’s malfunction, the USB device’s malfunction, or any other problem.

Blu-ray and DVD players

Connecting a Blu-ray or DVD player
Watching Blu-ray and DVD discs
Connecting a Blu-ray or DVD player

Connect a Blu-ray/DVD player to the TV.

**HDMI connection**

For optimum picture quality, we recommend connecting your player to the TV using an HDMI cable. If your Blu-ray/DVD player has an HDMI jack (socket), connect it using an HDMI cable.

(A) Blu-ray/DVD player
(B) HDMI cable (not supplied)*

* Be sure to use an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

- If the device has a DVI jack (socket), connect it to the HDMI (with AUDIO IN) port through a DVI - HDMI adaptor interface (not supplied), and connect the device’s audio out jacks (sockets) to HDMI 3 AUDIO IN / HDMI 1 AUDIO IN.
  
  Availability depends on your model/region/country. Refer to the Reference Guide to check if your TV supports HDMI 3 AUDIO IN / HDMI 1 AUDIO IN.

**Component video connection**

Availability depends on your model/region/country.

If your Blu-ray/DVD player has component video jacks (sockets), connect them to the TV using a component video cable and an audio cable.
(A) Blu-ray/DVD player
(B) Component video cable (not supplied)
(C) Audio cable (not supplied)

Composite connection
Availability depends on your model/region/country.

If your Blu-ray/DVD player has composite jacks (sockets), connect them using a composite video/audio cable.

(A) Blu-ray/DVD player
(B) Composite video/audio cable (not supplied)

If using an Analog Extension cable
Availability depends on your model/region/country.
[A] Blu-ray/DVD player
[B] Analog Extension cable (supplied)*
[C] RCA Cable (not supplied)

* Whether the Analog Extension cable is supplied depends on your model/region/country.

- Watching Blu-ray and DVD discs

[41] Using the TV with Other Devices | Blu-ray and DVD players

Watching Blu-ray and DVD discs

You can watch content from Blu-ray/DVD discs or other content supported by your player on the TV.

1. Turn on the connected Blu-ray/DVD player.

2. Press the INPUT button repeatedly to select the connected Blu-ray/DVD player.

3. Start playback on the connected Blu-ray/DVD player.

Hint

- If you connect a BRAVIA Sync-compatible device with HDMI connection, you can operate it by simply using the TV’s remote control.
Using the TV with Other Devices | Smartphones and tablets

Displaying the screen of a smartphone/tablet on the TV using the Screen mirroring function

Sharing photos/music/videos

Using the “Video & TV SideView” app with your smartphone/tablet

You can display the screen of a mobile device on the TV to view photos, videos or websites.

The “Screen mirroring” feature uses Miracast technology to display the screen of a compatible device on the TV. A wireless router (access point) is not necessary to use this function.

1 Press the INPUT button, then select [Screen mirroring].

2 Operate your Screen mirroring compatible device to connect to the TV.
When the device is connected to the TV, the screen displayed on the device will also be displayed on the TV.

For details, refer to the instruction manual of your device.

Note

- While the standby screen for the Screen mirroring is displayed, the wireless connection between the TV and your wireless router (access point) is disconnected, therefore communication via the Internet is stopped.

Hint

- You can configure the advanced settings of Screen mirroring by pressing the HOME button, then selecting [Settings] — [Network] — [Wi-Fi Direct] — [Advanced settings].

Related topics

- Using Wi-Fi Direct to connect to the TV (no wireless router required)

[44] Using the TV with Other Devices | Smartphones and tablets

Sharing photos/music/videos

Gather around the TV with your family or friends, connect your mobile devices to the TV and view your favorite photos/videos on the large screen TV, or play your favorite tracks through the TV speakers.

1. Press the HOME button, then select [Photo Sharing Plus].

2. Follow the on-screen instructions to connect each mobile device to the TV.

3. Open the web browser on your mobile device and follow the on-screen instructions to
Follow the on-screen instructions on your mobile device to view photos or play music/videos on the TV, or save photos/videos displayed on the TV.

Note

- If the TV uses the 5GHz band to connect to a wireless router (or access point), the connection is disconnected when this function is started.

- Up to 10 mobile devices can be connected to the TV at the same time. To connect another device when 10 devices are already connected, disconnect an unnecessary device, then connect the other device.

- The default browser for Android 2.3 or later is supported.

- The default browser for iOS is supported, however, some functions cannot be used depending on the version of your iOS.

- iOS devices cannot upload music to the TV.

Related topics

- Using Wi-Fi Direct to connect to the TV (no wireless router required)

Using the “Video & TV SideView” app with your smartphone/tablet

You can install the “Video & TV SideView” app in your mobile device and use the mobile device to control the TV. To use your mobile device as a TV remote control, register it to the TV as a remote device. (Registration is required only for the first time.)

(A) Wi-Fi or Ethernet
Available operations when using the “Video & TV SideView” app

- Powering on and controlling the TV as a remote control
- Entering text using the mobile device’s keyboard

For comprehensive information about the “Video & TV SideView” app, refer to the following website:

http://info.tvsideview.sony.net

For details on how to use the “Video & TV SideView” app, refer to the app’s help guide.

Hint

- You can search and download the “Video & TV SideView” app from here:
  - Google Play (for Android OS)
  - App Store (for iOS)

Registering a mobile device to the TV

Mutual registration (the following steps) is required only for the first time.

1. Connect the TV to your home network.
2. Connect the mobile device to the home network that the TV is connected to or search for the TV from the list of available Wi-Fi Direct devices.
3. Launch the “Video & TV SideView” app on the mobile device.
4. Select the TV from the detected device list, then perform the required operation on your device.

Hint

- You can also connect the “Video & TV SideView” app to the TV using Wi-Fi Direct. Press the
HOME button, enable the TV’s Wi-Fi Direct function by selecting [Settings] — [Network] — [Wi-Fi Direct] — [Wi-Fi Direct].

To turn on the TV from “Video & TV SideView” on your mobile device

1. To enable [Remote start], press the HOME button, then select [Settings] — [Network] — [Remote start].

Standby power consumption increases if this option is enabled.

Note

- The name and available functions of “Video & TV SideView” are subject to change.

To connect a computer

Use an HDMI cable to connect your computer to the TV.

(A) Computer
(B) HDMI cable (not supplied)*

* Be sure to use an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

To check the video signal specifications

- Computer video signal specifications

To view content stored on a computer

After connecting the computer, press the HOME button, then select the input the computer is connected to.

To check the supported file formats

- Supported files and formats

Note

- For optimum picture quality, we recommend that you set your computer to output video signals according to one of the settings listed in “Computer video signal specifications”.
- Depending on the connection status, the image may be blurred or smeared. In this case, change the computer’s settings and select another input signal from the “Computer video signal specifications” list.
To connect a camera or camcorder

Connect your Sony digital still camera or camcorder using an HDMI cable. Use a cable that has an HDMI mini jack (socket) for the digital still camera/camcorder end, and a standard HDMI jack (socket) for the TV end.

(A) Digital still camera
(B) Camcorder
(C) HDMI cable (not supplied) *

* Be sure to use an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

To view content stored on a digital still camera/camcorder

1. After connecting the digital still camera/camcorder, turn it on.
2. Press the INPUT button repeatedly to select the connected digital still camera/camcorder.

To check the supported file formats

- Supported files and formats

Hint

- If you connect a BRAVIA Sync-compatible device, you can operate it by simply using the TV’s remote control. Make sure that the device is BRAVIA Sync-compatible. Some devices may not be compatible with BRAVIA Sync even though they have an HDMI jack (socket).
Computer video signal specifications

(Resolution, Horizontal frequency/Vertical frequency)

- 640 x 480, 31.5 kHz/60 Hz
- 800 x 600, 37.9 kHz/60 Hz
- 1024 x 768, 48.4 kHz/60 Hz
- 1152 x 864, 67.5 kHz/75 Hz
- 1280 x 1024, 64.0 kHz/60 Hz
- 1600 x 900, 56.0 kHz/60 Hz
- 1680 x 1050, 65.3 kHz/60 Hz
- 1920 x 1080, 67.5 kHz/60 Hz

* 1080p timing, when applied to the HDMI input, will be treated as video timing and not computer timing. This will affect the [Screen] settings in [Picture & Display]. To view computer content, set [Wide mode] to [Full], and [Display area] to [+1]. ([Display area] is configurable only when [Auto display area] is disabled.)

Note

- This TV does not support interlaced computer signals.
- 1920 x 1080/60 Hz output may not be available, depending on your computer. Even if 1920 x 1080/60 Hz output is selected, the actual output signal may differ. In this case, change the computer’s settings, then set your computer to use a different video signal.

Audio system

Connecting an audio system
Adjusting audio system-related settings
Connecting an audio system

See the illustrations below to connect an audio system such as an AV receiver or sound bar. After finishing the connection, configure the audio settings to play TV sound through the audio system (refer to the related topic link at the bottom of this page).

To connect an ARC capable audio system using an HDMI cable

If your audio system features HDMI output jacks (sockets), you can connect the TV to your audio system using an HDMI cable.

(A) AV receiver or sound bar
(B) HDMI cable (not supplied)*

* Be sure to use an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

Hint

- When connecting a BRAVIA Sync-compatible digital audio system with Audio Return Channel (ARC) technology, connect it to the HDMI IN jack (socket) labeled with the “ARC” mark with an HDMI cable. However, if connecting a system that is not BRAVIA Sync-compatible or Audio Return Channel capable, you must also connect the TV to the audio system using the DIGITAL AUDIO OUT (OPTICAL) jack (socket).
- See the instruction manual of the audio system for details on connecting other devices and for set-up.

Note

- The location of the HDMI port that supports ARC varies depending on your model. Refer to the Reference Guide.
To connect an audio system that is not ARC capable using an optical audio cable

You can connect the TV’s audio output to an audio system using an optical audio cable.

(A) AV receiver or Sound bar
(B) Optical audio cable (not supplied)

Hint
- See the instruction manual of the audio system for details on connecting other devices and for set-up.

To connect an audio system using an audio cable

You can connect the TV’s audio output to an audio system using a stereo to RCA analog audio cable.

(A) AV receiver or Sound bar
(B) Audio cable (not supplied)

Hint
- See the instruction manual of the audio system for details on connecting other devices and for the set-up.
Adjusting audio system-related settings

When using the HDMI connection or optical audio connection

1. After connecting the TV to your audio system, press the ACTION MENU button, then select [Speakers] — [Audio system].

2. Turn on the connected audio system, then adjust the volume.
   If you connect a BRAVIA Sync-compatible device with an HDMI connection, you can operate it by simply using the TV's remote control.

Note

- You need to configure the [Digital audio out] settings according to your audio system. Press the HOME button, then select [Settings] — [Sound] — [Digital audio out].

When using the audio cable connection

1. After connecting the TV to your audio system, press the HOME button, then select [Settings] — [Sound] — [Headphone/Audio out] — [Audio out (Fixed)].

2. Turn on the connected audio system, then adjust the volume.

Hint

- When using an external audio system, the audio out of the TV can be operated using the TV’s remote control if [Headphone/Audio out] is set to [Audio out (Variable)]. Press the HOME button, then select [Settings] — [Sound] — [Headphone/Audio out] — [Audio out (Variable)].
- When connecting a subwoofer, press the HOME button, then select [Settings] — [Sound] — [Headphone/Audio out] — [Subwoofer].
[53] Using the TV with Other Devices

Bluetooth devices

Connecting a Bluetooth device

Supported Bluetooth profiles

[54] Using the TV with Other Devices | Bluetooth devices

Connecting a Bluetooth device

To pair the TV with a Bluetooth device

1. Turn the Bluetooth device on and put it in pairing mode.
   To put your Bluetooth device in pairing mode, refer to the instruction manual of the device.

   A list of available Bluetooth devices will be displayed.

3. Select the desired device from the list, then follow the on-screen instructions.
   If you are prompted to enter a passcode, refer to the instruction manual of the device.
   After pairing is completed, the device connects to the TV.

Sony wireless subwoofer (optional) (Sony wireless subwoofer supported models only)

Connecting a wireless subwoofer (optional)

Adjusting wireless subwoofer-related settings (optional)

Connecting a wireless subwoofer (optional)

You can use the optional Wireless Subwoofer SWF-BR100 to extend the bass response of the TV's sound.

The availability of this feature depends on your model/region/country.

TVs that support the Wireless Subwoofer indicate “SWF-BR100” in the specifications section of the Reference Guide.
Connect the audio cable (supplied) to the Wireless Transceiver.

2. Connect the other end of the audio cable to the AUDIO OUT / jack (socket) of the TV.

3. Connect the Wireless Transceiver to the USB port of the TV.
   [Headphone/Audio out] is automatically set to [Subwoofer].

4. Position the Wireless Subwoofer and connect it to the AC power.
   We recommend that the Wireless Subwoofer be placed as close as possible to the TV.

Hint

- When the Wireless Transceiver is disconnected, [Headphone/Audio out] is automatically restored to its original setting.
- For details on how to set up the Wireless Subwoofer, refer to the instruction manual supplied with the Wireless Subwoofer.

Related topics

- Adjusting wireless subwoofer-related settings (optional)

Adjusting wireless subwoofer-related settings (optional)
Sony wireless subwoofer supported models have [Wireless Subwoofer power] in [Settings] — [Sound] — [Sound adjustments].

The sound settings of the Wireless Subwoofer have already been set to the recommended values for your TV. Follow the instructions below to change the settings to suit your preferences.

Available Options

[Wireless Subwoofer level]
Adjusts the volume level of the Wireless Subwoofer.

[Cut off frequency (50-200Hz)]
Adjusts the cutoff frequency of the Wireless Subwoofer. All frequencies below the cutoff frequency are output to the Wireless Subwoofer.

[Phase]
Sets the phase polarity. Select the setting to suit your preference.

[Wireless Subwoofer sync]
Adjusts the time lag of the Wireless Subwoofer sound. If the sound produced by the Wireless Subwoofer is too late, use [+]; if it is too early, use [-].

[Reset Wireless Subwoofer settings]
Resets the Wireless Subwoofer settings to their initial values.

To set the power control method of the Wireless Subwoofer

1. Press the HOME button, then select [Settings] — [Sound] — [Sound adjustments] — [Wireless Subwoofer power].

Connecting an IR Blaster (IR Blaster compatible models only)

IR Blaster compatible models have [IR Blaster setup] in [Settings] — [External inputs].

The IR Blaster allows you to operate a set-top box or AV Receiver that is connected to the TV, with the TV’s remote control.

(IR Blaster compatible models may not be available depending on your model/country.)

(A) Set-top box or AV Receiver
(B) IR Blaster cable
(C) IR Blaster jack (socket)

To set up the IR Blaster

1. Press the HOME button, then select [Settings] — [External inputs] — [IR Blaster setup].
2. Select the desired device from the list, then follow the on-screen instructions.

Hint

- The IR Blaster can operate an AV receiver. To set up an AV receiver, press the HOME button, then select [Settings] — [External inputs] — [IR Blaster setup] — [AV receiver control setup].
- If the AV receiver is a BRAVIA Sync-compatible device, an IR Blaster is not needed.

Note

- Some external devices may not respond to some items in the “Action Menu”.
- If you press and hold a button on the remote control, the operation may not be transmitted. Instead, press the button repeatedly.
- Make sure that the IR Blaster is correctly set up and the IR transmitter is located near the IR receiver of the external device.
• Make sure that your TV supports the external device.

Related topics

• An external device (such as a set-top box or AV receiver) cannot be controlled via the IR Blaster. (IR Blaster compatible models only)

A wired LAN connection allows you to access the Internet and your home network. Connect a LAN cable to your TV.

(A) LAN cable
(B) Computer
(C) Modem with router functions
(D) Internet

1. Set up your LAN router.
   For details, refer to the instruction manual of your LAN router, or contact the person who set up the network (network administrator).

3. Follow the on-screen instructions to complete the set-up.

Note

- The network-related settings that are required may vary depending on the Internet service provider or router. For details, refer to the instruction manuals provided by the Internet service provider or those supplied with the router. You can also contact the person who set up the
Connecting to a network using a wireless connection

Using Wi-Fi to connect the TV to your network

Using Wi-Fi Direct to connect to the TV (no wireless router required)

Connecting to a Network | Connecting to a network using a wireless connection

Using Wi-Fi to connect the TV to your network

The built-in wireless LAN device allows you to access the Internet and enjoy the benefits of networking in a cable-free environment.

(A) Computer
(B) Wireless router (access point)
(C) Modem
(D) Internet

1. Set up your wireless router (or access point).
   For details, refer to the instruction manual of your wireless router (or access point), or contact the person who set up the network (network administrator).

3. Follow the on-screen instructions to complete the set-up.
To turn off the built-in wireless LAN

To disable [Built-in Wi-Fi], press the HOME button, then select [Settings] — [Network] — [Advanced settings] — [Built-in Wi-Fi].

**Hint**

- For smooth video streaming:
  - Change the setting of your wireless router (or access point) to a high-speed networking standard such as 802.11n if possible.
  For details on how to change the setting, refer to the instruction manual of your wireless router (or access point), or contact the person who set up the network (network administrator).
  - If the above procedure does not deliver any improvement, change the setting of your wireless router (or access point) to 5GHz, which may help improve the video streaming quality.
  - The 5GHz band may not be supported depending on your region/country. If the 5GHz band is not supported, the TV can only connect to a wireless router (access point) using the 2.4GHz band.
- To use WEP security with a wireless router (or access point), select [Settings] — [Network] — [Network setup] — [Easy] — [Wi-Fi] — [Connect by scan list].

**Note**

- The network-related settings that are required may vary depending on the Internet service provider or router. For details, refer to the instruction manuals provided by the Internet service provider or those supplied with the router. You can also contact the person who set up the network (network administrator).
- If you select the [Show password] option in the password entry screen, the exposed password may be seen by other individuals.

**Related topics**

- Network (Internet/home)/apps
You can connect a device to the TV wirelessly, without using a wireless router, and then stream videos, photos, and music that is stored on your device directly to the TV.

1. To enable [Wi-Fi Direct], press the HOME button, then select [Settings] — [Network] — [Wi-Fi Direct] — [Wi-Fi Direct].

2. Select [Wi-Fi Direct settings].

3. Select the TV name displayed on the TV screen with the Wi-Fi Direct device.
   If the device does not support Wi-Fi Direct, select the [Show Network (SSID)/Password].

4. Operate the Wi-Fi Direct/Wi-Fi device to connect with the TV.

5. Send content from the Wi-Fi Direct/Wi-Fi device to the TV.
   For details, refer to the instruction manual of the device.

If the connection does not succeed

When the standby screen for the Wi-Fi Direct setting is displayed, select [Show Network (SSID)/Password] and follow the on-screen instructions to complete the set-up.

To connect another device

Follow the steps above to connect devices. Up to 10 devices can be connected at the same time. To connect another device when 10 devices are already connected, disconnect an unnecessary device, then connect the other device.

To change the name of the TV shown on the connected device

Press the HOME button, then select [Settings] — [About] — [Device name].
To list connected devices/deregister devices

To deregister a device, select the device in the list to delete, then press the button. Then, select [Yes] in the confirmation display.

To deregister all devices, select [Delete all] in the list, then [Yes] in the confirmation display.

To change the band setting (for experts)

When your TV is not connected wirelessly to a router, you can select the wireless band for the Wi-Fi Direct function. Press the HOME button, then select [Settings] — [Network] — [Wi-Fi Direct] — [Advanced settings] — [Band setting].

[Auto]

Normally use this option. It automatically selects an appropriate band for the Wi-Fi Direct function.

[Auto (2.4GHz band)]

Use this option when connecting with devices that support 2.4GHz only. This option may support more devices than other options.

[Auto (5GHz band)]

Use this option when connecting with devices that support 5GHz. This option may improve video streaming quality.

Note that when you select this option, the TV cannot connect with devices that support 2.4GHz only.

[Manual]

Use this option to select a specific wireless channel.

Hint

- For information about the supported wireless band of your device, refer to the instruction manual of your device.

- The 5GHz band may not be supported depending on your region/country. If the 5GHz band is not supported, you can only use [Auto] and [Manual].

Note

- If the TV is connected to a wireless router (or access point) at 5GHz:
  - The 5GHz wireless connection will be disconnected when [Wi-Fi Direct settings] is selected. While the connection is disconnected, communication via Internet is stopped.
The connection will resume automatically after exiting from [Wi-Fi Direct settings].

- The 5GHz band may not be supported depending on your region/country.

**Related topics**

- The TV cannot be found by a Wi-Fi Direct device.

[83] Settings | Configuring the TV

**[Expert panel settings](only models equipped with an OLED panel)**

These options are available for models equipped with an OLED panel and are used to prevent image retention.

If the same image is displayed repeatedly or for long periods of time, image retention may occur.

The TV has two functions, [Pixel shift] and [Panel refresh], that are designed to reduce image retention.

**Available options**

[Pixel shift]
Moves the displayed image at regular intervals to prevent image retention. Under normal circumstances, use the TV with this option enabled.

[Panel refresh]
Manually perform a panel refresh only when image retention is particularly noticeable.

**Note**
- Perform panel refresh only when image retention is particularly noticeable. As a reference, perform it only once a year. Avoid performing it more than once a year because it may affect the usable life of the panel.
- Panel refresh takes about one hour to complete. A white line may be displayed on the screen during the panel refresh. This is not a malfunction of the TV.
- Perform adjustments when the room temperature is between 10°C (50°F) and 40°C (104°F). If the room temperature is outside this range, the panel refresh may not complete.

---

**[84] Settings**

**Setting a timer**

**To set the on timer**
On timer automatically turns on the TV at a specific time, such as when a program that you want to watch comes on. It also allows you to use the TV as an alarm clock.

1. Press the HOME button, then select [Timers] — [Timer] — the desired option.

**To set the sleep timer**
Sleep timer automatically turns off the TV after a preset time.

1. Press the HOME button, then select [Timers] — [Sleep timer] — the desired option.

**Note**
- When you turn off the TV and turn it on again, [Sleep timer] is reset to [Off].

---

**[85] Troubleshooting**

Start here Experiencing trouble? Start here.
Start here

Self diagnostics

How to check if the TV is working properly.

- Press the HOME button, then select [Self diagnostics] under [Help].

Software updates

Sony will provide software updates from time to time in order to enhance functionality and provide users with the latest TV experience. The easiest way to receive software updates is via an internet connection to the TV.

To turn on automatic software download

To enable [Automatic software download], press the HOME button, then select [Help] — [System...
software update] — [Automatic software download].

**Hint**
- To update the software manually, select [Check for a system software update] in the [System software update] screen.
- If you do not wish to update the software automatically, disable [Automatic software download].

### Updating software via USB storage device

If you do not have a network connection, you can also update the software by using a USB storage device. Use your computer to download the latest software from the Sony support website onto a USB storage device. Insert the USB storage device to a USB port on the TV and the software update will start automatically.

If you will update the TV software by using a USB storage device, you should read the cautions for update by USB storage device on the website.

For more about the support site, please see the Support Site page.

[97] Troubleshooting | Picture (quality)/screen

Screen format/wide mode changes automatically.

• When changing the channel or video input, if [Auto wide] in [Screen] is enabled, the current [Wide mode] setting is automatically changed according to the input signal. To lock the [Wide mode] setting, disable [Auto wide].

Related topics
• Suddenly the picture becomes small.

[98] Troubleshooting | Picture (quality)/screen

Suddenly the picture becomes small.

• The picture becomes smaller during commercials due to the method used by the provider to broadcast content. When HD content channels switch to SD content (commercials), the picture may become small with a black border.

• [Auto wide] in [Screen] will not expand the picture while the content switches since the content information is regulated by the channel signal provider. You can manually change the [Wide mode] setting if desired, which will remain in effect until you change the channel/input or manually change the [Wide mode] setting again.

Related topics
• Screen format/wide mode changes automatically.

[99] Troubleshooting | Picture (quality)/screen

Black bands appear at the edges of the screen.

• Some wide screen programs are filmed in aspect ratios that are greater than 16:9 (this is especially common with theatrical releases). Your TV will show these programs with black bands at the top
and bottom of the screen. For more details, check the documentation that came with your DVD (or contact your program provider).

- Programs in 4:3 aspect ratio will have bands on the left and right sides of the screen.
- Programs broadcasted in HD formats (720p and 1080i) with 4:3 content will commonly have black bands on the left and right sides of the screen which are added by the broadcaster.
- [Auto wide] in [Screen] will not expand the picture when the black bands on the sides of the screen are added by the broadcaster. You can manually set [Wide mode] to [Wide zoom] or [Zoom], which will remain in effect until you change the channel/input or manually change the [Wide mode] setting again.
- Some cable and satellite set-top boxes can also control the size of the picture. If you are using a set-top box, refer to the manufacturer of the set-top box for more information.

### A black box appears on the screen.

- A text option is selected although no text is available. Check the [Captions]/[Broadcast closed captions] settings in [Accessibility]. (Option name differs depending on your region/country.) You can select a different option from the current option.

### There are banners/tickers at the top or bottom of the screen.

In this case, the TV might be in demo mode. Try exiting demo mode.

- Press the ACTION MENU button on the remote control and select [Suspend Demo]. Then, press the HOME button on the remote control and select [Settings] — [Retail mode settings]. Disable [Demo mode] and [Picture reset mode].

### 3D pictures are not displayed. The 3D effect is weak. (3D models only)

3D models have [3D settings] in [Settings] — [Picture & Display].
- If two pictures are displayed side-by-side, press the ACTION MENU button, then select [3D] — [3D display] — [3D (Side by Side)].
  If two pictures are displayed one above the other, press the ACTION MENU button, then select [3D] — [3D display] — [3D (Over-Under)].
- If the [3D display] screen appears and 3D pictures are not displayed, turn off the device that plays 3D content and turn it on again.
- Perceived 3D effect may vary from person to person.
- 3D signal of 4K cannot be displayed.
- For Passive 3D Glasses models, view the TV from the front on. The 3D effect may be less pronounced depending on the viewing position. Adjust the viewing angle to the screen.

**For Active 3D Glasses models**
- Be sure that there are no obstacles between the TV and the Active 3D Glasses.
- Replace the battery in the Active 3D Glasses.
- Be sure that the Active 3D Glasses are powered on.
- It is necessary to register your Active 3D Glasses to the TV before use. To use the glasses with another TV, it is necessary to re-register. Turn off the glasses before re-registering.
- Wireless devices or microwave ovens may affect the communication between the 3D Glasses and the TV as the TV uses the 2.4GHz band. In this case, try to register again.
- If a device that is not 3D-compatible (such as a home theater system) is connected between the TV and a 3D-compatible device, the TV will not display 3D pictures. Connect the 3D-compatible device directly to the TV via an authorized HIGH SPEED HDMI cable bearing the HDMI logo.

[103] Troubleshooting | Picture (quality)/screen

**Black bars appear on both sides of the screen when watching 3D pictures. (3D models only)**

3D models have [3D settings] in [Settings] — [Picture & Display].
- Black bars appear on both sides of the screen in order to process 3D signals when adjusting the depth of 3D pictures in [Settings] — [Picture & Display] — [3D settings] — [3D depth adjustment].
You cannot turn off 3D display while watching 3D content. (3D models only)

3D models have [3D settings] in [Settings] — [Picture & Display].

- For 3D content displayed with the 3D signal, 3D display cannot be turned off on your TV. Turn 3D settings off on the connected device (such as a Blu-ray player).

The message [3D signal has been detected.] automatically appears when 3D signal is detected. (3D models only)

3D models have [3D settings] in [Settings] — [Picture & Display].

A message about an app asking for permission to access a TV function is displayed.

- Select whether to allow or deny the app access to the displayed function.
- You can check the list of app permissions categorized by TV function and change permission settings for each app. Press the HOME button, select [Settings] — [Apps] — [App permissions] — the desired TV function.

The screen becomes darker after a certain period of time. (only models equipped with an OLED panel)
If the whole image or part of the image remains still, the screen will gradually become darker to reduce image retention. This is a feature to protect the panel, and is not a malfunction.

The message [Panel refresh did not finish] is displayed. (only models equipped with an OLED panel)

Panel refresh automatically runs after the TV has been used for a long period of time to reduce image retention. If the TV is turned on, the AC power cord (mains lead) is unplugged, or the ambient temperature falls outside of the range between 10°C (50°F) and 40°C (104°F) during the panel refresh, the process will not complete and this message will appear.

- If panel refresh started automatically, it will restart when you turn off the TV with the remote control.
- If panel refresh was initiated manually, you must select it again.

You are concerned about an image retention. (only models equipped with an OLED panel)

If the same image is displayed repeatedly or for long periods of time, image retention may occur.

You can manually perform a panel refresh to reduce image retention.

**Note**

- Perform panel refresh only when image retention is particularly noticeable. As a reference, perform it only once a year. Avoid performing it more than once a year because it may affect the usable life of the panel.
- Images that include clocks and bright colors easily cause image retention. Avoid displaying these types of images for long periods of time, otherwise image retention may occur.

**Related topics**

- [Expert panel settings](only models equipped with an OLED panel)
A white line appears on the screen. (only models equipped with an OLED panel)

- Panel refresh automatically runs after the TV has been used for a long period of time to reduce image retention. Panel refresh starts after the TV is turned off and takes about one hour to complete. A white line may be displayed on the screen during the panel refresh. This is not a malfunction of the TV.

Panel refresh does not complete. (only models equipped with an OLED panel)

- Panel refresh works when the room temperature is between 10°C (50°F) and 40°C (104°F). If the room temperature falls outside of this range during the panel refresh, the process does not finish and a message is displayed. If the message is displayed, check the temperature of the room.

You cannot operate the current screen after the on-screen keyboard is displayed.

- To return to operation of the screen behind the on-screen keyboard, press the BACK button on the remote control.

Check these things first to troubleshoot your TV reception.

A message appears stating that the TV cannot connect to your network.
You can connect to the Internet, but not to Google services.
You cannot add a Google account.

The network name (SSID) of the wireless router (access point) to which you want to connect is not displayed.

- Reset the wireless router.
- Select [[Manual entry]] to enter a network name (SSID).

Sometimes video streaming quality is poor.

- Quality depends on the original video provided by the video content provider and your connection bandwidth.
- The wireless network connection quality varies depending on the distance or obstacles (e.g., wall) between the TV and the wireless router (access point), environmental interference, and the quality of the wireless router (access point). In this case, use a wired connection for the Internet, or try the 5GHz band.
- The 5GHz band may not be supported depending on your region/country. If the 5GHz band is not supported, the TV can only connect to a wireless router (access point) using the 2.4GHz band.

Related topics

- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network

Wi-Fi connection is lost or intermittent.

- Check the installation location of the TV and wireless router (access point). Signal condition may be affected by the following:
Other wireless devices, microwaves, fluorescent lights, etc., are placed nearby.
- There are floors or walls between the wireless router (access point) and TV.

If the problem persists even after checking the above, try using a wired LAN connection.

[137] Troubleshooting | Network (Internet/home)/apps
Apps are inaccessible.

- Check that the LAN cable or AC power cord (mains lead) of the router/modem has been connected properly.

  * Your router/modem must be set in advance to connect to the Internet. Contact your Internet service provider for router/modem settings.

- Try using apps later. The app content provider’s server may be out of service.

**Related topics**

- Connecting to a network using a LAN cable
- Using Wi-Fi to connect the TV to your network

The TV cannot access the Internet when IPv6 is set.

- IPv6 may not be supported, in which case set IPv6 to off.

Your TV cannot connect to the server.

- Check the LAN cable or wireless connection to your server and your TV.
- Check if your network is properly configured on your TV.
- Check your LAN cable/wireless connection or your server. The TV may have lost connection with the server.
- Perform [Server diagnostics] to check if your media server is properly communicating with the TV.
  - Press the HOME button, then select [Settings] — [Network] — [Home network] — [Server diagnostics].

**Related topics**

- Home network features
A message appears stating that the TV cannot connect to your network.

- Check the current network settings and perform [Check Connection].
  Check your network connections and/or server's instruction manual for connection information, or contact the person who set up the network (network administrator).
- Reconfigure your network settings by pressing the HOME button, then select [Settings] — [Network] — [Network setup].
- If the LAN cable is connected to an active server and the TV has acquired an IP address, check your server’s connections and configurations. Press the HOME button, then select [Settings] — [Network] — [Advanced settings] — [Network status].

Related topics

- Your TV cannot connect to the server.

You can connect to the Internet, but not to Google services.

- The date and time settings of this TV may be incorrect. Depending on the app such as Google Play or YouTube, you may not be able to connect to Google services if the time is incorrect.
  Press the HOME button, then select [Settings] — [Date & time] — [Automatic date & time] — [Use network time] to automatically adjust the time through the network.

You cannot add a Google account.
Only one Google account can be registered at a time. To log in with another Google account, you must remove the registered account.

**To log in with another account**

1. Press the HOME button, then select [Settings] — [Google] — [Remove account].
2. Remove the current Google account and then add another account.

**[143] Troubleshooting**

**Remote control/accessories**

The remote control does not operate.
You cannot turn the Active 3D Glasses on. (3D models only)
The LED indicator on the Active 3D Glasses blinks. (3D models only)

---

**[144] Troubleshooting | Remote control/accessories**

**The remote control does not operate.**

- Press a button on the TV to determine if the problem is with the remote control or not.
- Check that the orientation of each battery matches the positive (+) and negative (-) symbols in the battery compartment.
- Battery power may be low. Remove the remote control cover and replace the batteries with new ones.

  - **Sliding type**

    ![Sliding type](image)

  - **Push-release type**

    ![Push-release type](image)
There may be poor contact between the battery and the remote control. Remove the batteries, then insert them again.

Point the remote control at the remote control sensor located at the front of the TV.

Keep the remote control sensor area clear from obstacles.

Fluorescent light can interfere with remote control operation; try turning off any fluorescent light.

When you unplug the TV and plug it in again, the TV may not be able to turn on for a while, even if you press the power button on the remote control or the TV. This is because it takes time to initialize the system. Wait for about 10 to 20 seconds, then try again.

When your voice is not being recognized, make sure to activate the button on the remote control with the button, or register the remote control with the button to your TV. To confirm these settings, press the HOME button, then select [Settings] — [Voice Remote Control]. The button may not be available depending on your supplied remote control.

You cannot turn the Active 3D Glasses on. (3D models only)

Replace the battery. (Applies only to TDG-BT400A/BT500A.)

1. Press the unlock button with the tip of a pen, etc., and take out the battery case.

2. Replace the battery with a new one. After that, be sure to insert the battery case until it locks in place again.
The LED indicator on the Active 3D Glasses blinks. (3D models only)

- Lights up for 3 seconds: Indicates when turning on the glasses.
- Blinks every 2 seconds: Indicates the glasses are powered on.
- Blinks 3 times: Indicates the glasses have been powered off.
- Blinks green and yellow alternately: Indicates the glasses have started the registration process.
- Blinks 3 times every 2 seconds: Indicates the battery capacity is almost running out. Replace the battery.

Connected devices

No picture from a connected device.
You cannot select a connected device in the Home Menu.
Certain programs on digital sources display a loss of detail.
Photo images or folders take time to display.
You cannot find a connected BRAVIA Sync HDMI device.
You cannot control a second AV receiver.
An external device (such as a set-top box or AV receiver) cannot be controlled via the IR Blaster. (IR Blaster compatible models only)
Some media files in the USB device or server are not displayed.
The TV cannot be found by a Wi-Fi Direct device.
Operation cuts out, or a device does not work.
What kind of devices can be connected using the Screen mirroring function?
The TV cannot connect to a Miracast device or Screen mirroring compatible device.
Video or sound sometimes cuts out.
Some paid content cannot be played.
The TV cannot be turned on and controlled by using the “Video & TV SideView” app when [Remote start] is enabled.
The TV does not appear on or cannot be registered with the “Video & TV SideView” app.

---

No picture from a connected device.

- Turn the connected device on.
- Check the cable connection between the device and TV.
- Press the INPUT button to display the list of inputs, then select the desired input
- Correctly insert the USB device.
- Make sure that the USB device has been properly formatted.
- Operation is not guaranteed for all USB devices. Also, operations differ depending on the USB device features or the video files being played.
- If the connected device is connected to HDMI IN 2 or 3, connect it to HDMI IN 1 or 4.
• Change the HDMI signal format of the HDMI input that does not display a picture to standard format. Press the HOME button, then select [Settings] — [External inputs] — [HDMI signal format].

[154] Troubleshooting | Connected devices

Certain programs on digital sources display a loss of detail.

• Less detail than usual or artifacts (small blocks, dots or pixelation) may appear on the screen, due to the digital compression of the source content used by certain digital broadcasts and DVDs. The degree of visible artifacts depends on the clarity and resolution of the TV.

[155] Troubleshooting | Connected devices

Photo images or folders take time to display.

• Depending on the image dimension, file size, and number of files in a folder, some photo images or folders take time to display.

• Each time a USB device is connected to the TV, it may take up to a couple of minutes for the photos to display.

You cannot find a connected BRAVIA Sync HDMI device.

- Check that your device is BRAVIA Sync-compatible.
- Make sure that [Control for HDMI] is set up on the BRAVIA Sync-compatible device and [BRAVIA Sync settings] — [BRAVIA Sync control] is set up on the TV.

Related topics

- BRAVIA Sync-compatible devices

You cannot control a second AV receiver.

- Only one BRAVIA Sync-compatible AV receiver can be used.

Related topics

- BRAVIA Sync-compatible devices

An external device (such as a set-top box or AV receiver) cannot be controlled via the IR Blaster. (IR Blaster compatible models only)

IR Blaster compatible models have [IR Blaster setup] in [Settings] — [External inputs].

- Make sure that the IR Blaster is correctly set up and the IR transmitter is located near the IR receiver of the external device.
Make sure that your TV supports the external device.

If you press and hold a button on the remote control, the operation may not be transmitted. Instead, press the button repeatedly.

Some external devices may not respond to some buttons on the “Action Menu”.

(Except for Brazilian models) The IR Blaster may not be set properly. To set the IR Blaster, press the HOME button, then select [Settings] — [External inputs] — [IR Blaster setup].

---

### Troubleshooting | Connected devices

**The TV cannot be found by a Wi-Fi Direct device.**

- Enable [Wi-Fi Direct]. Press the HOME button, then select [Settings] — [Network] — [Wi-Fi Direct] — [Wi-Fi Direct].
- If the TV cannot be found even though [Wi-Fi Direct] is enabled, set [Band setting] to [Auto (2.4GHz band)]. Press the HOME button, then select [Settings] — [Network] — [Wi-Fi Direct] — [Advanced settings] — [Band setting] — [Auto (2.4GHz band)].

---

### Troubleshooting | Connected devices

**Operation cuts out, or a device does not work.**
- Check if the device is turned on.
- Replace the batteries of the device.
- Re-register the device.
- Bluetooth devices use the 2.4GHz band, therefore communication speed may deteriorate or cut out occasionally due to wireless LAN interference.
  
  If household electric appliances (e.g., microwaves or mobile devices) are placed nearby, radio wave interference is more likely to happen.
- The TV or device may not work on a metal rack due to wireless communication interference.
- For usable communication distances between the TV and other devices, refer to the instruction manuals of the devices.
- When multiple Bluetooth devices are connected to the TV, the quality of Bluetooth communication may deteriorate.

### Related topics

[162] Troubleshooting | Connected devices

**What kind of devices can be connected using the Screen mirroring function?**

- Wi-Fi enabled devices, such as smartphones and tablets, that support Miracast can be used to enjoy Screen mirroring on your BRAVIA TV. Refer to the instruction manual of your Wi-Fi device to find out if it supports Miracast. BRAVIA TV complies with the Miracast specification, but does not guarantee a successful connection with all devices.

---

[163] Troubleshooting | Connected devices

**The TV cannot connect to a Miracast device or Screen mirroring compatible device.**

- If connecting a Miracast device (e.g., laptop) fails, press the HOME button, then select [Screen mirroring] to show the standby screen for the Screen mirroring function and try to connect again.
- If you are using Screen mirroring with another device, turn off Screen mirroring first and try again.
- If your device does not support 5GHz and you set the [Band setting] option to [Auto (5GHz band)],
try changing it to [Auto].

Related topics
- Displaying the screen of a smartphone/tablet on the TV using the Screen mirroring function
- What kind of devices can be connected using the Screen mirroring function?

Video or sound sometimes cuts out.

- Devices emitting radio waves, such as other wireless LAN devices or microwave ovens, may interfere with the Screen mirroring function using wireless LAN. Keep the TV or Sony Screen mirroring compatible devices (e.g., some models of Xperia) away from such devices, or turn them off if possible.
- Communication speed may change according to the distance or obstacles between devices, device configuration, radio wave condition, line congestion or the device you use. Communication may cut out due to the radio wave condition.

Related topics
- Displaying the screen of a smartphone/tablet on the TV using the Screen mirroring function
- Using Wi-Fi to connect the TV to your network

Some paid content cannot be played.

- The source device needs to meet HDCP (High-bandwidth Digital Content Protection) 2.0/2.1/2.2 standards.
  Some pay contents may not be displayed via a source device which does not meet HDCP 2.0/2.1/2.2 standards.

The TV cannot be turned on and controlled by
Using the “Video & TV SideView” app when [Remote start] is enabled.

- When devices that cause radio wave interference (microwave ovens, cordless phones, etc.) are placed nearby, the “Video & TV SideView” function may not work. In this case, keep such devices away from the wireless router (access point) or TV, or turn them off.

- In the following cases, the “Video & TV SideView” function may not work. Turn on the TV and reconnect to the wireless router (access point).
  - Turn on/off the wireless router (access point) power during TV standby mode
  - Reset the wireless router (access point) during TV standby mode
  - Change the wireless router (access point) channel during TV standby mode

- The “Video & TV SideView” function may not work with business-use wireless routers (access points) that require reconnection periodically.

- The “Video & TV SideView” function may not work depending on the settings of the wireless router (access point) (e.g., Multi SSID and Power saving mode).

- If Wi-Fi Direct is used to connect the “Video & TV SideView” app to the TV, the TV may not be turned on from standby mode depending on your mobile device.

- The TV should be in the power-on or standby mode. Do not turn off the TV by disconnecting its AC power cord (mains lead).

- Check that the following has been set for your TV.
  When the wireless router (access point) and TV are connected with wireless LAN
  - Built-in wireless LAN model TV is used
  - [Remote start] under [Settings] — [Network] is enabled
  - TV is connected to the wireless router (access point)

When the wireless router (access point) and TV are connected with wired LAN
  - [Remote start] under [Settings] — [Network] is enabled

**Related topics**

### [168] Troubleshooting

**Illumination LED**

The illumination LED or bottom of the screen sometimes lights up.

You want to disable the illumination LED so that it does not light up or blink.

---

### [169] Troubleshooting | Illumination LED

**The illumination LED or bottom of the screen sometimes lights up.**

The illumination LED or the bottom of the screen lights up at various times such as during software
updates or when a smartphone is detected on a home network. It does not mean that the TV is
malfunctioning or defective.

Refer to Identifying the status of the TV through illumination for details.

---

### [170] Troubleshooting | Illumination LED

**You want to disable the illumination LED so that it does not light up or blink.**
You can turn it off. Press the HOME button, then select [Settings] — [Illumination LED] — [Off].

Note

- We recommend that you do not change this setting under normal circumstances because you will be unable to identify whether the TV is on or off, or a timer is set.
