2026 Kumamoto Earthquake

- Sony has several semiconductor facilities located in Kumamoto prefecture and neighboring prefectures.
- While all these facilities were affected by the earthquake, there were no major casualties.
- The Kumamoto Technology Center of Sony Semiconductor Manufacturing Corporation (Kikuyo Town, Kumamoto Prefecture) experienced shaking at a seismic intensity of 5+ and suspended production immediately after the earthquake. Restoration efforts to resume production are currently underway.
- Sony's production sites in Nagasaki, Oita and Kagoshima had no significant damage to buildings or equipment and production has resumed.
- As it is currently difficult to reasonably estimate the financial impact of this earthquake, the impact has not been incorporated into the full-year results forecast we will show today.

* Effective October 1, 2025, Sony Group Corporation executed a partial spin-off of Sony Financial Group Inc. ("SFGI"), a formerly wholly-owned subsidiary which operates the Financial Services business (the "Spin-off"). As a result of the resolution of Sony Group Corporation's Board of Directors on May 14, 2025 on a plan for the execution of the Spin-off, the Financial Services business has been classified as a discontinued operation and presented separately from continuing operations, comprised of Sony's businesses excluding the Financial Services business, from Q1 FY25, in accordance with IFRS® Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). Therefore, the above figures for net income attributable to Sony Group Corporation's stockholders and net income attributable to Sony Group Corporation's stockholders per share of common stock (diluted) for Q1 FY25 represent the results for continuing operations. As net income (loss) from discontinued operations was not recorded in Q1 FY26, there is no difference between the figures for continuing operations and the consolidated figures for Q1 FY26 (applies to all following pages).

Notes about Adjusted OIBDA

Adjusted OIBDA (Operating Income Before Depreciation and Amortization) is calculated by the following formula:

Adjusted OIBDA = Operating income + Depreciation and amortization expense* - the profit and loss amount that Sony deems non-recurring

* In the above formula, depreciation and amortization expense excludes amortization for film costs and broadcasting rights, as well as for internally developed game content and master recordings included in Content assets.

Adjusted OIBDA is not a measure in accordance with IFRS Accounting Standards. However, Sony believes that this disclosure may be useful information to investors. Adjusted OIBDA should be considered in addition to, not as a substitute for, Sony's results in accordance with IFRS Accounting Standards.

Sales on a Constant Currency Basis and the Impact of Foreign Exchange Rate Fluctuations

The descriptions of sales on a constant currency basis reflect sales calculated by applying the yen's monthly average exchange rates from the same period of the previous fiscal year to local currency-denominated monthly sales in the relevant period of the current fiscal year. For Sony Music Entertainment ("SME") and Sony Music Publishing LLC ("SMP") in the Music segment, and in the Pictures segment, the constant currency amounts are calculated by applying the monthly average U.S. dollar / yen exchange rates after aggregation on a U.S. dollar basis.

Results for the Pictures segment are described on a U.S. dollar basis as the Pictures segment reflects the operations of Sony Pictures Entertainment Inc. ("SPE"), a U.S.-based operation that aggregates the results of its worldwide subsidiaries in U.S. dollars.

The impact of foreign exchange rate fluctuations on sales is calculated by applying the change in the yen's periodic weighted average exchange rate for the same period of the previous fiscal year from the relevant period of the current fiscal year to the major transactional currencies in which the sales are denominated. The impact of foreign exchange rate fluctuations on operating income (loss) is calculated by subtracting from the impact on sales the impact on cost of sales and selling, general and administrative expenses calculated by applying the same major transactional currencies calculation process to cost of sales and selling, general and administrative expenses as for the impact on sales. If the I&SS segment has independently entered into foreign exchange hedging transactions, the impact of such transactions is included in the impact of foreign exchange rate fluctuations on sales and operating income (loss) for that segment.

This information is not a substitute for Sony's consolidated financial statements and condensed (semi-annual) consolidated financial statements measured in accordance with IFRS Accounting Standards. However, Sony believes that these disclosures provide additional useful analytical information to investors regarding the operating performance of Sony.

Notes about Financial Performance of the Music and Pictures segments

The Music segment results include the yen-based results of Sony Music Entertainment (Japan) Inc. and the yen-translated results of SME and SMP, which aggregate the results of their worldwide subsidiaries on a U.S. dollar basis.

The Pictures segment results are the yen-translated results of SPE, which aggregates the results of its worldwide subsidiaries on a U.S. dollar basis. Management analyzes the results of SPE in U.S. dollars, so discussion of certain portions of its results is specified as being on "a U.S. dollar basis."
