What you can do with “PlayMemories Home”

Using “PlayMemories Home,” you can perform the following operations.

[Importing videos and photos from your camera to a computer](#)

You can import videos and photos recorded on your camera by connecting your camera to a computer.

[Viewing videos and photos](#)

You can manage videos and photos recorded on your camera by date, and select videos or photos you want to view as thumbnails.

[Printing photos](#)

You can print selected photos. You can also print photos with the date information.

Editing photos

You can correct photos, such as applying red-eye reduction, or edit videos (Only for models that support this function).

Creating a disc (Only for models that support this function)

You can create a disc that can be played back with a player or a computer from previously recorded videos.

Notes

- Even if the video or photo can be imported to “PlayMemories Home,” some functions may not work properly on it.
- The functions you can use may differ, depending on the camera you are using. Also, the content of the help may differ, depending on the functions supported by your camera.

▲ [Back to top](#)

Starting/Exiting the program

Starting the program

You can use the following procedure to start the program.

- Select [Start] - [All Programs] - [ PlayMemories Home].

Exiting the program

You can use one of the following procedures to exit the program.

- Click the [File] menu, and click [Exit].
- Click the close button [X] at the upper-right corner of the window.

[▲ Back to top](#)

Importing videos and photos from your camera to a computer

You can import videos and photos recorded on your camera by connecting your camera to a computer.

1. Turn on your camera, and connect it to the computer.

The video/photo import window is displayed on the screen of the computer.

2. Select the destination drive and folder, and the import method.
 - If you select [Select files to import], select videos or photos to be imported from the video/photo selection area. By double-clicking a video or photo, you can enlarge it.
 - If you click [Settings] and put a check in the [Delete imported media files from the device or media] checkbox, videos and photos will be deleted from your camera after they have been imported to your computer.
3. Click [Import].

When the import of the data is completed, the main window is displayed.

Hints

- For details on the import window, see [Parts and controls of the import window](#).
- For how to connect your camera to a computer, refer to the supplied Operating Guide.
- If you connect your camera to your computer using a Wi-Fi connection, videos and photos will be imported to the computer only if you select the video import function on your camera. Only videos and photos that have not previously been imported will be imported in this operation, and a progress indicator will be displayed on the window. (Only for models that support the Wi-Fi import function of "PlayMemories Home")

Notes

- If you are using a camera that does not have a USB power supply function, we recommend that you use an AC Adaptor as the power source. If you do not have or cannot use an AC adaptor, use a fully charged battery.
- If you have not put a check in the [Import with PlayMemories Home when a device is connected] checkbox on the window displayed when you selected [Settings] - [Import] in the [Tools] menu, the import window will not be displayed. In this case, start "PlayMemories Home," and click  (Import Media Files) on the top of the main window.

[▲ Back to top](#)

Viewing videos and photos

You can browse videos and photos imported to a computer sorted by the date and time they were taken (Calendar view).

1. In [Media file locations] (A) on the main window, click the drive, folder, or camera connected, where the videos or photos you want to view are saved.

2. Click [Year], [Month], or [Day] (B) to switch the display, and display thumbnails of the videos or photos you want to view.

3. Double-click the thumbnail of the video or photo you want to enlarge.

The selected video or photo is enlarged.

When you select a video, the slider and the playback control buttons appear and playback starts.

When you select a photo

When you select a video

Hints

- Click  at the bottom left of the window to switch the window to Folders view that sorts videos and photos by specified folders.
- For details on the main window, see [Parts and controls of the main window](#).
- When you double-click a video or photo in [Cameras and media], the video or photo is enlarged in another window.

Note

- To view the videos or photos saved on a computer with "PlayMemories Home," you have to specify the folders where the videos or photos are saved. If you want to specify a folder other than [My Pictures] which is usually specified in advance, select [Add Folders] from the [File] menu, and select the folder where the videos or photos you want to view are saved.

 [Back to top](#)

Printing photos

You can print selected photos. You can also print photos with the date information.

1. In the main window, select the photo you want to print.
 - You can also print photos while the display is enlarged.
2. Click  (Print) at the top of the window.

The print window is displayed.

3. Select the printer you want to use, the paper size, and the printing options.
4. Click [Print].

The printing process begins.

Hints

- To print photos with the date information, put a check in the [Print date taken] checkbox in the print window.
- When you put a check in the [Zoom the image until the print area is full (Part of the image may be cut.)] checkbox in the print window, you can print the full printable area of the image. However, portions of the image may be trimmed off.
- Depending on the type of printer you are using, you can choose to apply borderless printing or Exif Print to your prints.
- If ICM is set to ON in the printer driver settings, automatic color management printing is performed.

Notes

- Videos cannot be printed. Capture still images from the videos, and print them.
- RAW data files cannot be printed. Convert RAW files into JPEG, and print them.
